QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

LONDON :

PRINTED UNDER THE AUTHORITY OF HIS MAJESTY'S STATIONERY OFFICE.
BY ALEXANDER THOM & CO., LIMITED, ABBEY STREET, DUBLIN.

To be purchased either directly or through any Bookseller, from
E. PONSONBY, LTD., 116, GRAFTON STREET, DUBLIN; or
WYMAN & SONS, LIMITED, 29, BREAMS BUILDINGS, FETTER LANE, E.C., and 54, ST. MARY STREET, CARDIFF; or
H.M. STATIONERY OFFICE (SCOTTISH BRANCH), 23, FORTH STREET, EDINBURGH;
or from the Agencies in the British Colonies and Dependencies
the United States of America, the Continent of Europe, and Abroad, of
T. FISHER UNWIN, LONDON, W.C.

Price One Shilling.

Marriages:—OCTOBER, NOVEMBER, DECEMBER, 1913. **Births and Deaths:**—JANUARY, FEBRUARY, MARCH, 1914.

During the quarter ended 31st March last, there were registered in the 831 Registrars' Districts in Ireland 25,069 births—a number equal to an annual birth-rate of 22·9 in every 1,000 of the estimated population*—and 20,462 deaths, representing an annual rate of 18·7 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 2,657 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 23·6 in every 1,000 of the estimated population, and the death-rate 15·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·9 below the average rate for the corresponding quarter of the ten years, 1904–1913, and 0·5 below the rate for the first quarter of 1913. The deaths are 1,387 below those registered in the corresponding quarter of 1913; the death-rate is 1·2 below the rate for that quarter, and 1·4 below the average for the first quarter of the ten years, 1904–1913.

In comparison with those for the corresponding quarter of 1913, the returns of pauperism furnished by the Local Government Board show a decrease of 1,602 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,543 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years, 1904–1913, the number of Workhouse inmates shows a decrease of 6,718, and the number of persons on out-door relief shows a decrease of 14,758, the total under both heads being 22·0 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·2 per cent.

* See page 64.

The annual marriage-rate (5·0 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1913, is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st December, 1913, and by the BIRTHS and DEATHS registered in the Quarter ended 31st March, 1914.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

MARRIAGES.

The Marriages (5,478) registered in Ireland during the fourth quarter of 1913 are equivalent to an annual rate of 5·0 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1912, and 0·2 above the average rate for the fourth quarter of the ten years 1903–1912. Of the total number of marriages, 3,793 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,685 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·9 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·4 above, and that under the latter heading 0·4 below the average rate for the corresponding quarter of the previous ten years.

Of the 22,174 marriages registered last year, 5,695 were registered in the first quarter, 5,609 in the second, 5,392 in the third, and 5,478 in the fourth.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1903–1913, and the average number for the ten years 1903–1912.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,069—12,884 boys and 12,185 girls—being equal to an annual ratio of 1 in every 43·6, or 22·9 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1904–13, was 26,047, equivalent to an annual rate of 23·8 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·4 per 1,000 of the population according to the Census of 1911; Munster, 22·1; Ulster, 23·3; and Connaught, 22·0.

The highest county or county borough birth-rate* is 32·1 for Dublin county borough, and the lowest 18·1 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 28·6; Limerick county and county borough, 24·5; Mayo, 23·7; Kerry, 23·4, and Louth, 23·1. The lowest five are—Wicklow, 18·4; Longford, 18·5; Armagh, 18·8; Queen's 19·1; and Cavan, 19·6.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 20,462—10,157 males and 10,305 females—affording an annual ratio of 1 in every 53·5, or 18·7 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1904–13, was 20·1 per 1,000.

The death-rate in Leinster was 20·5 per 1,000 of the population according to the Census of 1911; in Munster, 17·6; in Ulster, 19·2; and in Connaught, 15·4.

The county or county borough death-rates* range from 13·7 in Mayo to 27·7 in Dublin county borough. Between these rates the lowest five are—Roscommon, 14·9; Kildare, 15·1; Carlow, 15·9; Cavan, 16·0; and Kerry, 16·0; and the highest five are—Wexford, 21·2; Belfast county borough, 20·6; Monaghan, 20·5; Limerick county and county borough, 20·2; and Down, 19·8.

* See note (*) on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1904–1913, and the average number for that period; also the number registered during the first quarter of the year 1914 :—

AGES.—Of the 20,462 deaths registered last quarter, 2,379, or 11·6 per cent., were of infants under one year of age; and 8,680, or 42·4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 94·9 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 13·7 per cent. of the total deaths registered therein; in Munster, 9·9 per cent.; in Ulster, 12·1 per cent.; and in Connaught, 8·0 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37·1 per cent.; in Munster, to 45·2 per cent.; in Ulster, to 41·0 per cent.; and in Connaught, to 54·9 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 930, and is equivalent to an annual rate of 0·85 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the March quarter of 1914, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1909–1913.

Name of Disease.	Number of Deaths in March quarter, 1914.	Average number of Deaths in March quarter of the 5 years, 1909–1913.
Enteric Fever,	59	74
Typhus,	8	14
Small-pox,	—	—
Measles,	223	163
Scarlet Fever,	138	55
Whooping-cough,	189	295
Diphtheria,	93	101

* See note (†) on page 9.

ENTERIC FEVER.—There were 59 deaths from enteric fever registered during the quarter under notice; of this figure, 10 occurred in the city of Dublin. The average number of deaths from enteric fever for the whole of Ireland in the five years, 1909–1913, is 74, and the deaths in each of the three preceding quarters, 46, 64, and 77.

TYPHUS.—The deaths of 8 persons were attributed to typhus, namely:—One in Belfast county borough; 3 in Dingle Union; one in Galway; 2 (belonging to Belfast county borough) in Lisburn, and one in Londonderry Union.

SMALL-POX.—No death from small-pox was registered in Ireland during the quarterly period now under review.

MEASLES.—The number of deaths from measles was 223, equal to an annual rate of 0·20 per 1,000 of the population of Ireland estimated to the middle of the year 1914. Of the total deaths there were 65 in Dublin city, and 20 in Dublin county; 14 in Tipperary N. Riding; 12 in Antrim; 37 in Armagh; 10 in Monaghan, and 15 in Galway county. In each of the three preceding quarters deaths from measles for the whole of Ireland were 243, 211, and 109, respectively.

SCARLET FEVER.—The mortality from scarlet fever was in excess of the average, the deaths numbering 138, and the average, 55. In the June quarter of 1913, the deaths from scarlet fever were 69 in number, rising to 71 in September quarter, and again rising in December quarter to 137. Of the total deaths from scarlet fever, 13 occurred in the county borough of Dublin, 31 were registered in Belfast county borough, and 42 in the county of Down, of which number 30 appertained to Belfast county borough. The deaths (138) represent an annual rate of 0·13 per 1,000 of the estimated population.

WHOOPIING-COUGH.—The total number of deaths from whooping-cough for the whole of Ireland was 189, equivalent to an annual rate of 0·17 per 1,000; this number is lower than the average by 106. In the three preceding quarters deaths from whooping-cough were 158, 122, and 119, respectively. Of the total deaths from whooping-cough 20 were registered in Dublin county borough, 10 in Wexford county, 10 in Kerry, 45 in Belfast county borough, 21 in Down county, and 17 in Galway county.

DIPHTHERIA.—There was a reduced mortality from diphtheria during the quarter, as compared with the average, the former being represented by 93 deaths, and the latter by 101. In the three quarters preceding, deaths from diphtheria were 55, 57, and 90, respectively. The deaths (93) represent a rate of 0·09 per 1,000. Of the deaths, 22 were in Dublin county borough, and 15 in Down county, 11 of the latter belonging to Belfast county borough.

DIARRHOEAL DISEASES.—The total deaths, 215, from diarrhoeal diseases include the deaths of 176 children under 2 years of age from diarrhoea and enteritis. The latter figure represents an annual rate of 7·02 per 1,000 births registered. Of the 176 deaths, 48 were recorded in Dublin county borough, 11 in Cork county and county borough, and 39 in Belfast county borough.

TUBERCULOUS DISEASE.—In the aggregate the deaths from all forms of tuberculous disease numbered 2,396, and are equal to an annual rate of 2·19 per 1,000. In the corresponding quarter of 1913, such deaths numbered 2,476, and in the March quarter of 1912, 2,520.

The following notes are selected from those returned by the Registrars as being of special interest in reference to public health:—

DUBLIN SOUTH; *Crumlin*.—A Local Government Inquiry into the housing conditions was held, and will, I trust, result in getting rid of some extremely insanitary dwellings

in the district. The Jubilee nurse is as usual a source of great help in combating serious illnesses.

MULLINGAR ; *Milltown*.—The abnormal depopulation of the district from emigration continues, and the medical officer after making a close study of the evil has found that in nine cases out of ten returned Americans constitute themselves a kind of commission agents, taking with them money from friends in America, and other inducements to get their friends at home out. This plan has superseded the old "American letter with the prepaid passage ticket," and is many times more formidable and dangerous. In this way whole families have left the district, and just the week before last a family of eleven, *i.e.*, father, mother, and nine grown-up children disappeared. Tuberculous disease nil.

DOWNPATRICK ; *Killough*.—Seven of the 30 deaths registered were due to tuberculous disease.

LISBURN ; *Drumbeg*.—Nearly one-third of the total number of deaths registered caused by tubercle.

CORROFIN ; *Corrofin*.—The members of at least four families, living widely apart, and in elevated positions, were attacked with diphtheria. No deaths from the disease so far. Origin obscure, but there is some evidence it was contracted from cats.

MIDDLETON ; *Aghada*.—I regret to state that ten new cases of tuberculous disease came under my notice during the past quarter. In three cases there was hereditary predisposition, in the other cases the disease appears to have been acquired owing to lowered constitutional resistance. It is regrettable to state that in this district, where poverty is practically unknown, the milk supply is most unsatisfactory.

MITCHELSTOWN ; *Kildorrery*.—To completely wipe out tubercular disease will be an impossibility as long as persons who are beyond the curative stage are allowed to roam around and visit the houses of their neighbours, sit and chat with them, spit on the floor, smoke their pipe, &c. To obviate all this, such persons should be put under proper restraint, compulsorily, in an institution such as a workhouse which may have been closed, and one or two such could be spared in each county.

CLONAKILTY ; *Timoleague*.—There were three deaths during quarter from tubercular disease of the lungs, aged 20, 26, and 27 years. Each case had a marked family predisposition to this disease.

LIMERICK ; *Caherconlish*.—No infectious disease of any kind except tuberculosis. One death registered from this never-failing calamity. One case sent to Peamount Sanatorium—a young man, and father of a family. He lived here in a wretched house, being unable to get a cottage. Had he a good warm house, well-ventilated, I am sure he never would have got this disease.

MONAGHAN ; *Castleshane*.—There were 10 cases of diphtheria, all arising from one family. Four died without any medical attendance.

CANCER.—The deaths of 874 persons were ascribed to cancer. This number equals an annual death-rate of 0·80 per 1,000, as compared with 0·77, 0·84, and 0·86 in each of the three preceding quarters.

VIOLENCE.—Under the head of violence (including accident or negligence homicide, and suicide) 220 deaths were recorded.

The Registrars, in their Notes, report the presence of the following diseases:—Enteric fever in 20 districts, typhus in 3, measles in 49, scarlet fever in 40, whooping-cough in 30, diphtheria in 18, influenza in 29, mumps in 12, German measles in 6, chicken pox in 3, cerebro-spinal fever in one, and poliomyelitis in 5. [See Appendix to this Report commencing on page 65.]

INQUESTS.—There were 462 inquests reported to the Registrars during the quarter; this number being equal to one in every 44 of the total deaths registered.

In Leinster there was one inquest to every 35 deaths registered, in Munster one to 60, in Ulster one to 40, and in Connaught one to 102.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 20,462 deaths registered, 4,223, or 20·6 per cent., occurred in public institutions. In Leinster the percentage was 28·5, in Munster 23·2, in Ulster 15·5, and in Connaught 12·6.

UNCERTIFIED DEATHS.—According to the returns, 4,723 of the 20,462 deaths which were registered during the quarter were uncertified, being 23 per cent. of the total. In Leinster the percentage was 16, in Munster 27, in Ulster 18, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1914, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total

TABLE.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 21·4, and the birth-rate 27·0 per 1,000 of the population ; in the remainder of the country the death-rate was 17·3 and the birth-rate 20·8 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 1·6 per 1,000 of the population ; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1914, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 28th March, 1914.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1914, there were 11,269 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 2,657 (1,606 males and 1,051 females), being 1,064 less than in the corresponding quarter of the year 1913, and 1,461 below the average number for the first quarter of the ten years 1904-1913.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1913 and 1914 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.
January,	405	319	—	86	202	178	—	24	607	497	—	110
February,	547	438	—	109	339	296	—	43	886	734	—	152
March.	1,484	849	—	635	744	577	—	167	2,228	1,426	—	802
TOTAL,	2,436	1,606	—	830	1,285	1,051	—	234	3,721	2,657*	—	1,064

* Including 1,588 emigrants to the United States of America, viz. :—264 in the month of January, 426 in February, and 898 in March. Of 1,286 steerage passengers, 280 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1913 the average price was also 6d., and in the corresponding quarter of 1904 it was 5½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 16s. per cwt. For the corresponding quarter of the year 1913 the average price was also 16s., and for the first quarter of 1904 the average price was 14s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 5d. to 2s. 10d. In the first quarter of 1913 the average prices were 4s. to 4s. 5d., and the prices for the corresponding quarter of 1904 were 3s. 7d. to 4s. 3d.

The average price per cwt. of beef at the Dublin Cattle Market was 48s. to 65s. 6d., as against 49s. to 67s. for the first quarter of 1913, the price for the first quarter of 1904 ranging from 47s. 6d. to 55s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 25s. to 32s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 77½, and the lowest 71⅙.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was 5 per cent. from 1st to 8th January; 4½ per cent. from 9th to 22nd January, and 4 per cent. from 23rd January to 31st March.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1914 was 37,976, or 1,602 below the average for the corresponding period in 1913.

The average weekly number of persons receiving out-door relief during the quarter was 38,328, being 1,543 below the average for the first quarter of 1913.

Of the persons receiving in-door relief during the first quarter of 1914, an average number of 1,642 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1913 the average weekly number was 1,659.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1914, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1909 to 1914, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the first quarter of 1914 was 29·724 inches, being 0·041 below the average for the corresponding quarter of the five years 1909–1913; the highest reading (30·651 inches) was on the 6th January at 9 P.M., wind W.N.W., and the lowest (28·066 inches) on the 22nd February at 9 A.M.

The mean temperature of the air during the quarter was 42·8°, being 1·6° above the average for the first quarter of the 5 years, 1909–1913.

The maximum temperature of the air during the quarter was 60·0° and the minimum 22·0°. The maximum heat in sun was 110·5°.

Rain or snow fell on 53 days during the quarter. The rain-fall measured 5·410 inches being 0·365 inch below the average for the first quarter of the five years, 1909–1913. The greatest monthly rainfall was in February, when 2·205 inches were registered.

January.—The mean height of the barometer during this month was 30·105 inches; the highest reading (30·651 inches) was on the 1st, at 9 A.M.; and the lowest (29·474 inches) on the 31st, at 9 A.M. The mean temperature of the air was 41·4°, the maximum registered was 55·7°, and the minimum 25·1°. The 9th was the warmest day, and the 1st the coldest night. The mean of the dry bulb was 41·3° and of the wet bulb, 39·8°. The maximum heat in the sun was 67·1°, and the minimum on the grass 18·4°. The total amount of sunshine recorded was 20·5 hours, the greatest daily amount being 5·5 hours on the 26th. The minimum on the grass was below 30° on 9 nights. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain or snow fell on 15 days. The rain-fall measured 1·290 inches; the greatest amount in 24 hours was 0·260 inches on the 17th.

February.—The mean height of the barometer during this month was 29·503 inches; the highest reading (30·026 inches) was on the 27th, at 9 P.M., and the lowest (28·066 inches) on the 22nd, at 9 A.M. The mean temperature of the air was 44·4°, the maximum registered was 57·9°, and the minimum 26·0°. The 27th was the warmest day, and the 24th the coldest night. The mean of the dry bulb was 44·5°, and of the wet bulb 43·1°. The maximum heat in sun was 97·0°, and the minimum on the grass 20·2°. The total amount of sunshine recorded was 81·6 hours, the greatest daily amount being 8·8 hours on the 27th. The minimum on the grass was below 30° on 11 nights. The maximum ozone was 0·8, the minimum 0·4, and the mean 0·6. Rain or snow fell on 18 days. The rain-fall measured 2·205 inches; the greatest amount in 24 hours was 0·500 inch on the 21st.

March.—The mean height of the barometer during this month was 29·565 inches, the highest reading (30·128 inches) was on the 16th at 9 P.M., and the lowest (28·980 inches) on the 20th, at 9 A.M. The mean temperature of the air was 42·5°; the maximum registered was 60·0°, and the minimum 22·0°. The 29th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 42·2°, and of the wet bulb 40·8°. The maximum heat in sun was 110·5°, and the minimum on the grass. The total amount of sunshine recorded was 127·2 hours, the greatest daily amount being 9·1 hours on the 29th. The minimum on the grass was below 30° on 14 nights. The maximum ozone was 0·8, the minimum 0·3, and the mean 0·6. Rain or snow fell on 20 days. The rain-fall measured 1·915 inches; the greatest amount in 24 hours was 0·220 inch on the 3rd.

METEOROLOGY.

[Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D.
F.R.S.]

The weather generally was mild, and the only frost at all severe was experienced on the first morning of January. Snow was experienced at times, but usually in rather small quantities, and at ordinary levels soon disappeared. Rain was both heavy and frequent, especially in the west and south during February and March, and, with the winds from the south and west which were so prevalent, mist and fog occurred rather frequently on the coasts.

January brought winds from between west and south-west during its first and last weeks with mild weather, but the fortnight intervening was marked by a flow of air from south-east, and a temperature below the normal. During this time the thermometer never fell to a very low figure, but the mean temperature was 3° or more below the normal. Regarding the month as a whole the mean temperature differed little from the normal, being half a degree below in the south, and a trifle above in the north. The lowest minimum readings were registered on the 1st, when the thermometer descended to 17° or 18° at several stations inland. During the period of south-easterly winds there was little rain, and although rain was of daily occurrence during the early and late days of the month, the aggregate fall was much less than the normal. The sky was rarely free from cloud, and the total duration of bright sunshine was deficient. In the northern half of the country the mean duration was less than $\frac{3}{4}$ hour per day, and in the south it only slightly exceeded an hour.

In *February* the predominating feature of the weather was the persistent southerly to south-westerly winds and the rain. Gales from some southerly point of the compass were very frequent on the south-western and western coasts, and the force of the wind over the country generally was stronger than usual. Rain fell on no less than twenty-five days over practically the whole country, and greatly exceeded the average. Over the northern half the aggregate fall amounted to 5.6 in., against an average of 2.8 in., and in the south, where the average is 3.1 in., the total fall was as much as 6.3 in. At some places in the south-west there was not a day without rain, and observers characterised the month as "the wettest February known," "a miserable wet month." The temperature was above the normal almost every day, the excess during the first week being more than 6° . As a whole the mean exceeded the normal by 2.6° both in the northern and southern divisions of the country. During the first week there was no reading below 32° reported, and the occasional frosts which occurred subsequently were slight. The mean temperature of the first seven days was both actually and relatively higher than at any other later period of the month. In common with nearly the whole Kingdom, Ireland received less sunshine than usual in February. Over the northern half of the country the mean daily duration was 1.6 hr.—rather more than $\frac{3}{4}$ hr. less than the average—and over the southern half the daily mean, 2.2 hr., was $\frac{1}{2}$ hr. below the normal.

March, as a whole, had a temperature about the normal, but the first two weeks, during which the wind was almost continuously from between south and west, were mild for the time of year, while the remainder of the period, when the wind was often from some point between north and west, was rather cold. No severe frost was experienced, but the latter half of the period furnished minimum temperature readings of 26° at several inland stations. Maximum readings a little below 50° were not uncommon during the colder fortnight, but by the end of the month, when the wind shifted to the southward, temperature rose quickly, and reached a higher figure than at any previous period. In the south-west the temperature on the 31st rose to a maximum of 60° or a trifle higher. The general force of the wind was rather stronger than usual, and gale force was attained on several occasions on the Atlantic seaboard, and less frequently along the eastern coast. One of the most violent gales was from the north-westward and northward, and began suddenly during the night of the 15th.

The most striking feature of the month was the *rainfall*. From whatever direction came the wind the weather was always more or less rainy, although heavy downpours measuring an inch or more in twenty-four hours were seldom experienced. With a strong south-easterly wind on the 28th, however, as much as 1·86 in. fell at Caragh Lake, and this was followed by 1·05 in. on the 29th. At some of the observing stations precipitation occurred on every day of the month, some of it coming in the form of hail, sleet, or snow. At Caragh Lake and on Valencia Island the rain which began to fall daily late in January, continued through the whole of February and March, with the result that of seventy-three days only two were entirely rainless. The rain in the east was, as usual, considerably less than in the west, and in some parts of Dublin and its vicinity it was actually a little below the normal. At Glasnevin, where the fall was among the lowest reported, the figure was only 1·82 in., or 0·23 in. below the average, while at Kingstown the total fall amounted to only 1·70 in., divided between eighteen days. At Killarney the aggregate amounted to 8·87 in., an excess on the normal of 4·20 in.

Bright sunshine differed little from the normal, but the early days were mostly very dull. Later bright intervals were frequent, and on some days the average duration was greatly exceeded.

The *mean temperature* for the quarter was above the normal by about a degree both in the north and south, but in the south the figure was $43\cdot5^{\circ}$, or $1\cdot4^{\circ}$ higher than in the north. In both districts the quarter was milder than in any corresponding period of recent years, except in 1912, when the mean for the north was $0\cdot1^{\circ}$, and that for the south $0\cdot5^{\circ}$ higher. After the very first morning, when some places reported minimum readings below 20° , sharp frost was rare. Many consecutive nights in each month passed without a reading below 32° , and when frost did occur the thermometer seldom descended below 26° .

The *rainfall* for the quarter was in excess of the normal throughout the whole country. In the northern half a measurable quantity fell on sixty-eight days, and yielded a total of 12·0 in., or 131 per cent. of the average; and in the south rain was measured on seventy-two days, giving a total of 13·8 in., or 136 per cent. of the normal. In the north 12·0 in. was a much heavier fall than during any corresponding quarter of recent years—nearly twice as large as that yielded by the dry quarter of 1911. In Ireland South the figure of 13·8 was also nearly twice that of 1911, but it was only a tenth of an inch more than during the first quarter of 1913.

The duration of *bright sunshine* was lower than that of any corresponding quarter of recent years in the north, the figure being 1·9 hr., or only 78 per cent. of the average. In the south, however, where the figure was 2·3 hr., representing 84 per cent. of the average, it was slightly more than in 1913.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 31st December, 1913, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st March, 1914: Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS, INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 31st March, 1914, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include														Inquest Cases.	Deaths in Public In- stitutions.	Number of Un- certified Deaths.	Number of successful Vaccinations in the Quarter ending 31st March, 1914.				
			Averages in the Quarters ending 31st Dec in the 10 years, 1903-1912.	Registered in the Quarter ending 31st Dec., 1913.	Averages in the Quarters ending 31st March in the 10 years, 1904-1913.	Registered in the Quarter ending 31st March, 1914.	Averages in the Quarters ending 31st March in the 10 years, 1904-1913.	Registered in the Quarter ending 31st March, 1914.	Deaths of		Deaths from																			
									Infants under 1 year of age	Persons aged 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteri- tis of Children under 2 years of age.	Diarrhoea 2 years of age and upwards.					Violence.*

[illegible]

* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispersary Districts of the same names.

formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 29 and 30 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 28th December, 1913, to 28th March, 1914. With the exception of 157 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

+ Exclusive of 4 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

+ EXCLUSIVE OF 2 ACCOUNTS IN THE ASSIGNMENT CATEGORY. COMPANY'S MAINTAINED THEM SEPARATELY.

[illegible]

† See note (†) on page 29.

[illegible]

*See note (†) on page 19.
A return was subsequently received giving the following particulars:—Births 19, deaths 24, deaths under one year one, 65 and upwards 14, one death from tuberculous disease, 2 inquests, 10 uncertified deaths, and 11 successful primary vaccinations.

*See note (†) on page 19.

*See note (†) on page 19. A return was subsequently received from 2 inquests, 10 uncertified deaths, and 11 successful primary vaccinations.

NOTE.—This table has been constructed for the years 1840 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—The district has been exceptionally free from all kinds of infectious disease for the past quarter.

CARLOW; *Bagenalstown*.—The district during the past quarter has been in a healthy condition.

CARLOW; *Fennagh and Myshall*.—Nine of the eighteen deaths registered were over 70 years of age.

CARLOW; *Leighlinbridge*.—Health of district good. Unusual wet spring.

NEW ROSS; *St. Mullins*.—A mild form of scarlatina, for which the patients did not seek medical advice, prevailed in the district, resulting in half a dozen serious cases, three of which died.

Dublin County.

DUBLIN, NORTH; *Blanchardstown and Castleknock*.—A severe epidemic of measles, with numerous cases of pneumonia, occurred in quarter.

DUBLIN, SOUTH; *Crumlin*.—There has been no decided outbreak of any particular disease during the quarter.

DUBLIN, SOUTH; *Donnybrook, No. 1*.—There has been a large epidemic of measles during past quarter.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District very healthy during quarter.

Dublin County Borough.

DUBLIN, NORTH; *Finglas and Glasnevin, part of*.—Measles prevalent.

DUBLIN, NORTH; *North City, No. 3, W*.—Measles very prevalent. Pity the schedule of infectious diseases is not uniform in the city and neighbouring districts.

DUBLIN, SOUTH; *New Kilmainham*.—The district is in a good sanitary condition. Measles was prevalent in my district during the past two months. The mortality from it was light.

Kildare County.

ATHY; *Athy, W*.—There has been an epidemic of whooping-cough in the district during the past quarter. No other infectious disease, except two cases of scarlatina.

ATHY; *Monasterevin*.—There has been a great improvement effected in the sanitary arrangement of the district, although influenza has been very rife for the past four or five months.

BALTINGLASS; *Baltinglass, No. 2*.—Two men aged 91 years died during this quarter in this district.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—Some mild cases of scarlatina. One death from acute poliomyelitis in a girl aged 21.

NAAS; *Ballymore Eustace*.—The district is healthy, except for some cases of influenza. Very low death-rate.

NAAS; *Naas and Carragh, W*.—No prevailing disease during the past quarter.

NAAS; *Newbridge*.—District healthy.

NAAS; *Robertstown and Kilmeage*.—Sanitary condition of district good.

Kilkenny County.

CALLAN; *Callan, W*.—Two deaths were caused by cancer.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—With the exception of some few cases of a mild form of influenza, the district has been free from infectious disease.

CASTLECOMER; *Ballyragget*.—The district is now in a healthy condition, but during the months of January and February tonsillitis and bronchitis were very prevalent.

KILKENNY; *Gowran*.—Sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—District in a very healthy condition.

KILKENNY; *Tullaroan*.—District healthy.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—Bronchitis was very prevalent during quarter just ended. Otherwise the district was in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemics.

King's County.

BIRR; *Frankford*.—District fairly healthy. Seven of the deaths were between 75 and 89 years. One death from phthisis.

BIRR; *Killyon*.—District very healthy.

BIRR; *Kinnitty*.—It seems to be the custom in this district to allow old people to die without medical attendance. Details of four uncertified deaths as follows:—One male child, aged 5 days, infantile convulsions; one man, aged 82 years, from asthma; one at 82 years, from diabetes; and one at 89 from senile decay. These causes of death were given by relatives of deceased.

MOUNTMELICK; *Clonygowan, No. 2*.—No epidemic. District healthy.

ROSCREA; *Roscrea, No. 2*.—Measles in district.

TULLAMORE; *Clara*.—Sanitary arrangements good.

Longford County.

BALLYMAHON; *Abbeyshrule*.—District healthy. Of the ten deaths registered six were aged respectively 69, 76, 77, 78, 79, and 82 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory. Rheumatism particularly prevalent.

GRANARD; *Ballinalee*.—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—There was an outbreak of enteric fever in the rural district, from which one of the patients succumbed.

GRANARD; *Scrabby, No. 2*.—Health of district good.

LONGFORD; *Killashee*.—Health of the district continues to be very good. Five of the nine deaths registered were of persons over 80 years of age.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 1*.—Measles and bronchitis prevalent during the months of January and February.

DROGHEDA; *Drogheda, No. 2*.—There were many cases of measles.

DUNDALK; *Barronstown*.—District is in a healthy state.

DUNDALK; *Dundalk, W.*—The general health of the district was above the average for a March quarter, there being no epidemic. Sixty-three new artisans dwellings are being completed. The drainage outfall is not satisfactory, and the urban sanitary authority have a scheme for improving it in hands.

Meath County.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DUNSHAUGHLIN; *Killeen*.—Bronchitis and measles prevalent.

KELLS; *Nobber*.—A mild type of German measles prevails in the district; otherwise it is healthy. Ten of the thirteen deaths registered reached the ripe standard of 75 years.

NAVAN; *Painestown*.—Measles of a severe type, but as yet without mortality, became epidemic in March. Otherwise the district is in a healthy condition.

TRIM; *Innfield*.—This quarter is a record one in the number of deaths registered during my twenty-three years as Registrar, being only two women, aged respectively 75 and 84 years. No other deaths occurred.

TRIM; *Summerhill*.—Influenza was prevalent in the district during the quarter; otherwise it is very healthy.

Queen's County.

ABBEYLEIX; *Durrow*.—District is in an exceptionally healthy state. Sanitation very fair.

ABBEYLEIX; *Rathdowney*.—There were ten cases of enteric fever in the district during the quarter.

MOUNTMELICK; *Clonygowan, No. 1*.—No epidemics. District healthy.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—District healthy, except for some cases of influenza.

BALLYMAHON; *Ballymore*.—Six cases of diphtheria occurred during the last month of quarter, three of whom died, but not yet registered. Owing to precautions taken, the disease has not spread, nor is it likely to spread. The first case I attended was in a dying condition when I saw him, and died the following day. One death registered from laryngeal tuberculosis.

DELVIN; *Clonmellon*.—Health of the district satisfactory.

MULLINGAR; *Castletown Geoghegan*.—The district is in a good sanitary condition.

MULLINGAR; *Killucan*.—The district is healthy.

MULLINGAR; *Milltown*.—The health of the district continues satisfactory. The abnormal depopulation of the district from emigration continues, and the medical officer after making a close study of the evil has found that in nine cases out of ten returned Americans constitute themselves a kind of commission agents, taking with them money from friends in America, and other inducements to get their friends

at home out. This plan has superseded the old "American letter with the prepaid passage ticket," and is many times more formidable and dangerous. In this way whole families have left the district, and just the week before last a family of eleven, *i.e.*, father, mother, and nine grown-up children, disappeared. Tuberculous disease and cancer nil.

MULLINGAR; *Mullingar, W.*—Health of the district good.

TULLAMORE; *Kilbeggan.*—Sanitary arrangements in general satisfactory. Continuance of immunity from tuberculous disease. One case of diphtheria occurred in district, with fatal ending, laryngeal infection being present for at least two days before treatment was administered.

Wexford County.

ENNISCORTHY; *Killann.*—Whooping-cough very prevalent, several cases of scarlatina, chicken pox, and mumps.

GOREY; *Camolin.*—The district continues healthy.

GOREY; *Killenagh and Wells.*—The district is free from infectious disease.

NEW ROSS; *Fethard, No. 1.*—Sanitary condition of the district satisfactory; no infectious disease during the quarter.

NEW ROSS; *Fethard, No. 2.*—District healthy.

NEW ROSS; *New Ross, W.*—Epidemic of mumps in the urban district during quarter. Sanitary arrangements in the district satisfactory.

WEXFORD; *Bridgetown.*—Sanitary arrangements in district improving.

Wicklow County.

BALTINGLASS; *Kiltegan.*—The health of the district is satisfactory. All deaths, excepting two, were of very old people. Two cases of diabetes mellitus are recorded, and a third, of same disease, occurred in Baltinglass Workhouse from this district.

NAAS; *Blessington.*—Several deaths occurred from bronchitis. Influenza was prevalent during the quarter.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDOWN; *Delgany.*—The health of the district is good.

RATHDRUM; *Aughrim.*—The district has been in a comparatively sanitary and healthy condition.

RATHDRUM; *Newcastle.*—Health of the district very good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Health of district fairly good; bronchial trouble prevalent.

CORROFIN; *Corrofin, W.*—The members of at least four families, living widely apart and in elevated positions, were attacked with diphtheria. No deaths from the disease so far. Origin obscure, but there is some evidence it was contracted from cats. Mild whooping-cough sporadically throughout the district. District on the whole healthy.

ENNIS; *Crusheen.*—Health of the district good.

ENNIS; *Ennis, No. 1, W.*—The district is healthy and free from epidemic.

ENNIS; *Killaniv.*—The case of typhoid was a double infection of typhoid and typhus.

ENNIS; *Newmarket.*—Health and sanitary condition of the district satisfactory.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory.

KILLADYSERT; *Labasheeda.*—The health of the district continues good.

KILRUSH; *Carrigaholt.*—Health of district good, except for a few cases of whooping-cough.

KILRUSH; *Kilkee.*—The death-rate for the quarter very low; the greater portion are of people over 65 years of age. Sanitary state of district fairly good.

KILRUSH; *Kilrush, W.*—Health of district good.

LIMERICK; *Bridgetown.*—The sanitary condition of the district good. No occurrence of any case of infectious disease during quarter.

LIMERICK; *Coolacasey.*—The district was healthy during quarter. No case of cancer registered.

SCARRIFF; *Mountshannon, W.*—District continues in a healthy state.

SCARRIFF; *Quin.*—Sanitary arrangements good.

Cork County and County Borough.

BANDON; *Innishannon.*—The uncertified deaths were aged 86, 82, 75, (10½ hours ill); 63 years, 19¾ hours ill, and bedridden, 16 years. District free from infectious disease and in fair sanitary condition.

BANTRY; *Bantry, W.*—Sanitary condition of the district is fairly good.

BANTRY; *Durrus and Kilcrohane.*—The sanitary arrangements are pretty good, with the exception of the village of Durrus.

BANTRY; *Glengarriff.*—District free from infectious and contagious diseases; a few isolated cases of varicella. Five of the twelve deaths registered were of old age pensioners. One case of tuberculosis contracted outside the district.

BANTRY; *Kealkill.*—District healthy.

CLONAKILTY; *Timoleague.*—There were three deaths during quarter from tubercular disease of the lungs, aged 20, 26, and 27 years. Each case had a marked family predisposition to this disease.

CORK; *Carrigaline, No. 1.*—District healthy.

CORK; *Carrigaline, No. 2.*—Since last report there has been a small outbreak of scarlet fever (four cases) in the district; otherwise the condition is good.

CORK; *Douglas.*—A new system of sewerage having been latterly effected is already having a good effect on the health of the district.

CORK; *Dripsey.*—District healthy and free from any zymotic disease. Sanitary condition good.

CORK; *Queenstown, No. 2.*—This district is free from zymotic diseases.

DUNMANWAY; *Coolmountain.*—District exceedingly healthy; no infectious diseases.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues satisfactory. Two deaths were registered as being due to cancer and

three to pulmonary tuberculosis. There was no case of infectious disease reported. Of the deaths registered ten were over 65 years.

KANTURK; *Milford*.—There were two cases of enteric fever. The district otherwise is healthy. Sanitary condition fairly good.

KILMALLOCK; *Charleville*.—The district is fairly healthy. There has been an epidemic of influenza amongst children.

KINSALE; *Ballyfeard*.—Health of district during quarter good.

KINSALE; *Courceys*.—District in a fairly good sanitary state.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—The district is in a healthy state.

MALLOW; *Rahan*.—There were many cases of influenza during the first half of the quarter.

MIDDLETON; *Aghada*.—I regret to state that ten new cases of tuberculous disease came under my notice during the past quarter. In three cases there was hereditary predisposition. In the other cases the disease appears to have been acquired owing to lowered constitutional resistance. It is regrettable to state that in this district, where poverty is practically unknown, the milk supply is most unsatisfactory.

MIDDLETON; *Cloyne*.—Epidemics of mumps, chicken pox, and some cases of scarlatina prevalent during the quarter.

MIDDLETON; *Middleton, No. 2*.—The health of the district has been very good during the quarter.

MILLSTREET; *Cullen*.—Measles was prevalent. Weather at present very wet and inclement.

MILLSTREET; *Millstreet, W*.—The difference in the percentage of uncertified deaths in England and Ireland is due to the fact that in England if a certificate of the cause of death is not produced to the cemetery authority the body will not be received. In Ireland a certificate is not required.

MITCHELSTOWN; *Kildorrery*.—To completely wipe out tubercular disease will be an impossibility as long as persons who are beyond the curative stage are allowed to roam around and visit the houses of their neighbours, sit and chat with them, spit on the floor, smoke their pipe, &c. To obviate all this, such persons should be put under proper restraint, compulsorily, in an institution, such as a workhouse which may have been closed, and one or two such could be spared in each county.

SKIBBEREEN; *Dromdaleague*.—Some cases of scarlatina occurred in the district.

SKIBBEREEN; *Unionhall*.—District healthy; large death-rate for quarter accounted for by severe weather conditions and old age, ages of eighteen out of thirty-two deaths being over 65 years.

SKULL; *Skull, W*.—The health of the district has been very good.

Kerry County.

CAHERSIVEEN; *Caher, W*.—Sanitary condition of district good.

CAHERSIVEEN; *Emlagh*.—Health of district good; great improvement as regards sanitation and ventilation.

CAHERSIVEEN; *Glanbehy*.—District healthy.

CAHERSIVEEN; *Valentia*.—The sanitary arrangements in this district are good, and the district is free from any of the diseases named in the abstracts.

DINGLE; *Anascaul*.—District healthy, except for ringworm and scabies.

DINGLE; *Dingle, W*.—Six cases of typhus reported since November last from rural portion of district, and three cases of typhoid fever from western end of town of Dingle. All patients removed to hospital and progressing favourably. District otherwise healthy.

KENMARE; *Kenmare, W*.—District healthy.

KENMARE; *Kilgarvan*.—District healthy.

KENMARE; *Tuosist*.—District healthy.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killarney, No. 1, W*.—Measles prevailed in part of district.

KILLARNEY; *Killarney, No. 2*.—Measles present in district.

KILLARNEY; *Killorglin*.—Mild epidemic of scarlet fever. Sanitation improving, but still bad, especially in western part of district.

KILLARNEY; *Malahiffe*.—The district is in a satisfactory sanitary condition.

LISTOWEL; *Ballyduff*.—Out of the sixteen deaths registered five were due to phthisis pulmonalis.

LISTOWEL; *Ballyhorgan*.—The district is in a healthy condition, and free from infectious disease, with the exception of a few mild cases of whooping-cough.

LISTOWEL; *Listowel, W*.—Health of district satisfactory; no case of epidemic disease.

LISTOWEL; *Tarbert*.—Only one death registered from tuberculosis during quarter.

TRALEE; *Castleisland*.—Death of a centenarian aged 102 years recorded.

TRALEE; *Castlemaine*.—District healthy.

TRALEE; *Kilgobban*.—District healthy.

TRALEE; *Tralee, No. 1, W*.—Whooping-cough prevalent in district during this quarter.

TRALEE; *Tralee, No. 2*.—A severe epidemic of whooping-cough prevails in the district, causing seven deaths registered in quarter. Measles caused eight deaths in corresponding quarter of last year. The deaths in both epidemics were mainly due to the secondary complication of broncho-pneumonia, and the incidence of this complication was much greater and more virulent in damp insanitary dwellings. There have been two deaths less from tuberculosis than in quarter ending 31st March, 1913.

Limerick County and County Borough.

KILMALLOCK; *Bruff*.—District healthy. Sanitary condition fairly good.

KILMALLOCK; *Bruree*.—One case of puerperal scarlatina; patient recovered. District was free from any disease during the quarter.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W*.—District healthy; no epidemic disease.

LIMERICK; *Annacotty*.—Sanitary arrangements good; district healthy.

LIMERICK; *Caherconlish*.—Sanitary condition of district good. No infectious disease of any kind, except tuberculosis. One death registered from this never-failing calamity. One case sent to Peamount Sanatorium, a young man and a father of a family. He lived here in a wretched house, being unable to get a cottage. Had he a good warm house well ventilated, I am sure he never would have got this disease. One death from cancer.

LIMERICK; *Clarina*.—District in rather healthy condition.

LIMERICK; *Limerick, No. 3*.—There has been no zymotic disease prevalent in district during quarter. Bronchitis and broncho-pneumonia have been rather prevalent. Five deaths from broncho-pneumonia, four from bronchitis, one from pertussis, one from measles, and two deaths from pernicious anæmia were registered. The health of the district has been fairly good, only for the prevalence of bronchial colds. The sanitary arrangements are fairly good.

LIMERICK; *Moroe*.—District generally healthy. A few cases of measles and one case of typhoid treated. One death from pulmonary tuberculosis.

LISTOWEL; *Glin*.—There was one case of enteric fever during the quarter just ended. Influenza was very rife, and several persons were attacked by it and its usual complications, bronchitis and pneumonia.

MITCHELSTOWN; *Galbally*.—A few isolated cases of measles.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair. No epidemic, except one case of scarlatina in the eastern part of district of a mild form.

NEWCASTLE; *Feenagh*.—The health of the district has been good during the past quarter.

RATHKEALE; *Askeaton*.—During the past quarter this district was entirely free from all epidemic and contagious diseases.

RATHKEALE; *Pallaskenry*.—The harsh, dry, easterly winds which prevailed during early portion of the month of January caused influenza to take a fatal type, attacking principally the gastro-intestinal and pulmonary systems.

RATHKEALE; *Rathkeale, No. 1, W*.—The public health of the district very satisfactory. Two deaths from tuberculosis.

RATHKEALE; *Rathkeale, No. 2*.—At the present there is an epidemic of pertussis in the Croagh part of my district. Otherwise the district was in a very healthy condition during the quarter.

TIPPERARY; *Grean*.—Three cases of enteric fever and two of diphtheria occurred during the quarter, all of which had a favourable termination.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W*.—Two of the uncertified deaths were of a husband and wife, aged 98 and 101 years, respectively, both dying within three days of each other.

BORRISOKANE; *CloghJordan*.—District healthy.

BORRISOKANE; *Terryglass*.—Sanitary arrangements very good. District generally healthy.

NENAGH; *Nenagh, W*.—Measles was very prevalent for the past month or so; some children died as a result of complications.

NENAGH; *Newport*.—District healthy.

NENAGH; *Portroe*.—The district is in a healthy condition.

NENAGH; *Toomyvara*.—The health of the district is good.

THURLES; *Borrisoleigh*.—Measles and whooping-cough were prevalent during the quarter.

THURLES; *Thurles, W*.—Four cases of enteric fever occurred during quarter.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district during the quarter ended has been good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good; no epidemic disease prevalent during quarter. One death registered from cancer and one from tuberculosis.

CARRICK-ON-SUIR; *Garrangibbon*.—Some cases of enteric fever, also of scarlet fever.

CASHEL; *Kilpatrick*.—A few cases of German measles occurred during last month of quarter. District otherwise healthy.

CLOGHEEN; *Cahir*.—No cases of an epidemic character occurred during the past quarter.

CLONMEL; *Kilsheelan, No. 1*.—Six cases of scarlet fever; several cases of influenza.

TIPPERARY; *Cappagh*.—Measles prevalent.

TIPPERARY; *Golden*.—There were three cases of enteric fever in the district during the quarter.

URLINGFORD; *Kilcooly*.—The district has been healthy during the past quarter. Sanitary arrangements good.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—There were two cases of diphtheria during the past quarter. Some few cases of influenza have also been under treatment; otherwise the district is fairly healthy.

CLONMEL; *Ballymacarbry*.—Sanitary arrangements very fair; no infection.

CLONMEL; *Kilsheelan, No. 2*.—Some cases of influenza.

DUNGARVAN; *Dungarvan, W*.—District healthy during past quarter.

LISMORE; *Tallow*.—District free from zymotic diseases.

WATERFORD; *Kilmeadan*.—During the past quarter the health of the district was good. Towards end of quarter there was a large number of cases of influenza of a severe type.

WATERFORD; *Waterford, Rural, No. 1*.—Health of district good.

WATERFORD; *Waterford, Urban, No. 1, W*.—Health of district good. Sanitary condition of district generally improving.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Clashmore*.—One certified death from pulmonary tuberculosis of fourteen days, duration in woman 65 years old.

III. PROVINCE OF ULSTER.**Antrim County.**

ANTRIM; *Doagh*.—There were several cases of mild scarlatina during the quarter, also a few of diphtheria.

ANTRIM; *Randalstown*.—Three cases of scarlet fever reported during the quarter; source of infection could not be traced.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Influenza prevalent during the quarter. Nine cases of scarlatina, two of diphtheria, one of membranous croup, and two of erysipelas notified.

BALLYCASTLE; *Ballycastle, W.*—Scarlet fever was prevalent during quarter. District otherwise healthy.

BALLYCASTLE; *Croagh*.—There has been an epidemic of scarlatina in one side of district, with two deaths. It seems to be subsiding now.

BALLYCASTLE; *Cushendall*.—Not a single case of infectious disease in the district during the quarter. Only one case of pulmonary phthisis.

BALLYMENA; *Ahoghill*.—No epidemic disease at present. District healthy.

BALLYMENA; *Ballymena, W.*—Public health satisfactory.

BALLYMENA; *Broughshane*.—Health of the district is good.

BALLYMENA; *Clogh*.—The health of this district has been very fair during this quarter. Sanitary arrangements good.

BALLYMENA; *Galgorm*.—Sanitary condition of the district is good. One death of a person in 98th year registered.

BALLYMENA; *Glenwhirry*.—Sanitary condition of district very fair. No epidemics. Public health good. Death-rate extremely low.

BALLYMENA; *Portglenone*.—Health of this district is good.

BALLYMENA; *Toome*.—One death from scarlet fever. Health of the district satisfactory.

BALLYMONEY; *Ballymoney, W.*—One death from acute anterior myelitis.

BALLYMONEY; *Castlequarter*.—One case of infantile paralysis. Death occurred in forty-eight hours from onset of symptoms.

BALLYMONEY; *Dirraw*.—During past quarter I had an epidemic of poliomyelitis; seven cases; one death in past quarter and one in quarter ending 31st December. No cases appeared since end of January.

BELFAST; *Belfast, Rural, No. 4*.—The health of the district has been generally good for the quarter. The death-rate is unusually high, but almost forty per cent. of the deaths registered are of persons 65 years of age or upwards. The sanitary conditions are comparatively good, and are yearly improving. German measles was epidemic, but there were no fatalities.

LARNE; *Ballycarry*.—Sanitation of district fairly good. An extensive outbreak of Rôtheln has occurred in district during quarter; it originated amongst school children, and in some schools attendance was so low that schools were closed. No deaths from the disease.

LARNE; *Waterfoot*.—The district is in a very healthy condition.

LISBURN; *Dunmurry*.—A very general epidemic of measles prevailed in the district during the past quarter, causing two deaths. Scarlet fever was also prevalent.

LISBURN; *Glenavy*.—Health of the district generally satisfactory. One case of diphtheria during the quarter.

LISBURN; *Lisburn, W.*—Measles very prevalent during the quarter, causing nine deaths due to lung complications.

Armagh County.

ARMAGH; *Blackwatertown*.—There has been an epidemic of measles, and one death, due to it.

ARMAGH; *Keady*.—There is an epidemic of measles in the district at present.

ARMAGH; *Markethill*.—Scarlet fever has been epidemic in the district during the quarter. Measles was prevalent in the district adjoining Armagh.

ARMAGH; *Richhill*.—There was a widespread epidemic of measles during earlier part of quarter.

ARMAGH; *Tynan*.—The health of the district satisfactory.

BANBRIDGE; *Tanderagee*.—Twenty-two cases of scarlatina reported.

CASTLEBLAYNEY; *Newtownhamilton, No. 1*.—Measles is prevalent for the last month in part of the district, also parotitis.

LURGAN; *Lurgan, No. 1, W.*—A few cases of scarlet fever occurred in the urban district during the month of March, but the spread of the disease is, I hope, checked. Measles broke out in several families in the John Street quarter of the town about the same time, and two deaths have been registered.

LURGAN; *Lurgan, No. 2*.—District in fairly good, healthy condition.

NEWRY; *Meigh*.—Scarlet fever prevalent; no deaths.

Belfast County Borough.

BELFAST; *Belfast, Urban, No. 3*.—One death, of a person who was admitted to hospital from County Donegal, was registered as "cerebro-spinal meningitis."

BELFAST; *Belfast, Urban, No. 6*.—Public health good. No epidemic of disease.

BELFAST; *Belfast, Urban, No. 11*.—Whooping-cough and bronchitis prevalent among young children. There have been some cases of diphtheria and scarlatina.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in a healthy condition.

BAILIEBOROUGH; *Shercock*.—One death occurred during quarter at the patriarchal age of 105 years, which I believe to be correct, as he always stated he was five years old when the battle of Waterloo took place.

BAWNBOY; *Swanlinbar*.—Measles and scabies epidemic in this district.

CAVAN; *Belturbet*.—Influenza and pneumonia prevalent during quarter. There were some cases of typhoid fever during January and February, confined to urban area.

CAVAN; *Killashandra*.—Ten deaths of persons over 65 years were registered during the quarter. District healthy; no epidemics. One death caused by a train knocking down a girl walking on the line to her home.

CAVAN; *Kilnaleck*.—Mumps prevalent in district.

ENNISKILLEN; *Dowra*.—Typhoid fever has been prevalent during quarter.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good.

GRANARD; *Scrubby, No. 1*.—Health of the district good. No cases of infectious nature.

OLDCASTLE; *Ballyjamesduff*.—Influenza prevalent. Otherwise district healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary arrangements fairly good. Only one of the three deaths registered as dying from tuberculous disease had medical attendance.

DONEGAL; *Donegal, W*.—Parotitis prevalent during the quarter. District otherwise healthy.

DONEGAL; *Dunkineely*.—Whooping-cough of severe type prevalent, and with bronchitis in many of the cases.

DONEGAL; *Laghy*.—District healthy.

DONEGAL; *Mountcharles*.—District fairly healthy. No outbreak of any infectious disease.

DONEGAL; *Pettigoe*.—The district is healthy and free from epidemics.

DUNFANAGHY; *Crossroads*.—District healthy, and free from any form of epidemic during the quarter.

DUNFANAGHY; *Dunfanaghy, W*.—Acute bronchitis and lobar pneumonia were very prevalent during the quarter. The ages of the fifteen persons aged 65 years and upwards, were respectively:—65, 71, 72, 74, 75 (2), 76, 78 (2), 79 (2), 80, 82, 86 and 87 years. During February the rainfall measured 7.55 inches. From January 24th to March 19th (55 days) 13.77 inches of rain fell, with only four rainless days.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Carrick*.—District healthy.

GLENTIES; *Doocharry*.—Only one case of infectious disease during quarter.

GLENTIES; *Dunglow, No. 1*.—There was an epidemic of measles; it caused no death.

GLENTIES; *Dunglow, No. 2*.—There was one death from drowning during the quarter. There has been no epidemic during the past three months. Sanitation fair.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Carndonagh, W*.—Influenza has been very prevalent during the quarter.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—There were two cases of diphtheria. District otherwise healthy.

LETTERKENNY; *Church Hill*.—There was an epidemic of measles during quarter, but only one death resulted therefrom. District healthy.

LETTERKENNY; *Manorcunningham*.—The health of this district is good.

LONDONDERRY; *Killea*.—Various forms of chest affections very prevalent during quarter.

MILLFORD; *Fanad*.—Health of district good during past quarter. Exceptionally little sickness for this time of year.

MILLFORD; *Rathmullan*.—District healthy during quarter.

MILLFORD; *Rosguill*.—Severe epidemic of measles prevalent; also a few cases of mumps.

STRABANE; *Raphoe*.—Measles prevalent. Sanitation continues fairly good.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. Most of the deaths registered were at an advanced age.

STRANORLAR; *Killygordon*.—District healthy during quarter, and remarkably little illness, having regard to the severity of the time.

Down County.

DOWNPATRICK; *Ballynahinch*.—There has been a very extensive epidemic of whooping-cough in the district during the quarter. Also a large number of cases of influenza, with some cases of diphtheria and scarlet fever.

DOWNPATRICK; *Downpatrick, W*.—Had much influenza with complications. There is now some whooping-cough. Measles and scarlet fever have abated.

DOWNPATRICK; *Killough*.—Seven of the thirty deaths registered were due to tuberculous disease.

DOWNPATRICK; *Killyleagh*.—The public health is good. There has been no epidemic. The death-rate is low.

DOWNPATRICK; *Portaferry*.—Ten cases of scarlet fever occurred during quarter, one of which was sent to union hospital. Influenza very prevalent.

LISBURN; *Annahilt*.—Sanitary arrangements in the district are good.

LISBURN; *Ballylesson*.—None of the acute infectious fevers occurred in the district.

LISBURN; *Drumbeg*.—Births about the average. Number of deaths greatly exceed the average, constituting a record for the district. Nearly one-third of the total number of deaths registered caused by tubercle. Measles and whooping-cough very prevalent during the quarter.

LISBURN; *Saintfield*.—No epidemic; no infectious disease. Seven out of eight deaths were of persons aged 65 years and upwards. No children died.

LURGAN; *Moir*.—The case of diphtheria was removed to hospital and cured, but, being a weakly child, afterwards succumbed to the subsequent paralysis. Both the cases of carcinoma were of the stomach following long-continued ulceration.

LURGAN; *Waringstown*.—District healthy.

NEWRY; *Donaghmore*.—Sanitation good.

NEWRY; *Rathfryland*.—The sanitary condition of the district is improving.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Public health good. No epidemic.

NEWTOWNARDS; *Comber*.—There has been a fairly severe epidemic of scarlatina, but fortunately of short duration, and is now happily stamped out;

no cases for three weeks, and all removed to hospital. We had measles very severe before that, but now district is free from any infectious disease.

NEWTOWNARDS; *Kilmood*.—District at present free from infectious disease.

NEWTOWNARDS; *Newtownards, W.*—Pertussis has been very prevalent, but the epidemic seems now to have exhausted itself. There has been a number of cases of scarlet fever in the district. The disease has been of a mild form. Most of the cases were removed to hospital and disinfection carefully carried out. In other respects the health of the district has been good.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

CLONES; *Newtown Butler*.—There has been much illness amongst children.

ENNISKILLEN; *Ely*.—The sanitary arrangements in the district are good.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly satisfactory.

ENNISKILLEN; *Florencecourt*.—Measles prevalent during quarter.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary arrangements of the district as a whole are fairly good.

IRVINESTOWN; *Clonelly*.—Health of the district fairly good.

IRVINESTOWN; *Ederney*.—One death registered at 93 years.

IRVINESTOWN; *Irvinestown, W.*—A severe epidemic of acute anterior poliomyelitis occurred during quarter. I had thirty-two cases. Four proved fatal from respiratory paralysis. As many as four children in one family were attacked. Some still remain paralysed. Otherwise district was healthy.

LISNASKEA; *Derrylin*.—Epidemics of influenza, with pneumonia also. Measles and typhoid fever have been in the district during the quarter.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. Death-rate very low during quarter. Majority of deaths were of persons aged 65 years and upwards, one reaching the very advanced age of 113 years.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—An epidemic of scarlet fever occurred during the quarter. Otherwise the district was healthy.

COLERAINE; *Garvagh*.—Two cases of scarlatina occurred during quarter, but does not appear to spread. Also a few cases of mumps. Otherwise the district has been healthy.

COLERAINE; *Kilrea*.—District healthy at present. Mumps was prevalent during the quarter.

COLERAINE; *Portstewart*.—The general health of the district is good, and the majority of deaths registered have been those of people aged 65 years and upwards.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—Epidemic of measles.

LIMAVADY; *Limavady, W.*—Health of district good.

LONDONDERRY; *Eglinton*.—No family history in case of cancer.

MAGHERAFELT; *Maghera*.—No infectious diseases in district during quarter. Owing to the large number of old people who died there was an unusual number uncertified.

MAGHERAFELT; *Moneymore*.—At the beginning of January three children in one family were affected with scarlatina, were isolated, and no further spread of disease. Towards the end of same month three children and the mother were infected in another family having no connection with the first; also one case occurred in a family—next neighbour—all removed to hospital, disinfectants used, and no further extension of the disease. Otherwise district has been healthy for the season.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition. An outbreak of typhus fever having occurred in Greaghlonge portion of district, all patients were removed to fever hospital, where they made excellent recoveries.

CARRICKMACROSS; *Raferagh*.—There were a few cases of diphtheria in the district during past quarter.

CASTLEBLAYNEY; *Ballybay*.—The percentage of uncertified deaths is unusually high. More than half the deaths were of old people not medically attended.

CASTLEBLAYNEY; *Castleblayney, W.*—An epidemic of measles, of a very severe type, occurred in this district during the quarter. There were numerous cases of influenza, and some sporadic cases of enteric fever. The death-rate was unusually high.

CASTLEBLAYNEY; *Newtownhamilton, No. 2*.—Measles is prevalent in this district; also parotitis.

COOTEHILL; *Dawsongrove*.—Sanitary condition of the district is good, with the exception of one village.

MONAGHAN; *Castleshane*.—District sanitary. There were ten cases of diphtheria, all arising from one family. Four died without any medical attendance.

MONAGHAN; *Emyvale*.—Health of district very good; no epidemics.

MONAGHAN; *Kilmore*.—District healthy. A few cases of influenza, generally of the gastro-intestinal type, during the quarter. Also a few cases of German measles.

MONAGHAN; *Monaghan, W.*—I have to report that there is as yet no improvement in the sanitary arrangements of this district so far as the town of Monaghan is concerned. I am pleased, however, to state that levels are now being taken to carry out a new sewage scheme.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—District healthy.

CASTLEDERG; *Drumquin*.—The sanitary condition of the district is satisfactory. None of the infectious diseases mentioned in the abstracts present, with the exception of two cases of scarlatina, one of which was sent to hospital, and the other isolated; both recovered without any further spread of the disease.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter. There was not as much influenza as is usual at this period of the year.

COOKSTOWN; *Coagh*.—Health of district good.

COOKSTOWN; *Cookstown, W.*—Epidemics of scarlatina and mumps.

COOKSTOWN; *Stewartstown*.—There were two deaths from poliomyelitis. There was a number of scarlatina cases, and also measles. No deaths from them this quarter. Otherwise the district has been healthy.

DUNGANNON; *Benburb*.—Sanitary condition of district good. Pneumonia prevalent.

DUNGANNON; *Caledon and Ballymagran*.—Health of community particularly good.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good. No infectious diseases.

DUNGANNON; *Coal Island*.—There were three cases of scarlatina of a mild type during quarter; all recovered. District has been, in other respects healthy.

IRVINESTOWN; *Trillick*.—A sewerage system is badly required in the village of Trillick.

OMAGH; *Dromore*.—Health of district generally good. Some cases of influenza occurred.

OMAGH; *Drumquin*.—The health of the district generally good. Sanitary condition only fair. An outbreak of diphtheria apparently is threatened.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Sanitary condition:—urban, fair; rural, unsatisfactory. Two deaths registered from enteric fever occurred in asylum.

OMAGH; *Omagh, No. 2*.—District healthy and in fairly good sanitary condition.

OMAGH; *Sixmilecross*.—We have had an epidemic of scarlatina during the quarter. The sanitary condition of the district is very good at present; the houses are kept much cleaner than heretofore.

STRABANE; *Dunnamanagh*.—There has been quite an epidemic of congestion of the lungs in the district during this quarter.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Lawrencetown*.—The general health of the district is good.

CLIFDEN; *Inishbofin*.—A general epidemic of measles appeared in January, and continued all through the quarter, owing partly to the fact that this disease had not been in the district for over forty years. There were no deaths from it.

CLIFDEN; *Roundstone, No. 1*.—Mumps, measles, and whooping-cough existed during the quarter. No deaths therefrom.

GALWAY; *Galway, No. 3 (Arran)*.—District healthy.

GALWAY; *Moycullen*.—Whooping-cough of a mild form was prevalent during the quarter.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Turloughmore*.—Sanitation fair. Influenza prevalent.

GORT; *Ardrahan*.—Whooping-cough, measles, and influenza present in district during quarter.

GORT; *Kinvarra*.—The two fatal cases of whooping-cough were not medically attended. A widespread epidemic of infectious diseases (measles and whooping-cough, with their pulmonary complications) amongst children prevailed.

LOUGHREA; *Bullaun*.—The ages of those comprising ten uncertified deaths were 75, 78, 84, 85, 86, 87, 84, 85, 89, and 95 years.

OUGHTERARD; *Cloonbur, No. 1*.—Measles very prevalent.

OUGHTERARD; *Lettermore*.—Whooping-cough is prevalent in this district.

PORTUMNA; *Portumna, No. 1, W.*—The sanitary arrangements are fairly good.

TUAM; *Tuam, No. 1, W.*—Health of district good during the quarter, with the exception of ordinary winter cough. Some cases of bronchitis.

TUAM; *Tuam, No. 2*.—Two deaths from measles and three from whooping-cough. The epidemic is now over, except some cases of whooping-cough in Kilgevrin portion of district.

Leitrim County.

BALLYSHANNON; *Kinlough*.—Deaths and births equal. No deaths from cancer; one from tuberculosis.

BAWNBOY; *Ballinamore*.—The death of a centenarian has been registered. Measles of a mild type prevailed over the district.

CARRICK-ON-SHANNON; *Jamestown, W.*—Scarlet fever in district in beginning of quarter.

MANORHAMILTON; *Manorhamilton, W.*—There was an epidemic of measles in part of the district, with a few cases of scarlatina.

MOHILL; *Carrigallen*.—The health of the district has been good during the quarter.

MOHILL; *Mohill, W.*—The sanitary condition of the district fairly good. Whooping-cough very prevalent, but no deaths occurred from same.

MOHILL; *Rinn*.—The district is healthy, and free from epidemics. Sanitary condition fair.

MOHILL; *Rowan*.—The district is in a healthy state. There have been some cases of whooping-cough.

Mayo County.

BALLINA; *Ballina, W.*—Health of the district good.

BALLINA; *Crossmolina*.—District continues in fair sanitary condition. No infectious disease during quarter.

BALLINROBE; *Ballinrobe, W.*—Some cases of diphtheria and measles occurred during the quarter. Epidemic of whooping-cough and influenza.

BALLINROBE; *Cappaghduff*.—A large number of young and old suffering from influenza, which, however, is on the decline. Sanitary arrangements fair; most of the people are now living in their new houses.

BALLINROBE; *Cong.*—Measles still prevalent in parts of district. Of the fifteen deaths registered, three were over 90 years, one having reached the age of 99; four were between 80 and 90; and four were between 70 and 80 years.

BALLINROBE; *Hollymount*.—Epidemic of whooping cough, and some cases of measles. Births and deaths are under the average. The weather was for the most part wet, cold, and stormy. The general health of the people was fairly good.

BELMULLET; *Binghamstown, W.*—State of district healthy.

BELMULLET; *Knocknalower*.—District in a healthy condition.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 2*.—The sanitary arrangements and the state of the district are fairly good, and improving considerably.

CLAREMORRIS; *Ballindine*.—Whooping-cough prevalent, and a mild epidemic of measles.

CLAREMORRIS; *Ballyhaunis*.—Health of district exceptionally good. Death-rate unusually low. No zymotics. One case of epithelioma of tongue and throat. Sanitation progressive; much improvement observable in the structure and maintenance of the poorer dwellings.

KILLALA; *Killala, W.*—Three patients suffering from typhoid, and one case of diphtheria, were admitted to hospital. Six cases of scarlatina were reported.

SWINEFORD; *Swineford, W.*—The health of district has been fairly good during past quarter.

WESTPORT; *Achill*.—General health of district is good, save for presence of ringworm, also of skin disease, which is now disappearing.

WESTPORT; *Ballycroy*.—Weather extremely bad. Influenza very prevalent, accompanied, in many cases, by pneumonia, and frequently followed by neuritis (principally musculo-spiral).

WESTPORT *Islandeady*.—Sanitary arrangements of district good. A few cases of diphtheria were reported.

WESTPORT; *Newport*.—District in a fairly healthy condition.

Roscommon County.

ATHLONE; *Brideswell*.—District continues healthy.

ATHLONE; *Kiltoom*.—Sanitary condition of district average. Two deaths from pulmonary tuberculosis and one from meningitis.

BOYLE; *Boyle, No. 1, W.*—There were a few cases of enteric fever and scarlatina, but no epidemic during the past quarter.

CARRICK-ON-SHANNON; *• Aughrim*.—The sanitary condition of the district is good.

CASTLEREAGH; *Ballaghaderreen*.—Sanitary arrangements in district fairly good; whooping-cough prevalent.

CASTLEREAGH; *Loughglynn*.—The past quarter has been healthy, except for the aged. Sanitation improving.

ROSCOMMON; *Roscommon, W.*—District healthy.

STROKESTOWN; *Elphin*.—There was an epidemic of whooping-cough during the quarter. The district is otherwise very healthy and the sanitary arrangements much improved.

STROKESTOWN; *Roosky*.—The death-rate for the quarter is very low. Nearly all the deaths registered were of persons varying in age from 67 to 95 years. One death from tuberculosis of hip. District healthy.

STROKESTOWN; *Strokestown, W.*—The greater number of deaths registered is of persons aged 65 years and upwards.

Sligo County.

BOYLE; *Gurteen*.—Whooping-cough prevalent during past quarter; otherwise district very healthy. The sanitary condition of the district has improved greatly within the past few years, and it still continues to improve.

DROMORE, WEST; *Easky, W.*—Health of district good.

DROMORE, WEST; *Skreen*.—No epidemics during quarter; sanitation of district good.

SLIGO; *Carney, No. 1*.—Sanitary condition of district fairly good.

SLIGO; *Collooney*.—Some cases of pertussis of a mild type during quarter.

SLIGO; *Riverstown*.—One case of diphtheria and one of enteric fever. District healthy.

TOBERCURREY; *Aclare*.—Sanitary arrangements improving. Three cases of typhoid and one of diphtheria occurred during the quarter.

TOBERCURREY; *Coolaney*.—Sanitation good; health of district generally good.

TOBERCURREY; *Tobercurry, W.*—The district generally is in good sanitary condition, with the exception of the town where there are a few cases of typhoid.

1914.]
2nd Quarter.

[No. 202.]

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

Price One Shilling.

Marriages:—JANUARY, FEBRUARY, MARCH, 1914.

Births and Deaths:—APRIL, MAY, JUNE, 1914.

During the quarter ended 30th June last, there were registered in the 831 Registrars' Districts in Ireland 26,112 births—a number equal to an annual birth-rate of 23·9 in every 1,000 of the estimated population*—and 18,485 deaths, representing an annual rate of 16·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 10,252 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·2 in every 1,000 of the estimated population, and the death-rate 13·3 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 below the average rate for the corresponding quarter of the ten years, 1904–1913, and 0·4 below the rate for the second quarter of 1913. The deaths are 1,467 below those registered in the corresponding quarter of 1913; the death-rate is 1·3 below the rate for that quarter, and 1·1 below the average for the second quarter of the ten years, 1904–1913.

In comparison with those for the corresponding quarter of 1913, the returns of pauperism furnished by the Local Government Board show a decrease of 1,270 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 641 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years, 1904–1913, the number of Workhouse inmates shows a decrease of 6,004, and the number of persons on out-door relief shows a decrease of 13,773, the total under both heads being 21·2 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·2 per cent.

* See page 138.

The annual marriage-rate (6·3 per 1,000 of the population) represented by the marriages registered during the first quarter of 1914, is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

bics

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st March, 1914, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1914.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

MARRIAGES.

The Marriages (6,922) registered in Ireland during the first quarter of 1914 are equivalent to an annual rate of 6·3 per 1,000 of the estimated population, being 1·0 above the rate for the corresponding quarter of 1913, and 0·2 above the average rate for the first quarter of the ten years 1904–1913. Of the total number of marriages, 5,545 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,377 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·8 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·2 above, and that under the latter heading equal to the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1904–1913, and the average number for that period, also the number registered in the first quarter of 1914.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,112—13,361 boys and 12,751 girls—being equal to an annual ratio of 1 in every 41.9, or 23.9 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1904–13, was 26,787, equivalent to an annual rate of 24.4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24.1 per 1,000 of the population according to the Census of 1911; Munster, 22.9; Ulster, 24.6; and Connaught, 22.7.

The highest county or county borough birth-rate* is 32.0 for Dublin county borough, and the lowest 18.7 for Tipperary north riding. Of the intermediate rates the highest five are—Belfast county borough, 28.8; Limerick county and county borough, 25.8; Londonderry county and county borough, 24.8; Clare, 24.7, and Down, 24.5. The lowest five are—Dublin county, 19.1; Longford, 19.2; Carlow, 19.5; Meath, 19.9; and Monaghan, 20.3.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 18,485—9,323 males and 9,162 females—affording an annual ratio of 1 in every 59.3, or 16.9 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1904–13, was 18.0 per 1,000.

The death-rate in Leinster was 18.5 per 1,000 of the population according to the Census of 1911; in Munster, 15.9; in Ulster, 17.2; and in Connaught, 14.5.

The county or county borough death-rates* range from 12.4 in Kerry to 25.2 in Dublin county borough. Between these rates the lowest five are—Mayo, 13.6; Cavan, 13.9; Wicklow, 14.0; Leitrim, 14.1; and Clare, 14.4; and the highest five are—Monaghan, 20.2; Fermanagh, 19.0; Waterford county and county borough, 18.7; Armagh, 18.4; and Limerick county and county borough, 18.3.

* See note (*) on page 76.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1904–1913, and the average number for that period; also the number registered during the first and second quarters of the year 1914 :—

AGES.—Of the 18,485 deaths registered last quarter, 2,089, or 11·3 per cent., were of infants under one year of age; and 7,340, or 39·7 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 80·6 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 12·6 per cent. of the total deaths registered therein; in Munster, 10·5 per cent.; in Ulster, 11·6 per cent.; and in Connaught, 8·6 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 33·6 per cent.; in Munster, to 42·8 per cent.; in Ulster, to 39·0 per cent.; and in Connaught, to 51·0 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,100, and is equivalent to an annual rate of 1·00 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the June quarter of 1914, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1909–1913.

Name of Disease.	Number of Deaths in June quarter, 1914.	Average number of Deaths in June quarter of the 5 years, 1909–1913.
Enteric Fever,	57	58
Typhus,	12	15
Small-pox,	—	—
Measles,	452	219
Scarle Fever,	93	55
Whooping-cough,	187	273
Diphtheria,	65	76

* See note (†) on page 8°.

ENTERIC FEVER.—The number of deaths from this disease was 57; in the three preceding quarters such deaths numbered 64, 77 and 59 respectively, the average for the second quarter of the past 5 years being 58 deaths. Of the 57 deaths registered during the quarter, 4 deaths occurred in each of the following unions:—Ballina, Cork and Omagh, 3 in each of the unions of Belfast, Dublin North, and Dublin South; and 2 in each of the unions of Dingle, Dundalk, Dungannon, Listowel, Newtownards, Rathdown and Tobercurry.

TYPHUS.—Twelve deaths from typhus were recorded, as against an average of 15 for the second quarter of the five years, 1909-13, the deaths from this cause registered in the three quarters, ending with the 31st March last, numbering 13, 6 and 8 respectively. Of the 12 deaths, 4 (all appertaining to Belfast county borough) were registered in Lisburn union, and one death in each of the following unions:—Belfast, Cork, Galway, Kilrush, Limerick, Newry, Scariff and Westport.

SMALL-POX.—No death from this disease was recorded during the quarter just ended.

MEASLES.—To measles 452 deaths were attributed, being equivalent to an annual rate of 0·41 per 1,000 of the estimated population. In the three preceding quarters, deaths from this disease numbered 211, 109 and 223, respectively, the average for the second quarter of the five years, 1909-1913, being 219. Of the 452 deaths, 289 (or 64 per cent.) occurred in the unions of Dublin North and Dublin South, combined, 38 in Belfast union, and 13 in Sligo.

SCARLET FEVER.—There were 93 deaths from scarlet fever, affording an annual rate of 0·08 per 1,000 of the estimated population.

In the three quarters preceding, the deaths were 71, 137 and 138 respectively.

In Lisburn union, 31 deaths (30 belonging to Belfast county borough) were registered during the past quarter; in Belfast, 17; in Dublin South, 5; in Lurgan, 4; in Dublin North, 3, and in Newtownards, 3.

The deaths (93) from scarlet fever during the quarter just ended are 38 above the average for the second quarter of the past five years.

WHOOPING-COUGH.—The number of deaths from this cause was 187, being equivalent to an annual rate of 0·17 per 1,000 of the estimated population. As compared with the average number for the corresponding quarter of the past five years, namely, 273 deaths, there is a decline of 86 deaths from this cause. In the three quarters ending with 31st March last, deaths from whooping-cough were 122, 119 and 189, respectively. During the quarter under notice the deaths in Belfast union numbered 67; in Cork, 22; in Dublin North, 14; and in Enniscorthy, 12.

DIPHTHERIA.—Deaths from diphtheria which in the three preceding quarters numbered 57, 90 and 93, respectively, were 65 in the quarter under notice, as against an average of 76 for the second quarter of the five years, 1909-13.

Of the 65 deaths, 9 were in Dublin South union, 8 in Dublin North, 6 in Lisburn union (4 belonging to Belfast county borough), 4 in Lurgan, and 3 deaths each in Ballymahon, Belfast and Clones unions.

DIARRHOEAL DISEASES.—Of 223 deaths from these causes, 185 were deaths of children under 2 years of age, the latter being equivalent to 7·08 per 1,000 births registered.

Forty-two of the 185 deaths were recorded in Belfast union, 29 in Dublin South, 23 in Dublin North, and 13 in Cork.

TUBERCULOUS DISEASE.—The deaths returned under this heading amounted to 2,506, affording an annual rate of 2·29 per 1,000 of the estimated population.

In the second quarter of 1913 such deaths numbered 2,694, the number returned by the registrars for the corresponding quarter of 1912 being 2,664.

The following notes have been selected as containing special reference to matters regarding the public health:—

WATERFORD ; *Ullid.*—The one case of tuberculosis registered does not represent the amount existing.

BIRR ; *Frankford.*—The dwellings of the poor people of this district are not good in some instances.

KELLS ; *Nobber.*—Remarkable longevity. Of the 11 deaths returned, the average age is 76·6 years. They range from 65 to 91 years.

BALLYMAHON ; *Ballymore.*—Total absence of pulmonary tuberculosis.

LIMERICK ; *Caherconlish.*—Two deaths registered from pulmonary tuberculosis. I am now trying to get a grocer's assistant sent to a sanatorium. He contracted the disease in Dublin. His parents here at home are quite healthy.

RATHKEALE ; *Pallaskenry.*—Of two cases of pulmonary tuberculosis, one contracted the disease in Limerick City, and came back to the country to die amongst the friends.

NEWRY ; *Mountnorris.*—The housing of the poorer people has greatly improved in the past few years, but the traditional fear of fresh air in the house persists.

CAVAN ; *Killashandra.*—A child of 8 years who had been drinking water from a pump, in which for months were visible numbers of small red worms. This child vomited 28 worms, and passed 4 per rectum. The unsanitary state of this water has been frequently reported by me.

DOWNPATRICK ; *Downpatrick.*—The drinking water in the rural parts of district is becoming scarce. I find it difficult to induce the sanitary authority to take the necessary steps as to conserving the water, and preventing contamination in the country parts.

DOWNPATRICK ; *Killyleagh.*—The death-rate is low, but the number of deaths (6) from all forms of tuberculous disease is large in proportion to the deaths registered.

LISBURN ; *Ballylesson.*—The housing accommodation for the farm labouring community is inadequate.

NEWRY ; *Donaghmore.*—Labourers' cottages are badly needed.

LISBURN ; *Saintfield.*—Tuberculous diseases on increase.

BALLINROBE ; *Cappaghduff.*—Tuberculous disease prevalent in the district.

CLAREMORRIS ; *Claremorris.*—The health of the district is good ; and owing to the operations and example set by the Congested Districts Board, a great improvement in the housing of the people is noticeable.

CANCER.—The number of deaths from this cause, as returned by the Registrars, was 869, affording an annual ratio of 0·79 per 1,000 of the estimated population. The corresponding rates for the three preceding quarters were 0·84, 0·86 and 0·80, respectively.

VIOLENCE.—According to the returns furnished by the Registrars, the deaths from violence (including accident or negligence, homicide and suicide) numbered 196.

The Registrars, in their Notes, report the presence of the following diseases:—Enteric fever in 13 districts, typhus in 2, measles in 40, scarlet fever in 41, whooping-cough in 25, diphtheria in 11, influenza in 17, mumps in 7, German measles in 2, chicken pox in 2, and poliomyelitis in one. [See Appendix to this Report commencing on page 139.]

INQUESTS.—There were 413 inquests reported to the Registrars during the quarter; this number being equal to one in every 45 of the total deaths registered.

In Leinster there was one inquest to every 46 deaths registered, in Munster one to 47, in Ulster one to 37, and in Connaught one to 96.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 18,485 deaths registered, 4,027, or 21·8 per cent., occurred in public institutions. In Leinster the percentage was 29·9, in Munster 25·7, in Ulster 15·6, and in Connaught 14·0.

UNCERTIFIED DEATHS.—According to the returns, 4,059 of the 18,485 deaths which were registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 26, in Ulster 17, and in Connaught the uncertified deaths were 46 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1914, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population.

[TABLE.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 19.0, and the birth-rate 27.7 per 1,000 of the population ; in the remainder of the country the death-rate was 15.8 and the birth-rate 21.9 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 2.0 per 1,000 of the population ; in the remainder of the country the rate was 0.5 per 1,000.

TABLE V.—BIRTHS AND DEATHS REGISTERED DURING THE SECOND QUARTER of the year 1914, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 27th June, 1914.

(a) Including the deaths of 4 persons from typhus, 30 from scarlet fever, 4 from diphtheria, and 2 from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, the Registrar's District of Ballylesson, and Union of Lisburn.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

* The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1914.

4

URBAN DISTRICTS—continued.

REGISTRATION, SECOND QUARTER, 1914.

DEATHS.

PROVINCES AND URBAN DISTRICTS.		CENSUS STATISTICS OF DISTRICTS IN 1911.		Annual Rate per 1,000 persons represented by		BIRTHS.		Caused by										No. of Deaths in Public Institutions.		No. of Uncertified Deaths.				
				DEATHS.		Total Number.	From all Causes.	From Diseases in cols. 10 to 17.	At 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery. VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1914, there were 21,904 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 10,252 (5,153 males and 5,099 females), being 4,896 less than in the corresponding quarter of the year 1913, and 4,080 below the average number for the second quarter of the ten years 1904–1913.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1913 and 1914:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.
April, .	3,407	2,509	—	898	2,764	2,635	—	129	6,171	5,144	—	1,027
May, .	3,366	1,875	—	1,491	2,703	1,773	—	930	6,069	3,648	—	2,421
June, .	1,649	769	—	880	1,259	691	—	568	2,908	1,460	—	1,448
TOTAL,	8,422	5,153	—	3,269	6,726	5,099	—	1,627	15,148	10,252*	—	4,896

* Including 8,037 emigrants to the United States of America, viz.:—4,299 in the month of April, 2,831 in May, and 907 in June. Of 7,311 steerage passengers, 2,405 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1913 the average price was also 6d., and in the corresponding quarter of 1904 it was 5½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 16s. per cwt. For the corresponding quarter of the year 1913 the average price was also 16s., and for the second quarter of 1904 the average price was 14s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 10d. to 3s. 7d. In the second quarter of 1913 the average prices were 4s. 8d. to 5s., and the prices for the corresponding quarter of 1904 were 4s. 7d. to 5s. 6d.

The average price per cwt. of beef at the Dublin Cattle Market was 48s. 0d. to 64s. 0d., as against 49s. to 72s. for the second quarter of 1913, the price for the second quarter of 1904 ranging from 52s. 6d. to 61s. 0d.

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 23s. to 25s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 76½, and the lowest 73⅝.

The minimum annual rate of discount charged during the quarter on Irish bills at the Bank of Ireland was 4 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1914 was 35,490 or 1,270 below the average for the corresponding period in 1913.

The average weekly number of persons receiving out-door relief during the quarter was 37,855, being 641 below the average for the second quarter of 1913.

Of the persons receiving in-door relief during the second quarter of 1914, an average number of 1,690 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1913 the average weekly number was 1,640.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1914, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NO. OF PERSONS RELIEVED.			
									Out-door,			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total Out-door.

(a) Messrs. Bolands, Limited.
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1909 to 1914, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 88).

The mean height of the barometer during the second quarter of 1914 was 30·077 inches, being 0·233 above the average for the corresponding quarter of the five years 1909–1913; the highest reading (30·595 inches) was on the 25th April at 9 P.M., and the lowest (29·263 inches) on the 7th April at 9 A.M.

The mean temperature of the air during the quarter was 50·5°, being 0·1° above the average for the second quarter of the 5 years, 1909–1913.

The maximum temperature of the air during the quarter was 75·8° and the minimum 27·1°. The maximum heat in sun was 132·0°.

Rain or snow fell on 32 days during the quarter. The rain-fall measured 4·170 inches being 2·484 inches below the average for the second quarter of the five years, 1909–1913. The greatest monthly rainfall was in May, when 2·110 inches were registered.

April.—The mean height of the barometer during this month was 30·026 inches; the highest reading (30·595 inches) was on the 25th, at 9 P.M.; and the lowest (29·263 inches) on the 7th, at 9 A.M. The mean temperature of the air was 45·9°, the maximum registered was 65·8°, and the minimum 27·1°. The 27th was the warmest day, and the 16th the coldest night. The mean of the dry bulb was 47·6° and of the wet bulb 46·0°. The maximum heat in the sun was 119·5°, and the minimum on the grass 22·0°. The total amount of sunshine recorded was 237·8 hours, the greatest daily amount being 12·9 hours on the 17th. The minimum on the grass was below 30° on 12 nights. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·6. Rain or snow fell on 10 days. The rain-fall measured 0·925 inch; the greatest amount in 24 hours was 0·260 inch on the 3rd.

May.—The mean height of the barometer during this month was 30·101 inches; the highest reading (30·485 inches) was on the 19th, at 9 A.M., and the lowest (29·407 inches) on the 6th, at 9 P.M. The mean temperature of the air was 50·0°, the maximum registered was 69·7°, and the minimum 28·4°. The 21st was the warmest day, and the 25th the coldest night. The mean of the dry bulb was 50·6°, and of the wet bulb 48·6°. The maximum heat in sun was 129·0°, and the minimum on the grass 21·0°. The total amount of sunshine recorded was 152·9 hours, the greatest daily amount being 13·2 hours on the 27th. The minimum on the grass was below 30° on 4 nights. The maximum ozone was 0·8, the minimum 0·3, and the mean 0·6. Rain or snow fell on 15 days. The rain-fall measured 2·110 inches; the greatest amount in 24 hours was 0·430 inch on the 22nd.

June.—The mean height of the barometer during this month was 30·103 inches, the highest reading (30·417 inches) was on the 25th at 9 P.M., and the lowest (29·740 inches) on the 7th, at 9 P.M. The mean temperature of the air was 55·5°; the maximum registered was 75·8°, and the minimum 34·9°. The 30th was the warmest day, and the 1st the coldest night. The mean of the dry bulb was 56·0°, and of the wet bulb 53·1°. The maximum heat in sun was 132·0°, and the minimum on the grass 29·9°. The total amount of sunshine recorded was 193·8 hours, the greatest daily amount being 14·4 hours on the 15th. The minimum on the grass was below 30° on one night. The maximum ozone was 0·7, the minimum 0·4, and the mean 0·5. Rain fell on 7 days. The rain-fall measured 1·135 inches; the greatest amount in 24 hours was 0·470 inch on the 20th.

METEOROLOGY.

[Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D.,
Sc.D., F.R.S.]

The weather of the quarter generally was unusually dry, and rather warm and sunny for the time of year. Although the drougthy condition that began in April continued more or less throughout the period the amount of sunshine was often very deficient. The excess during April, however, was very large, and counterbalanced the relative dulness of the following months.

APRIL.—Until the 14th the wind current was from the south-westward and southward, and often strong, not infrequently attaining the force of a gale. The generally wet weather which had been such a characteristic of the two months preceding continued with this wind current, although very heavy falls of rain were rare. At Caragh Lake the 82 days ending on the 14th were all more or less rainy, and the aggregate amount during that period was as high as 36·43 ins., giving a mean of little more than 0·44 in. per day. The subsequent distribution of barometric pressure was, however, entirely different, being mostly anticyclonic, and the winds were either light and variable or from some point between north and west, and except on the 22nd to 24th, when the condition became temporarily cyclonic and the wind west to south-west, the weather was dry. The *total rainfall* for the month was *less than the average*, the difference being 0·25 in. in the north and 1·0 in. in the south.

Temperature was seldom at all low for the time of year, and the mean for the month exceeded the normal by at least $2\frac{1}{2}^{\circ}$. The warmest period was the third week, when the thermometer rose to above 70° and the mean temperature ranged from 5° to 6° above the average. Very slight frost occurred at night here and there inland, but as a rule the minimum temperature was rather high.

Bright Sunshine was generally above the normal, even during the unsettled, rainy part of the month, and for the whole period there was an excess equal to nearly two hours per day in the north, and about $2\frac{1}{4}$ hours in the south. During a considerable portion of the period the mean daily excess was as large as 3 hours.

MAY.—The general character of the weather resembled that of April in the small amount of rainfall, but there was much less sunshine, and the *temperature was relatively lower*. During the first fortnight the temperature diverged little from the normal, but the third week was warm, and the fourth cold, the final result of the warm and cold periods being that the mean for the month was nearly a degree below the average in the north, and almost identical with the normal in the south. The low temperature of the last week accompanied a northerly wind current that set in rather suddenly on the 23rd. Night frosts occurred from time to time in various inland districts, and in some cases were severe enough to cause injury to tender vegetation.

The aggregate *Rainfall* was *less than during April*, and nearly all of it fell before the 12th, with a cyclonic pressure distribution and winds between south-west and west or north-west. From that date dry weather was almost continuous, although it was seldom very bright. At Ballinacurra, Co. Cork, the only rain after the 14th was 0·16 in. on the 22nd. In the north the total rainfall was 0·51 in. less than the normal, and in the south 0·92 in. less.

The only week with a *sunshine* record above the average was from the 10th to the 16th, and the *number of hours of bright sunshine* for the month was *much lower* than for April. In the northern division the mean daily amount was 4·9 hours, or 1·2 hr. below the normal; and in the south 4·8 hours, or 1·7 hr. in defect, whereas in April the daily means were 6·6 hours and 7·8 hours respectively.

JUNE.—Until the 14th the wind came continuously from the northward or north-westward, with a *temperature below the normal*, and but little sunshine. Subsequently the northerly breeze gave place to light, variable airs or calms, alternating with light or moderate breezes from west or south-west, while the temperature became higher and the sky less cloudy.

Over the country generally the temperature was just equal to the average, being 0.7° below it in the north and 0.7° above it in the south. Only *one really warm period* was experienced, and that occurred about the middle of the month. The rise of temperature was felt in all localities, and at Killarney on the 15th the thermometer touched 80° .

The most marked feature of the month was, as in May, the *small rainfall*. Over the country generally rain fell on only 12 or 13 days, and usually in very small amounts. The only notable exception was at Castle Forbes, Longford, where there was a downpour of 1.52 in. on the 17th. At Roche's Point, in the far south, the total fall for the month was no more than 25 per cent. of the average. In the northern districts the aggregate fall was 1.59 in., a deficit of 1.03 in., and in the south the aggregate of 1.06 in. was 1.42 in. below the normal.

The latter half of the month was much brighter than the earlier in all parts of the country, but in the north the total number of hours of *Bright Sunshine* was only equal to 5.2 hours per day, or 0.5 hr. per day less than the normal. In the south, however, the daily mean was 6.7 hours, equal to an excess of 0.5 hr. per day. No part of the country was so bright as during April; even in the south the daily mean sunshine was 1.1 hr. less than in that month.

THE QUARTER.—The *mean temperature* for the quarter was 2° higher in the south than in the north, but in both divisions there was *an excess*, that in the south being 1.2° and that in the north 0.6° . The temperature of the corresponding quarter of last year was rather more than a degree below the normal, but the corresponding figures for the quarter in 1911 were practically the same.

The *Rainfall* of the quarter was the *lowest for many years* throughout the country. In the north there was only 5.7 in., or 75 per cent. of the average, and in the south 4.3 in., or 56 per cent. of the normal. The corresponding quarter of last year was extremely wet, yielding 10.6 in. in the north and 11.6 in. in the south, while the preceding quarter in the present year yielded as much as 12.0 in. and 13.8 in. in the respective districts. A dry period was consequently very much needed, but after the first few droughty weeks the absence of rain was much felt by agriculturists in certain districts.

Bright Sunshine exceeded the normal over the country generally, but the excess was mainly due to the unusual brightness of April. During a very large portion of the quarter the sunshine was deficient in the north, and the total number of hours, equal to 5.5 hours per day, was a mere trifle above the normal. The south was, however, generally brighter, and the total number of hours, represented by a daily mean of 6.5 hours, was 109 per cent. of the average. Both districts were much more sunny than during the corresponding quarter of last year, and the daily mean of 6.5 hours in the south was the highest in that region for many years.

ABSTRACTS I., II., III., IV.

MARRIAGES Registered during the Quarter ending 31st March, 1914, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th June, 1914; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA and ENTERITIS of CHILDREN under 2 years, DIARRHŒA of PERSONS aged 2 years and upwards; also VIOLENT DEATHS, INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 30th June, 1914, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names recorded under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 103 and 104 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 20th March, 1914, to 27th June, 1914. With the exception of 153 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

+ Exclusive of 11 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

NOTE.—This table has been constructed for the years 1840 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—This district has been exceptionally free from all kinds of infectious disease for the past quarter.

CARLOW; *Bagenalstown*.—Influenza of a mild form was prevalent during the quarter—otherwise the district is healthy.

CARLOW; *Fennagh and Myshall*.—There was an outbreak of scarlet fever at the end of the quarter.

CARLOW; *Leighlinbridge*.—Health of district fairly good. Frost at night during May; Sunday night, 20th May, 4 degrees registered in sheltered situations. Potatoes and trees killed. Wind most in the north. Very little rainfall.

NEW ROSS; *St. Mullins*.—A large number of cases of epidemic catarrh or mild influenza. Several cases of jaundice also occurred almost simultaneously. Sanitation improved in a few places in the district.

Dublin County.

BALROTHERY; *Kilsallaghan*.—Health of district good and free from infectious diseases with the exception of one case of scarlatina which occurred during quarter.

BALROTHERY; *Lusk*.—District very healthy except for tuberculous disease.

BALROTHERY; *Swords*.—An epidemic of measles occurred at the beginning of the quarter, and the disease is still very prevalent.

CELBRIDGE; *Rathcoole*.—District healthy.

DUBLIN SOUTH; *Crumlin*.—Were it not for a small outbreak of measles during the past few weeks the health of the district has been normal during the past three months.

DUBLIN SOUTH.—*Clondalkin*.—Four cases of scarlatina and one of enteric fever.

Dublin County Borough.

DUBLIN SOUTH; *New Kilmainham*.—The sanitary arrangement of the district is in very good order.

Kildare County.

EDENDERRY; *Carbury*.—Health of district good.

NAAS; *Ballymore-Eustace*.—The death-rate for the quarter is very low. District healthy.

NAAS; *Naas and Carragh W.*—No prevailing disease in this district during the past quarter.

NAAS; *Robertstown and Kilmeague*.—Sanitary condition of district good.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—District in a very healthy condition at present.

CASTLECOMER; *Castlecomer, W.*—There was an epidemic of scarlatina in the district during the quarter. I am happy to say there was no fatal case.

KILKENNY; *Gowran*.—Sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—District in a healthy condition. There were two cases of diphtheria during May.

KILKENNY; *Tullaroan*.—Health of the district good.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

WATERFORD; *Ullid*.—Influenza of a severe bronchial type was very fatal to old people attacked. The one case of tuberculosis registered does not represent the amount existing.

King's County.

BIRR; *Killyon*.—I think it remarkable to have 11 births take place in the quarter and no death.

BIRR; *Kinnitty*.—District healthy.

MOUNTMELICK; *Clonygowan No. 2*.—District fairly healthy. No epidemics.

ROSCREA; *Shinrone*.—No death from tuberculosis this quarter.

TULLAMORE; *Clara*.—Sanitary arrangements good.

TULLAMORE; *Philipstown*.—District healthy.

TULLAMORE; *Tullamore W.*—District free from epidemic diseases during quarter.

Longford County.

BALLYMAHON; *Abbeyskrule*.—Scarlet fever has been prevalent in the district lately.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—I beg to state that the district is healthy and free from contagious disease. The death of one person is registered at 100 years.

GRANARD; *Granard, W.*—I beg to state that the district is healthy and free from contagious disease.

GRANARD; *Scrubby No. 2*.—District healthy. Only three deaths have been recorded.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon No. 1*. District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda No. 2*.—The district is healthy.

DUNDALK; *Barronstown*.—District in healthy state.

DUNDALK; *Dromiskin*.—District in healthy state.

Meath County.

ARDEE; *Collon No. 2*.—District in a very healthy state.

ARDEE; *Drumcondra*.—District very healthy.

DROGHEDA; *St. Mary's*.—The sanitary state of the district is good.

DUNSHAUGHLIN; *Killeen*.—Sanitary arrangements satisfactory. There has been a severe epidemic of measles and gastro duodenitis during the quarter with no deaths. Two cases of diphtheria and one death of acute anterior poliomyelitis.

EDENDERRY; *Ballyboggan*.—It is noteworthy that four out of the seven deaths were uncertified, no medical attendant being requisitioned.

KELLS; *Moyalty*.—No. deaths from tuberculosis. District free from zymotic disease.

KELLS; *Nobber*.—District still holds its normal character of health. No infectious disease within its limits. Measles dying out. No fatality. Remarkable longevity—of the 11 deaths returned the average age is 76.6 years. They range from 65 to 91 years.

NAVAN; *Painestown*.—Measles was epidemic in portion of district at beginning of quarter, but has since subsided.

OLDCASTLE; *Oldcastle, W.*—District continues healthy.

TRIM; *Athboy*.—Sanitary state of district is satisfactory.

TRIM; *Summerhill*.—There was an outbreak of measles in the district during the quarter.

TRIM; *Trim W.*—Six death from measles were registered.

Queen's County.

ABBEYLEIX; *Durrow*.—District in a very healthy state and free from infectious diseases.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements of district good.

CARLOW; *Ballickmoyler and Newtown*.—One case of cancer of hand registered during quarter.

MOUNTMELICK; *Clonaslee*.—District very healthy.

MOUNTMELICK; *Clonygowan No. 1*.—The district is fairly healthy. No epidemics.

MOUNTMELICK; *Mountmellick, W.*—Sanitary arrangements of the district in good condition.

MOUNTMELICK; *Mountrath*.—District healthy.

ROSCREA; *Borris-in-Ossory*.—The health of district has been good during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—Death of one person aged 99 years. Sanitation of district very good.

BALLYMAHON; *Ballymore*.—District healthy during quarter. Total absence of pulmonary tuberculosis.

DELVIN; *Clonmellon*.—Measles prevalent during first two months of quarter.

MULLINGAR; *Ballynacarrigy*.—Of those deaths registered during the quarter under 65 years almost 50 per cent. were due to pulmonary tuberculosis.

MULLINGAR; *Castletown-Geoghegan*.—The sanitary state of the district very good. One isolated case of measles during the quarter.

MULLINGAR; *Killucan*.—The district is fairly healthy.

MULLINGAR; *Milltown*.—Emigration has shown no comparative signs of improvement during the months of April and May. During the quarter there were no deaths registered from cancer, or tuberculous disease, and all the deaths registered were of old people. Sanitary arrangements satisfactory. Zymotic diseases nil.

MULLINGAR; *Mullingar, W.*—Health of district good.

TULLAMORE; *Kilbeggan*.—The hot weather recently prevalent has caused many cases of epidemic diarrhoea and gastritis, none of which have terminated fatally. Pulmonary tuberculosis is still absent in the district; the cases of tuberculosis reported—one in a child who developed the disease after a severe attack of measles some months previously, the other a middle-aged woman, were both due to previous lowering of vitality.

Wexford County.

GOREY; *Camolin*.—District continues healthy.

GOREY; *Killenagh and Wells*.—An epidemic of whooping-cough prevailed during the quarter.

NEW ROSS; *Fethard No. 1*.—Sanitary condition of the district satisfactory. Mumps prevalent during the quarter.

NEW ROSS; *Fethard No. 2*.—District healthy.

NEW ROSS; *New Ross W*.—District in healthy state.

WEXFORD; *Bannow*.—The sanitary condition of the district is satisfactory.

WEXFORD; *Bridgetown*.—District healthy.

WEXFORD.—Crossabeg.—District healthy. |

Wicklow County.

BALTINGLASS; *Baltinglass No. 1, W*.—Prevalence of whooping-cough and measles amongst children and infants.

BALTINGLASS; *Dunlavin*.—Only one marriage registered during quarter—a record.

BALTINGLASS; *Kiltegan*.—Sanitary arrangements good. Health of district good.

NAAS; *Blessington*.—The district is in a healthy condition. No epidemic during the past quarter. Death-rate very low.

RATHDOWN; *Bray No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of district very good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Aughrim*.—District healthy during quarter.

RATHDRUM; *Newcastle*.—General health of district very good.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—Health of district good.

CORROFIN; *Corrofin, W*.—District healthy.

ENNIS; *Crusheen*.—Health of the district good.

ENNIS; *Newmarket*.—Sanitary arrangements satisfactory. Influenza, with complication of broncho-pneumonia, has been prevalent, but no deaths have occurred. There have been some cases of summer diarrhoea.

ENNISTIMON; *Ennistimon, W*.—The sanitary arrangements are satisfactory. The health of the district is good.

KILLADYSERT; *Ballynacally, W*.—A good many cases of measles have been under my observation.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—Health of the district very good.

KILRUSH; *Kilkee*.—The sanitary state of district very good.

KILRUSH; *Kilrush, W*.—District healthy.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is satisfactory.

SCARRIFF; *Kilkishen*.—Three cases of typhus fever occurred in one family. Five cases of the same disease came under my notice in an adjoining district previously, but the connection, if any, could not be satisfactorily made out.

SCARRIFF; *Mountshannon, W*.—One death from typhus occurred in district during quarter in Union Hospital, otherwise district healthy.

SCARRIFF; *Quin*.—Health of the district good.

Oork County and County Borough.

BANDON; *Innishannon*.—District healthy. Sanitation fair. One death from phthisis. Age of one of the deceased was 95 years, and one given as 75—this latter was at least 84 years.

BANTRY; *Bantry, W*.—The health of the district is good.

BANTRY; *Durrus and Kilcrohane*.—The district is healthy.

BANTRY; *Glengarriff*.—District very healthy. Of the 5 deaths registered during quarter ended, only one calls for particular notice. Five years ago she returned from America, having met with an accident on a trolley car. She has been confined to bed ever since in a half-asleep and awake condition. Had to be roused to take her meals. Seemed not to know any of her relations or neighbours.

BANTRY; *Kealkill*.—District healthy. Sanitary condition good.

CASTLETOWN; *Kilcatherine*.—Whooping-cough prevalent. District otherwise healthy.

CORK; *Blarney*.—With the exception of one case of diphtheria, which was removed to hospital, there was no case of infectious disease in the district during the quarter.

CORK; *Carrigaline No. 1*.—The district is very healthy.

CORK; *Carrigaline No. 2*.—Two cases of scarlet fever, and one of erysipelas, since last report. Otherwise district healthy.

CORK; *Douglas*.—The village and surrounding districts have been completely sewered. Electric lighting and complete foot-pathing in concrete introduced, must have good and lasting effects on the health of the neighbourhood.

CORK; *Dripsey*.—The sanitary condition of the district is good. No zymotic disease. There were eight people who were over 70 years, and some over 80 years died during the quarter.

CORK; *Queenstown, No. 2*.—Whooping-cough prevalent in district.

CORK; *Riverstown*.—There was an epidemic of whooping-cough during the quarter.

CORK; *Whitechurch*.—A good many cases of whooping-cough.

DUNMANWAY; *Coolmountain*.—The health of this district is excellent. Of the eleven deaths registered, eight were primarily due to senile conditions. The registered ages of nine deaths are—110, 90, 83, 78, 77, 76, 75, 74, and 68. One death was due to cancer, and one due to tuberculosis. One case of scarlet fever occurred during the quarter, and one fresh case of phthisis came under my notice.

DUNMANWAY; *Dunmanway, W.*—The sanitary arrangements in the district continue fairly satisfactory. Fifteen of the deaths registered were over 65 years. There were two deaths due to cancer.

KANTURK; *Milford*.—The district is healthy.

KILMALLOCK; *Charleville*.—The district is healthy.

KINSALE; *Ballyfeard*.—General health of district good. One case of cancer of pylorus resulting in death took place. Two premature deaths of infants registered.

KINSALE; *Courceys*.—District very healthy.

MACROOM; *Slieveveagh*.—There were no deaths from any of the diseases mentioned in the abstracts during the quarter. One case of scarlatina occurred in the district during the quarter. The sanitary arrangements are fairly satisfactory.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Health and sanitary state of district satisfactory.

MALLOW; *Rahan*.—District healthy, and free from all infectious diseases.

SKIBBEREEN; *Dromaleague*.—Scarlet fever prevalent during past quarter.

SKULL; *Skull, W.*—The health of the district is very good.

Kerry County.

CAHERSIVEEN; *Caher, W.*—Sanitary condition of the district good.

CAHERSIVEEN; *Emlagh*.—Health of district good. One case of typhoid fever.

CAHERSIVEEN; *Glanbehy*.—No deaths from cancer in my district. District healthy.

CAHERSIVEEN; *Valencia*.—Sanitary arrangements in this district good and free from any of the diseases mentioned in the abstracts, and from other diseases.

DINGLE; *Anascaul*.—An epidemic of pertussis of a virulent type.

DINGLE; *Castlegregory*.—There was a mild epidemic of influenza in the district and an epidemic of whooping-cough has just started.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare W.*—District healthy.

KENMARE; *Kilgarvan*.—District healthy.

KENMARE; *Tuosist*.—A few cases of mild measles reported during last month.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Molahiffe*.—Being sanitary sub-officer for the district I am pleased to be able to inform you that the district is in a satisfactory sanitary condition.

LISTOWEL; *Ballybunion*.—Scarcity of milk due to a number of creameries in the district.

LISTOWEL; *Ballyhorgan*.—District healthy.

LISTOWEL; *Ballylongford*.—One mild case of scarlatina during quarter. Six deaths from pulmonary tuberculosis. Majority of deaths registered were of persons aged 65 years and upwards. Further improvements needed as regards sanitary arrangements in town.

LISTOWEL; *Listowel, W.*—District healthy during quarter.

TRALEE; *Kilgobban*.—There was a severe epidemic of whooping-cough in the district during the quarter.

TRALEE; *Castlemaine*.—District healthy.

TRALEE; *Tralee No. 2*.—Three deaths from whooping-cough have been registered. In the corresponding period last year 7 deaths from measles were registered. Scarlatina has not been epidemic in No. 2 district for many years. There is a decrease of one in tuberculous cases registered. The eight uncertified deaths are principally due to "senile decay."

Limerick County and County Borough.

CROOM; *Castletown*.—Quarter very healthy. Some cases of mumps.

KILMALLOCK; *Bruff*.—District healthy. One case of enteric fever in the quarter.

KILMALLOCK; *Bruree*.—District healthy.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—District healthy. No epidemic disease.

LIMERICK; *Annacotty*.—Sanitary arrangements good. District healthy.

LIMERICK; *Caherconlish*.—One death from sarcoma. Sanitary arrangements fairly good. One case of typhoid fever, patient is in hospital and doing well. Two deaths registered from pulmonary tuberculosis. I am now trying to get a grocer's assistant sent to a sanatorium. He contracted the disease in Dublin. His parents here at home are quite healthy.

LIMERICK; *Clarina*.—District in a healthy condition.

LIMERICK; *Limerick No. 3*.—The health of the district was good during the quarter. There has been no epidemic, or infectious or bad disease, and the sanitary arrangements have been satisfactory.

LIMERICK; *Moroe*.—Sanitary condition of district generally good. One case of typhoid fever and two of diphtheria attended during quarter. No death from tuberculosis. One from cancer.

LISTOWEL; *Glin*.—I regret to report the prevalence of influenza complicated in most of the cases with lung and bronchial affections but am glad to add that out of the 40 cases that occurred there was only one death. The death alluded to was caused by double pneumonia.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

NEWCASTLE; *Ardagh*.—The sanitary condition of the district is pretty fair.

NEWCASTLE; *Feenagh*.—The sanitary arrangements in the district are fairly good. The health of the district has been satisfactory. There have been a number of cases of mumps (parotitis) in the district during the quarter.

RATHKEALE; *Askeaton*.—During the last quarter this district was free from all epidemic or contagious diseases. Pneumonia caused two of the deaths registered, phthisis pulmonalis one, and gangrene of leg and foot one.

RATHKEALE; *Pallaskenry*.—Influenza still prevalent, causing gastro-intestinal and pulmonary troubles. Of two cases of pulmonary tuberculosis, one contracted the disease in Limerick City and came back to the country to die amongst friends.

RATHKEALE; *Rathkeale No. 1, W.*—The district is healthy. There was one case of diphtheria which was removed to hospital and anti-toxic serum administered. One death from tuberculosis.

RATHKEALE; *Rathkeale No. 2*.—The district is healthy. There was one case of diphtheria which was removed to hospital and anti-toxic serum administered. One death from tuberculosis.

TIPPERARY; *Grean*.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *CloghJordan*.—Measles prevalent during quarter. Two isolated mild forms of scarlet fever occurred.

BORRISOKANE; *Terryglass*.—Sanitary arrangements very good, and district generally very healthy.

NENAGH; *Nenagh, W.*—A couple of cases of scarlatina have occurred during the quarter. Otherwise district healthy.

NENAGH; *Newport*.—The sanitary condition of district is fair. No case of infectious disease reported during the past quarter.

NENAGH; *Portroe*.—District healthy. Sanitary arrangements good.

NENAGH; *Silvermines*.—District healthy.

THURLES; *Thurles W.*—District healthy.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter has been very good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good. No infectious or contagious disease prevalent except influenza, which was frequently attended with lung complications. There were three deaths attributed to different forms of tuberculosis. None from cancer.

CARRICK-ON-SUIR; *Garrangibbon*.—Two cases of enteric fever. Several cases of scarlatina.

CASHEL; *Killenaule*.—An outbreak of scarlet fever occurred in one house in which nine children were affected. One died (death not yet registered). Disease did not spread beyond this family.

CASHEL; *Kilpatrick*.—District free from zymotic disease.

CLOGHEEN; *Caher*.—No cases of an epidemic character occurred during the past quarter. The district is in a most healthy state.

CLONMEL; *Kilsheelan No. 1*.—Four cases of scarlet fever.

TIPPERARY; *Cappagh*.—District is healthy.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—Sanitary arrangements good. Influenza prevalent during last month of quarter.

Waterford County and County Borough.

CARRICK - ON - SUIR; *Rathgormuck*.—District quite free from infectious disease. Sanitary arrangements of district satisfactory.

CLONMEL; *Ballymacarbry*.—Sanitary condition good. One death registered as 85 years.

CLONMEL; *Kilsheelan No. 2*.—District healthy.

DUNGARVAN; *Dungarvan, W.*—Influenza in district during past quarters.

LISMORE; *Ballyduff*.—Sanitation and general health of district satisfactory.

LISMORE; *Cappoquin*.—Two cases of scarlatina during quarter.

WATERFORD; *Kilmeadan*.—During the quarter the health of the district was very good—no epidemic diseases. Sanitary condition of district very good.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Ardmore*.—District healthy.

YOUGHAL; *Clashmore*.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.*—Health of district satisfactory.

ANTRIM; *Crumlin*.—There was an outbreak of diphtheria in Crumlin this quarter, with only one death. All the cases except the fatal one were seen early and anti-toxin given.

ANTRIM; *Doagh*.—There was a number of mild cases of scarlatina during the quarter; no deaths.

ANTRIM; *Randalstown*.—Muco-enteritis prevalent during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Scarlatina was prevalent in the eastern part of district early during the quarter. No since 8th June.

BALLYCASTLE; *Ballycastle W.*—There were five cases of diphtheria, with one death. Rötheln prevalent during quarter. Otherwise the district is in a healthy condition.

BALLYCASTLE; *Cushendall*.—No infectious or contagious diseases.

BALLYMENA; *Ballymena, W.*—Public health excellent.

BALLYMENA; *Broughshane*.—The health of the district is good.

BALLYMENA; *Clogh*.—District very healthy.

BALLYMENA; *Galgorm*.—District in a good sanitary condition. No zymotic disease.

BALLYMENA; *Glenwhirry*.—Sanitary arrangements of district very fair. No epidemics.

BALLYMENA; Portglenone.—Influenza was prevalent during the quarter.

BALLYMENA; Toome.—The district is in a good sanitary condition. No epidemic prevalent during the last quarter.

BALLYMONEY; Dervock.—Scarlatina has been epidemic in district during quarter. One of the two deaths from this disease occurred in a woman shortly after her confinement. One death was registered as "actinomycosis of lung."

BALLYMONEY; Dirraw.—The sanitary arrangements I consider good. Health of district satisfactory.

BELFAST; Belfast Rural No. 4.—Scarlatina was epidemic in the district; there was one death. Sanitary arrangements now above the average for a rural district.

LARNE; Ballycarry.—A few isolated cases of scarlet fever in district during June.

LARNE; Waterfoot.—Sanitary arrangements very good. No infectious or contagious diseases in the district.

LISBURN; Dunmurry.—The general health of the district has been excellent during the past quarter, and the amount of sickness has been distinctly under the average.

LISBURN; Glenavy.—The district is in a healthy state. No infectious diseases during the quarter.

Armagh County.

ARMAGH; Blackwatertown.—The late epidemic of measles has almost ceased.

ARMAGH; Keady.—There has been a severe epidemic of measles during the quarter. It is now abating.

ARMAGH; Markethill.—Scarlet fever is still epidemic in the district and caused one death during the quarter. Measles has also been prevalent in the district. During the hot weather in June diarrhoea has been very prevalent, and frequently affected whole families.

ARMAGH; Rich Hill.—The district has been very healthy during last three months.

ARMAGH; Tynan.—Health of the district very satisfactory.

CASTLEBLAYNEY; Newtownhamilton No. 1.—Mumps prevalent.

LURGAN; Lurgan No. 1, W.—Cases of measles have been very numerous in the urban district during the quarter.

LURGAN; Lurgan No. 2.—The district is in a good healthy condition.

NEWRY; Forkill.—District healthy.

NEWRY; Meigh.—Except for sporadic cases of scarlet fever, district healthy.

NEWRY; Mountnorris.—The housing of the poorer people has greatly improved in the past few years, but the traditional fear of fresh air in the house persists.

NEWRY; Mullaghglass.—District healthy.

Belfast County Borough.

BELFAST; Belfast Urban No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Urban No. 5.—No outbreak of cerebro-spinal fever during the quarter.

BELFAST; Belfast Urban No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; Bailieborough W.—There has been a mild epidemic of measles during the past quarter. Otherwise the district is healthy.

BAILIEBOROUGH; Kingscourt.—There has been an epidemic of measles in the district during the quarter.

BAWNBOY; Swanlinbar.—A recurrence of measles.

CAVAN; Bellanagh.—District healthy during quarter with the exception of a slight epidemic of influenza of a mild type.

CAVAN; Belturbet.—No infectious cases this quarter. Water supply poor, but district healthy.

CAVAN; Killashandra.—No case of tuberculosis. No case of cancer registered during the quarter. No epidemics. District healthy. A child of eight years had been drinking water from a pump in which for months were visible numbers of small red worms. This child vomited 28 worms and passed 4 per rectum. The unsanitary state of this water has been frequently reported by me.

ENNISKILLEN; Dowra.—The sanitary condition of the district is fairly good.

ENNISKILLEN; Holywell No. 2.—The sanitary arrangements in the district are fairly good. Of the three cases of deaths registered, two had arrived at 86 years, and one was a case of pulmonary tuberculosis. There was no epidemic disease.

GRANARD; Scrabby No. 1.—District healthy and free from diseases of infectious nature.

OLDCASTLE; Ballyjamesduff.—District healthy.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—The sanitary condition of district good.

DONEGAL; Donegal, W.—District healthy.

DONEGAL; Dunkineely.—Health of district good. No case of infectious disease at present.

DONEGAL; Laghy.—District healthy.

DONEGAL; Pettigoe.—The district is in a healthy state and free from any epidemic.

DUNFANAGHY; Crossroads.—District free from infectious disease during the quarter.

DUNFANAGHY; Dunfanaghy, W.—District healthy. Several cases of broncho-pneumonia.

GLENTIES; Ardara.—District healthy.

GLENTIES; Carrick.—Health of the district good.

GLENTIES; Dunglow No. 2.—District healthy.

INISHOWEN; Buncrana.—District healthy.

INISHOWEN; Clonmany.—District healthy.

INISHOWEN; Malin.—There was one case of scarlatina which was removed to hospital. District otherwise healthy.

LETTERKENNY; Church Hill.—District healthy. No epidemic.

LETTERKENNY; *Letterkenny, W.*—Half the deaths were of people 65 years and upwards.

LETTERKENNY; *Manorcunningham.*—The district is in a good sanitary state.

MILLFORD; *Fanad.*—Considerable number of cases of measles during last quarter, one of which was fatal (not registered during quarter).

MILLFORD; *Rathmullan.*—The district has been healthy during the quarter.

MILLFORD; *Rosguill.*—Measles prevalent during the first part of quarter.

STRABANE; *Raphoe.*—District healthy. Nothing epidemic except measles. Sanitation fairly good.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. District generally in a healthy state. A number of the deaths registered of an advanced age.

STRANORLAR; *Killygordon.*—The quarter has been a remarkably healthy one as regards the usual incidence of severe influenza and pneumonia; last year I had 9 cases of pneumonia in one month, this year there were only two. Sanitation satisfactory in spite of prolonged drought.

Down County.

BANBRIDGE; *Dromore.*—The district is in a healthy state and free from infectious diseases.

BELFAST; *Castlereagh No. 1.*—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch.*—There have been numerous cases of whooping-cough in the district during the quarter, with pulmonary complications. There have also been some cases of chicken-pox.

DOWNPATRICK; *Clough.*—The two deaths following whooping-cough were of children who were naturally delicate.

DOWNPATRICK; *Downpatrick, W.*—Whooping-cough in one part of district.

DOWNPATRICK; *Killyleagh.*—The district is free from epidemics. The death-rate is low, but the number of deaths (6) from all forms of tuberculous disease is large in proportion to the deaths registered.

DOWNPATRICK; *Portaferry.*—A few cases of measles occurred. District otherwise healthy.

DOWNPATRICK; *Strangford.*—Rainfall light during the quarter. Crops and cattle are beginning to feel the drought.

KILKEEL; *Kilkeel No. 2, W.*—Health of district good.

KILKEEL; *Rosstrevor.*—Sanitary arrangements of district are quite satisfactory. No prevalence of any particular disease. In fact the deaths during this quarter have been principally amongst old people—9 out of 13 over 65, 5 being well over 80 years.

LISBURN; *Annahilt.*—The sanitary condition of the district is fair.

LISBURN; *Ballylesson.*—The sanitary condition of the district is fair.

LISBURN; *Drumbeg.*—Births about the average; deaths above the average. Three cases of scarlatina reported during the quarter. Whooping-cough very prevalent, causing five deaths.

LISBURN; *Saintfield.*—One case of enteric fever in village, mild type. No other infectious disease during quarter.

LURGAN; *Moir.*—No case of cancer registered this quarter. Births and deaths both under average. Two cases of death from diabetes registered. I think this disease is decidedly on the increase.

LURGAN; *Waringstown.*—District healthy. During the quarter 3 cases of diphtheria and 9 cases of scarlet fever were reported to me. All were removed to hospital except two.

NEWRY; *Donaghmore.*—Sanitary arrangements fairly good.

NEWRY; *Rathfriland.*—The sanitary condition of this district is much improved.

NEWTOWNARDS; *Bangor.*—Sanitary arrangements good. Public health good.

NEWTOWNARDS; *Comber.*—There has been a very severe epidemic of scarlatina during the past quarter; all have been removed to hospital and housing disinfected. It seems to be now nearing an end. We had a few cases of measles and German measles, otherwise the district is very healthy.

NEWTOWNARDS; *Donaghadee.*—Health of locality good.

NEWTOWNARDS; *Kilmood.*—District healthy and in a good sanitary condition.

NEWTOWNARDS; *Newtownards, W.*—The general health in the district has been good. Eight urban cases of scarlet fever and one case of typhoid fever were notified during the quarter. These cases were all sent to hospital and disinfection carefully carried out. Due probably to the prolonged dry weather, there has been recently a number of cases of gastro-enteritis. This I have reported to the urban sanitary authority with a request that special attention be given to the cleaning and disinfecting of dirty yards and ashpits.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt.*—Measles has been prevalent in part of the district during the quarter. District healthy at present, and sanitary arrangements fairly satisfactory.

ENNISKILLEN; *Holywell No. 1.*—The sanitary arrangements of district are fairly good. Measles was prevalent during quarter. No tuberculosis.

IRVINESTOWN; *Clonelly.*—District healthy. No infectious disease during the quarter. Sanitary condition of district fair.

IRVINESTOWN; *Ederney.*—District healthy.

IRVINESTOWN; *Irvinestown, W.*—Two cases of scarlatina notified.

LISNASKEA; *Derrylin.*—No means of checking the spread of epidemics when they occur. A severe type of measles was in the district during the quarter.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No infectious disease prevalent during quarter. There were three deaths from malignant disease and three from tuberculosis of the different organs.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—One case of lock-jaw and a case of death from phthisis—a stranger who came from Belfast to die here. District on the whole healthy.

COLERAINE; *Garvagh*.—District very healthy during quarter. One case of diphtheria occurred, but there was no spread.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—Nothing unusual or abnormal to report.

LIMAVADY; *Ballykelly*.—No infectious diseases during quarter.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—One death from scarlatina, which occurred before a doctor saw the child.

LIMAVADY; *Limavady, W.*—Health of district good. A mild epidemic of scarlet fever in the rural area.

MAGHERAFELT; *Maghera*.—No cases of contagious diseases in district during quarter.

MAGHERAFELT; *Moneymore*.—District healthy during quarter. No epidemic. One case of diphtheria occurred which was removed to hospital, with no further spread of disease. Cause not known. There were a few cases of mumps, with no mortality.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—General health of district good.

CARRICKMACROSS; *Donaghmoynce*.—Nothing calling for special notice in the district.

CARRICKMACROSS; *Raferagh*.—There has been an epidemic of measles in the district for the past 2 months.

CASTLEBLAYNEY; *Ballybay*.—Measles epidemic during quarter.

CASTLEBLAYNEY; *Castleblayney, W.*—More than half the deaths were registered as those of persons aged 65 years and upwards; of these four were 80 years each, one 81, one 82, one 84, two 92, and one 96. Seven deaths attributed to measles are included in this quarter's return.

COOTEHILL; *Dawsonsgrove*.—Sanitary condition of district fairly good with the exception of one village.

MONAGHAN; *Castleshane*.—District sanitary. No epidemic at present.

MONAGHAN; *Emyvale*.—Health of district good. No epidemics of any kind.

MONAGHAN; *Kilmore*.—Early in the quarter there were a good many cases of influenza, but at present the district is particularly free from disease.

MONAGHAN; *Monaghan W.*—The sanitary state of the district remains in the same unsatisfactory condition, regarding which I have frequently called attention. There seems to be no practical steps taken as yet to carry out the scheme adopted for improvements further than surveying and taking levels.

MONAGHAN; *Scotstown*.—The sanitary arrangements in the district are good. It is comparatively free from cancer and tuberculosis.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district very satisfactory. A few cases of scarlatina of a mild type; no deaths.

CASTLEDERG; *Drumquin*.—The sanitary arrangements are satisfactory. There have been no infectious diseases in the district with the exception of scarlet fever, where all children in one family were affected. One died and all the others recovered, with no further spread of the disease.

CASTLEDERG; *Killeter*.—State of district healthy; one death registered during quarter at 104 years.

CLOGHER; *Fivemiletown*.—There were some mild cases of scarlatina during the quarter, but no deaths from this disease.

COOKSTOWN; *Coagh*.—No fresh cases of poliomyelitis in this district during the quarter. Seven cases in one family occurred in a neighbouring district and came under my care, four deaths resulting from the disease, which was of a very virulent type. One man aged 29 years, and one a girl, 16, the others under four years.

COOKSTOWN; *Stewartstown*.—The district is in a healthy state and there are no cases of infectious diseases.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Public health good.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good. No infectious diseases.

DUNGANNON; *Coalisland*.—Several cases of gastro-intestinal influenza during the quarter.

OMAGH; *Dromore*.—Sanitary arrangements good. District free from contagious diseases.

OMAGH; *Drumquin*.—The sanitary condition of the district is only fair. There were two cases of diphtheria, several of scarlet fever, and one of typhoid fever during the quarter.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and with the exception of four reported cases of scarlet fever, free from epidemic diseases. The sanitary arrangements are satisfactory.

OMAGH; *Omagh No. 1, W.*—Health of district good. Four deaths from typhoid fever in the Fever Hospital—patients not from this district.

OMAGH; *Omagh No. 2*.—District healthy; no epidemic.

OMAGH; *Sixmilecross*.—The district has been very healthy for the past quarter; no epidemic. The houses are kept in very good order.

IV. PROVINCE OF CONNAUGHT.**Galway County.**

CLIFDEN; *Inishbofin*.—Measles continued until 20th April, when the last case appeared. The district is quite free from this disease and from all zymotic forms.

CLIFDEN; *Roundstone No. 1*.—Measles and whooping-cough still prevalent in parts of the district.

GALWAY; *Galway No. 3. (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The health of the district is good.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Turloughmore*.—District healthy.

GORT; *Gort, W.*—Health of district has been good during quarter.

GORT; *Kinvarra*.—Death-rate higher than usual.

LOUGHREA; *Bullaun*.—Three of the twelve deaths registered were of persons aged 74, 75, and 81 years.

LOUGHREA; *Woodford*.—The quarter's return for this district is uncommonly cheerful—34 births, 9 deaths; no tuberculosis.

OUGHTERARD; *Cloonbur No. 1*.—Measles and influenza have now disappeared from the district.

OUGHTERARD; *Lettermore*.—Measles prevalent in this district.

OUGHTERARD; *Oughterard, W.*—The district is in fair sanitary condition. No infectious disease during the quarter. The four deaths from malignant disease were as follows:—1. Cancer of rectum. 2. Malignant growth, stomach. 3. Cerebral tumour. 4. Epithelioma of floor of mouth. There were six cases of pneumonia during quarter, with one death. Two deaths from pulmonary tuberculosis, one accompanied with diabetes.

PORTUMNA; *Eyre court*.—The district is in a sanitary condition.

TUAM; *Tuam No. 1, W.*—Health of district was good during the past quarter. There were some cases of pneumonia—two in the same house—during end of May and beginning of June.

TUAM; *Tuam No. 2*.—One death registered from pertussis.

Leitrim County.

BAWNBOY; *Ballinamore*.—Sanitary state of district satisfactory.

CARRICK-ON-SHANNON; *Drumshanbo*.—District in healthy condition.

MOHILL; *Carrigallen*.—The sanitary condition of the district has been fair during the quarter, as also the public health, with exception of some cases of parotitis (mumps).

MOHILL; *Mohill, W.*—District fairly healthy. Some cases of influenza. One person lived to be 114 years.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

Mayo County.

BALLINA; *Ballina, W.*—Cases of enteric fever have again appeared in the district—4 deaths recorded. A polluted well from a defective sewer is considered to have been the source of a number of the cases. Whooping-cough amongst children was prevalent during the quarter—3 deaths registered.

BALLINA; *Crossmolina*.—District continues in fair sanitary condition, and free from infectious disease.

BALLINROBE; *Ballinrobe, W.*—The health of district remains good. Epidemic of measles with severe gastric symptoms during the quarter. Death of an old man, 105 years, registered.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements fair. Tuberculous disease prevalent in the district.

BALLINROBE; *Cong.*—Health of district good.

BALLINROBE; *Hollymount*.—Births and deaths are under the average. There has been a severe epidemic of measles and whooping-cough during the quarter.

BELMULLET; *Bangor*.—District in a sanitary condition at present; sorry to say six sporadic cases of typhoid fever during the quarter, probably consequent on an imported case of same disease from Newcastle-on-Tyne. Incubation period being now expired, I anticipate no recurrence of said disease in district.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

BELMULLET; *Knocknalower*.—District in a fairly healthy condition.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar No. 1, W.*—Epidemic of whooping-cough has been prevalent throughout the district.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics; two cases of cancer. Common lodginghouses not registered. Sanitation rapidly progressive.

CLAREMORRIS; *Claremorris, W.*—The health of the district is good, and owing to the operations and example set by the Congested Districts Board a great improvement in the housing of the people is noticeable.

KILLALA; *Killala, W.*—The health of the district is satisfactory. One case of enteric fever occurred in an outlying part of the district. The patient refused to be removed to hospital. At present there is no other infectious disease in the district.

SWINEFORD; *Foxford*.—Whooping-cough and chicken-pox were epidemic during the quarter.

SWINEFORD; *Swineford, W.*—The general health of the district has been good during the past quarter. There had been a small outbreak of scarlatina, but the patients were promptly removed to Union fever hospital, and place thoroughly disinfected.

WESTPORT; *Ballycroy*.—A good many cases of influenza during the quarter, not severe, of a rheumatic type. Two deaths from cancer (one of breast, one of stomach), one from pulmonary tuberculosis.

WESTPORT; *Islandeady*.—The sanitary arrangements of the district are good.

WESTPORT; *Newport*.—General health of district very satisfactory; sanitation improving.

Roscommon County.

ATHLONE; *Kiltoom*.—Sanitary condition of district satisfactory. Scarlatina in district, but confined to three villages; one case turned out fatal.

BALLINASLOE; *Creagh*.—The health of the district has been good during the past quarter.

BOYLE; *Boyle No. 1, W.*—Whooping-cough prevalent; no other epidemic. Weather very dry for last two months of quarter.

BOYLE; *Keadew*.—Whooping-cough very prevalent. Three cases of scarlatina during the quarter.

CARRICK-ON-SHANNON; AUGHIRM.—There were two deaths from cancer of the stomach, both females. One death from tuberculosis. The sanitary condition of the district is good.

CASTLEREAGH; *Ballagherreen*.—The sanitary condition of the district is fairly good. Had some cases of whooping-cough and measles. Scarlatina, which was prevalent in the district, has now disappeared.

CASTLEREAGH; *Loughglinn*.—The health of the district continues good. Influenza, measles and whooping-cough prevalent. One death at 100 years. No death from cancer.

ROSCOMMON; *Roscommon, W.*—District healthy.

STROKESTOWN; *Roosky*.—Nearly all the deaths registered were of persons varying in age from 68 to 91 years. Three deaths from cancer.

STROKESTOWN; *Strokestown, W.*—The greater number of deaths registered during the quarter is of persons aged 65 years and upwards.

Sligo County.

BOYLE; *Gurteen*.—There were several cases of scarlet fever during the past quarter, and two cases of enteric fever. District now healthy.

DROMORE WEST; *Castleconor*.—Health of district good. There were a few cases of mumps.

DROMORE WEST; *Easky, W.*—Health of district good. No infectious diseases occurred during the quarter. Smallest number of deaths recorded for past ten years.

DROMORE WEST; *Skreen*.—The health of the district is good. No epidemic disease during the quarter.

SLIGO; *Carney No. 1*.—Sanitary condition of district good.

SLIGO; *Carney No. 2*.—The health of the district is good.

SLIGO; *Collooney*.—Some cases of measles in last month of quarter.

SLIGO; *Riverstown*.—There have been several cases of measles for the past few weeks.

SLIGO; *Sligo No. 1, W.*—Epidemic of measles in the district.

TOBERCERRY; *Aclare*.—Sanitary arrangements fairly good.

TOBERCERRY; *Coolaney*.—Sanitation good.

TOBERCERRY; *Tobercurry, W.*—The district generally is in a healthy and sanitary condition.

1914.]
3rd Quarter.

the United States of America, the Continent of Europe, and Abroad, of
T. FISHER UNWIN, LONDON, W.C.

Price One Shilling.

Marriages:—APRIL, MAY, JUNE, 1914.

Births and Deaths:—JULY, AUGUST, SEPTEMBER, 1914.

During the quarter ended 30th September last, there were registered in the 831 Registrars' Districts in Ireland 24,331 births—a number equal to an annual birth-rate of 22·2 in every 1,000 of the estimated population*—and 15,213 deaths, representing an annual rate of 13·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,148 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·3 in every 1,000 of the estimated population, and the death-rate 12·4 per 1,000.

The birth-rate in Ireland for the quarter is 0·8 below the average rate for the corresponding quarter of the ten years, 1904–1913, and 0·4 below the rate for the third quarter of 1913. The deaths are 1,216 below those registered in the corresponding quarter of 1913; the death-rate is 0·4 below the rate for that quarter, and 0·5 below the average for the third quarter of the ten years, 1904–1913.

In comparison with those for the corresponding quarter of 1913, the returns of pauperism furnished by the Local Government Board show a decrease of 258 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 248 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years, 1904–1913, the number of Workhouse inmates shows a decrease of 5,620, and the number of persons on out-door relief shows a decrease of 13,417, the total under both heads being 21·0 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·2 per cent.

* See page 212.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the second quarter of 1914, is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th June, 1914, and by the BIRTHS and DEATHS registered in the Quarter ended 30th September, 1914.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

MARRIAGES.

The Marriages (5,570) registered in Ireland during the second quarter of 1914 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1913, but 0·2 above the average rate for the second quarter of the ten years 1904–1913. Of the total number of marriages, 3,874 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,696 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·9 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·3 above, and that under the latter heading is equal to the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1904–1913, and the average number for that period, also the number registered in the first and second quarters of 1914.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 24,331—12,551 boys and 11,780 girls—being equal to an annual ratio of 1 in every 45.0, or 22.2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1904–13, was 25,269, equivalent to an annual rate of 23.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22.5 per 1,000 of the population according to the Census of 1911; Munster, 21.9; Ulster, 22.7; and Connaught, 20.7.

The highest county or county borough birth-rate* is 28.0 for Belfast county borough, and the lowest 17.6 for Dublin county and Monaghan county. Of the intermediate rates the highest five are—Dublin county borough, 27.8; Limerick county and county borough, 24.5; Louth, 23.6; Kilkenny, 23.1; and Londonderry county and county borough, 22.9. The lowest five are—Leitrim, 18.4; Roscommon, 18.5; Wicklow, 18.8; Carlow, 19.0; and Clare, 19.1.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 15,213—7,689 males and 7,524 females—affording an annual ratio of 1 in every 72.0, or 13.9 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1904–13, was 14.4 per 1,000.

The death-rate in Leinster was 14.6 per 1,000 of the population according to the Census of 1911; in Munster, 13.1; in Ulster, 14.6; and in Connaught, 11.7.

The county or county borough death-rates* range from 10.6 in Queen's county to 19.9 in Dublin county borough. Between these rates the lowest five are—Longford, 10.7; Clare, 11.0; Leitrim, 11.1; Kerry, 11.2; and Kilkenny, 11.3; and the highest five are—Belfast county borough, 17.2; Louth, 15.7; Waterford county and county borough, 15.4; Down, 15.0; and Armagh, 14.5.

* See note (*) on page 150.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1904–1913, and the average number for that period; also the number registered during the first, second and third quarters of the year 1914 :—

1914,	22·9	23·9	22·2	—	—	18·7	16·9	13·9	—	—

AGES.—Of the 15,213 deaths registered last quarter, 2,126, or 14·0 per cent., were of infants under one year of age; and 5,618, or 36·9 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 87·4 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 15·1 per cent. of the total deaths registered therein; in Munster, 12·4 per cent.; in Ulster, 15·4 per cent.; and in Connaught, 9·7 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 32·6 per cent.; in Munster, to 39·1 per cent.; in Ulster, to 35·0 per cent.; and in Connaught, to 49·4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,262, and is equivalent to an annual rate of 1·15 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the September quarter of 1914, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1909–1913.

Name of Disease.	Number of Deaths in September quarter, 1914.	Average number of Deaths in September quarter of the 5 years, 1909–1913.
Enteric Fever,	75	63
Typhus,	5	8
Small-pox,	—	—
Measles,	167	125
Scarle Fever,	75	53
Whooping-cough,	163	186
Diphtheria,	60	75

* See note (†) on page 157.

ENTERIC FEVER.—There were 75 deaths from enteric fever as against 77, 59, and 57 deaths in each of the three preceding quarters, and the average 63 for the third quarter of the five years preceding. Of the total, 18 deaths belonged to the city of Dublin, 8 to Belfast, 7 to Ballymena urban district, and 5 to the urban district of Carrick-on-Suir.

TYPHUS.—Five deaths from typhus were registered, the average being 8; the 5 deaths were registered in the following unions: in Belfast, one death; in Dingle, one death; in Lisburn, two deaths; and in Strokestown, one death.

SMALL-POX.—There was no mortality from small-pox, neither did any report of the incidence of the disease in Ireland reach this office.

MEASLES.—The deaths from measles, in number 167 (the average being 125) correspond to an annual rate of 0.15 per 1,000 of the population of Ireland, estimated to the middle of the year. In each of the quarters preceeding such deaths were respectively 109, 223, and 452. Of the total for the past quarter, 18 belonged to Dublin city, and 62 to Belfast (including 5 deaths in the Fever Hospital of Ballylesson). There were 11 deaths from measles in Ballina union, and 17 in Sligo.

SCARLET FEVER.—In the three quarterly periods preceding deaths from scarlet fever numbered 137, 138, and 93, and declined in the period under notice to 75 deaths (average being 53). Of the deaths 22 belong to Belfast city, which figure includes the deaths of 17 persons who died in the Fever Hospital of Ballylesson.

WHOOPING-COUGH.—The number of deaths from whooping-cough was 163, corresponding to an annual rate of 0.15 per 1,000. The total is below the average, 186, also below the numbers which occurred in the June quarter of 1914, and the March quarter of 1914, but above the December quarter of 1913, namely, 119. Of the total (163), there were 23 deaths appertaining to the city of Cork, 52 occurred in Belfast city, 11 in the union of Ballina, and 15 in the union of Castlebar.

DIPHTHERIA.—The deaths from diphtheria, numbering 60, are below the average of the five corresponding quarters in the five years preceding by 15 and below the number registered in the June quarter by 5. In the December quarter of 1913 the deaths from this cause numbered 90, and in the March quarter of the present year they numbered 93. There were 13 deaths in Dublin city included in the total.

DIARRHŒAL DISEASES.—In the aggregate the deaths from diarrhœal diseases numbered 717, including 666 deaths of children under two years of age from diarrhœa and enteritis, 49 deaths of persons over two years in age from diarrhœa, and 2 deaths from dysentery. The 666 deaths are equal to a rate of 27.4 per 1,000 births registered.

TUBERCULOUS DISEASE.—The total number of deaths from tuberculous disease was 2,041, being equivalent to an annual death rate of 1.86 per 1,000 of the population; as compared with the number of deaths in the corresponding quarter of 1913, there was a reduction of 16 in the number (2,041).

POLIO-MYELITIS.—The Registrar of Markethill district, in the union of Armagh, reports that there were three cases of polio-myelitis at Glenanne.

CANCER.—The mortality from cancer was represented by 879 deaths, being equivalent to an annual death-rate of 0.80 per 1,000. In each of the three preceding quarters the death-rates were 0.86, 0.80, and 0.79 per 1,000.

VIOLENCE.—Under the heading violence, the deaths of 220 persons were returned; this figure includes accidental deaths, homicides, and suicides.

The Registrars, in their Notes, report the presence of the following diseases :— Enteric fever in 14 districts, typhus in one, measles in 17, scarlet fever in 40, whooping-cough in 12, diphtheria in 15, mumps in 3, German measles in one, chicken pox in 3, and poliomyelitis in one. [See Appendix to this Report commencing on page 213.]

INQUESTS.—There were 388 inquests reported to the Registrars during the quarter ; this number being equal to one in every 39 of the total deaths registered.

In Leinster there was one inquest to every 33 deaths registered, in Munster one to 46, in Ulster one to 35, and in Connaught one to 111.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 15,213 deaths registered, 3,358, or 22·1 per cent., occurred in public institutions. In Leinster the percentage was 30·3, in Munster 26·8, in Ulster 16·0, and in Connaught 13·0.

UNCERTIFIED DEATHS.—According to the returns, 3,188 of the 15,213 deaths which were registered during the quarter were uncertified, being 21 per cent. of the total. In Leinster the percentage was 14, in Munster 25, in Ulster 16, and in Connaught the uncertified deaths were 47 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1914, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

a Including the deaths of 5 persons from enteric fever, 2 from typhus, 5 from measles, 17 from scarlet fever, 2 from diphtheria, and one from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballylesson, and Union of Lisburn, and the death of one person from cerebro-spinal meningitis registered in Belfast. The figures here given for Ballylesson district in connection with the city of Belfast for the 13 weeks ended 26th September, are as revised.

+ Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1914.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1914, there were 16,442 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 4,148 (1,937 males and 2,211 females), being 3,389 less than in the corresponding quarter of the year 1913, and 4,034 below the average number for the third quarter of the ten years 1904-1913.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1913 and 1914 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.
July,	885	607	—	278	826	601	—	225	1,711	1,208	—	503
August,	982	481	—	501	990	548	—	442	1,972	1,029	—	943
September,	1,604	849	—	755	2,250	1,062	—	1,188	3,854	1,911	—	1,943
TOTAL,	3,471	1,937	—	1,534	4,066	2,211	—	1,855	7,537	4,148*	—	3,389

* Including 3,056 emigrants to the United States of America, viz. :—774 in the month of July, 694 in August, and 1,588 in September. Of 2,660 steerage passengers, 670 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{4}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1913 the average price was $6d.$, and in the corresponding quarter of 1904 it was $5\frac{3}{4}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 16s. 6d. per cwt. For the corresponding quarter of the year 1913 the average price was 16s., and for the third quarter of 1904 the average price was 14s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 10d. to 4s. 6d. In the third quarter of 1913 the average prices were 4s. 7d. to 5s. 2d. and the prices for the corresponding quarter of 1904 were 2s. 8d. to 3s. 5d.

The average price per cwt. of beef at the Dublin Cattle Market was 48s. 0d. to 66s. 0d., as against 60s. 6d. to 64s. for the third quarter of 1913, the price for the third quarter of 1904 ranging from 51s. 6d. to 59s. 0d.

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 23s. to 28s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was $76\frac{1}{8}$, and the lowest $70\frac{7}{16}$. Owing to the financial situation created by the European war, the Stock Exchange has been closed from the 31st July. No official record of prices have been made since that date.

The minimum annual rate of discount charged during the quarter on Irish bills at the Bank of Ireland which was 4 per cent. on 1st July, was raised to $4\frac{1}{2}$ per cent. on 30th July, and to 10 per cent. on 1st August, falling to 6 per cent. on 6th August, and to 5 per cent. on 8th August.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1914 was 33,834 or 258 below the average for the corresponding period in 1913.

The average weekly number of persons receiving out-door relief during the quarter was 37,614, being 248 below the average for the third quarter of 1913.

Of the persons receiving in-door relief during the third quarter of 1914, an average number of 1,677 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1913 the average weekly number was 1,616.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1914, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NO. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Out-door.			
	(a)	(b)							Ordinary relief.	By means of works devised for the relief of distress.	Total Outdoor.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1909 to 1914, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 162).

The mean height of the barometer during the third quarter of 1914 was 29·953 inches, being 0·073 above the average for the corresponding quarter of the five years 1909–1913; the highest reading (30·446 inches) was on the 27th September at 9 A.M., and the lowest (29·385 inches) on the 14th September at 9 A.M.

The mean temperature of the air during the quarter was 58·6°, being 2·6° above the average for the third quarter of the 5 years, 1909–1913.

The maximum temperature of the air during the quarter was 81·9° and the minimum 30·1°. The maximum heat in sun was 131·5°.

Rain fell on 45 days during the quarter. The rain-fall measured 7·415 inches being 1·182 inches above the average for the third quarter of the five years, 1909–1913. The greatest monthly rainfall was in August, when 3·845 inches were registered.

July.—The mean height of the barometer during this month was 29·860 inches; the highest reading (30·185 inches) was on the 10th, at 9 A.M.; and the lowest (29·500 inches) on the 2nd, at 9 A.M. The mean temperature of the air was 59·2°, the maximum registered was 76·5°, and the minimum 40·9°. The 3rd was the warmest day, and the 4th the coldest night. The mean of the dry bulb was 58·4° and of the wet bulb, 56·5°. The maximum heat in the sun was 131·0°, and the minimum on the grass 35·7°. The total amount of sunshine recorded was 178·8 hours, the greatest daily amount being 12·5 hours on the 3rd. The maximum ozone was 0·7, the minimum 0·4, and the mean 0·5. Rain fell on 18 days. The rain-fall measured 2·340 inches; the greatest amount in 24 hours was 0·350 inch on the 4th.

August.—The mean height of the barometer during this month was 29·955 inches; the highest reading (30·361 inches) was on the 31st, at 9 P.M., and the lowest (29·509 inches) on the 2nd, at 9 A.M. The mean temperature of the air was 62·5°, the maximum registered was 77·6°, and the minimum 40·8°. The 12th and 17th were the warmest days, and the 12th the coldest night. The mean of the dry bulb was 59·5°, and of the wet bulb 57·5°. The maximum heat in sun was 130·8°, and the minimum on the grass 40·1°. The total amount of sunshine recorded was 199·5 hours, the greatest daily amount being 12·1 hours on the 12th and 17th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain fell on 17 days. The rain-fall measured 3·845 inches; the greatest amount in 24 hours was 1·140 inches on the 29th.

September.—The mean height of the barometer during this month was 30·045 inches, the highest reading (30·446 inches) was on the 27th at 9 A.M., and the lowest (29·385 inches) on the 14th, at 9 A.M. The mean temperature of the air was 54·0°; the maximum registered was 81·9°, and the minimum 30·1°. The 20th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 54·2°, and of the wet bulb 52·4°. The maximum heat in sun was 131·5°, and the minimum on the grass 28·0°. The total amount of sunshine recorded was 173·1 hours, the greatest daily amount being 11·2 hours on the 20th. The minimum on the grass was below 30° on one night. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain fell on 10 days. The rain-fall measured 1·230 inches; the greatest amount in 24 hours was 0·460 inch on the 16th.

METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

For the whole quarter temperature was 1° above the normal, and the period of greatest heat occurred about the middle of July. For about a fortnight from July 26th and for another fortnight after August 12th the general level of the thermometer was below the normal. In the northern division the number of days with a measurable amount of rain was 52, or 6 less than the average, while the total fall, 8.3 in., was only 82 per cent. of the normal. In the south, on the other hand, the rain days were 6 more than the average, and the total fall, 11.3 in., as high as 116 per cent. The aggregate number of hours of bright sunshine equalled 4.8 hours per day, a figure exactly identical with the normal in the south, but 0.6 hour per day in excess in the north. The mean level of the barometer was a little below the normal during July, but above it in August and September, and the main direction of the wind from some point between south and west.

JULY.—Although the normal state of the weather was unsettled, and uninterruptedly fine days never frequent, heavy falls of rain were rarely experienced. Over Ireland generally the temperature differed very little from the average. The greatest outburst of heat occurred on the 20th or 21st, when the sheltered thermometer rose to 80° or 81° over a wide area. During the last week the temperature was low for the time of year, the maxima on most of the days being little above 60° . The lowest temperature of the month, however, occurred during the early days. On the 3rd the sheltered thermometer fell to 38° at Markree Castle and to 40° at some other stations. In the northern division the mean maximum was 64.1° and the mean minimum 52.0° , while in the south the corresponding values were 65.6° and 53.0° . In both districts the figure was in close agreement with the average. Rain was of more frequent occurrence in the south than in the north, and the total amount was also larger. In the north the aggregate, 2.76 in., was 0.53 in. less than the average, while in the south the difference from the normal was +0.44 in., the total being 3.54 in. On most days the fall was slight or moderate, but occasionally about 0.3 in. or 0.4 in. was measured in various localities of the west and south-west, and on the 30th the heaviest fall of the month occurred; at Valencia the fall was 1.1 in. and at Foynes 1.0 in. Both the northern and southern districts had about the same amount of bright sunshine, the value being rather less than $4\frac{1}{2}$ hours per day, but while that figure was about equal to the average for the north, it was about 40 minutes per day less than the normal for the south.

The main wind current was between south and west until the middle of the month, when winds from between north-west and north became general. Gales from the north-westward were experienced on the northern seaboard on the 24th and 25th, and the wind about that time was strong and squally over the country generally.

AUGUST.—The temperature over the southern half of the country was more than a degree higher than in the north, but the latter division was drier and also brighter.

The weather generally was rainy both early and late in the month, but mostly fair and dry, except on the 14th, from the 9th until the 20. For the month as a whole the temperature was nearly 2° above the normal, and the bright sunshine 1.4 hour in excess in the north and 0.3 hour in the south, while the total rainfall was 0.21 in. less than the average in the north and 0.65 in. in excess in the south. The first week was cool as well as wet, rain falling daily, while there was less bright sunshine than during any subsequent weekly period, especially in the north, and the thermometer at no time touched 70° . The following week proved the warmest and brightest part of the month. Temperature readings of 70° or above became rather common, and on the 13th a maximum of 78° was registered at Markree Castle and

Birr Castle, and 77° at Armagh and Waterford. The mean temperature at this time was about 3° above the average. In the north the mean sunshine per day reached 7·8 hours, or 3·5 hours above the normal, and in the south the corresponding values were 7·1 and 2 hours. The fine weather was broken temporarily on the 14th by rain and thunderstorms, which occurred very extensively, bringing some heavy local rains; 1·1 in. at Dublin, 1·2 in. at Markree Castle, Rathgar, Clongowes Wood, Birr Castle, Killarney, and Valencia, 1·4 in. at Newtownforbes, 1·5 in. at Waterford, 1·6 in. at Seskin, and 1·8 in. at Kilkenny. The generally fine weather continued until the 19th, but from that date until the end of the month few days passed without rain in some part of the country, although the quantity was not, as a rule, large, and the duration of sunshine, except during the last few days, considerably exceeded the normal. The temperature, too, continued relatively high. On several occasions maximum readings above 70° were recorded, and the mean was at least 2° above the average. The main current of wind for the month was between south and west, and its force sometimes brisk, but occasional light winds from other points were experienced, particularly during the dry, settled period.

SEPTEMBER.—The month was characterized by very fine and very wet periods, but considered generally the greater part was dry. The first week brought little or no rain except to the extreme south and south-west, but this was followed by an unsettled period during which few days were without rain in some portion of the country. The rain was, however, more frequent in the south-west and west than elsewhere, and after the 20th the country generally became fine and dry. In the neighbourhood of Dublin the conditions were almost entirely rainless after the 16th or 17th. At Malahide rain fell on only 7 days, yielding a total of 0·90 in., while at Killiney there were only 6 days with rain, giving a total of 0·65 in. For the month as a whole the northern division had 1·77 in., or 1·44 in. less than the normal, while the south had 2·99 in., or 0·10 in. more than the normal. The mean temperature in the northern half was $54\cdot9^{\circ}$, an excess of 1° on the average. In the south the mean was 2° higher— $56\cdot9^{\circ}$ —and the excess over the average $1\cdot7^{\circ}$. The excess was entirely due to the warmth of the first fortnight, as subsequently the thermometer was generally below the normal. In all parts of the country the bright sunshine was more prevalent than usual. The excess was, however, not large. In the north, where the mean sunshine per day was 4·24 hours, the average was exceeded by 0·48 hour, and in the south, where the daily mean was 4·64 hours, the excess was 0·20 hour. The latter half of the month was much brighter than the former. For a week after the 20th the daily mean was as high as 6 hours.

* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names.

The Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District, formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 177 and 178 are extracted from the Weekly Returns made by the Registrars, and relate to the weeks extending from 26th June, 1914, to 26th September, 1914. With the exception of 122 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these weeks extending from 26th June, 1914, to 26th September, 1914, were admitted.

districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted. Exclusive of 12 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

NOTE.—This table has been constructed for the years 1840 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—District healthy.

CARLOW; *Carlow, No. 1, W*.—Practically no infectious disease.

CARLOW; *Clonegall*.—Many cases of scarlatina during quarter. No case occurred for the past month.

CARLOW; *Leighlinbridge*.—Health of district good. No infectious disease has come under my notice.

NEW ROSS; *St. Mullins*.—Sanitary deficiencies were not so objectionable as usual. Although minor ailments were pretty common, the quarter has been healthy. Five of the nine deaths were of people of 79 years and upwards. The two cases of tuberculosis (phthisis) ran a rapid course.

Dublin County.

BALROTHERY; *Swords*.—An extensive epidemic of measles occurred during the previous quarter and the beginning of this quarter. Broncho-pneumonia was a very frequent complication which was the cause of the deaths.

DUBLIN, SOUTH; *Clondalkin*.—An epidemic of typhoid fever arose in the district, but for some time past no new cases have arisen. For years past isolated cases of enteric have taken place. An examination of milk and water from all sources showed that both were capable of conveying typhoid fever.

DUBLIN, SOUTH; *Crumlin*.—There was a severe outbreak of measles during the quarter which necessitated the closing of the schools. Otherwise the health of the district has been normal. There was only one fatal case in the measles outbreak, and the patient suffered from a bad form of congenital heart disease.

DUBLIN, SOUTH; *Donnybrook No. 1*.—District healthy.

Dublin County Borough.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements are good. I had twenty-four cases of scarlet fever, out of which one died.

Kildare County.

ATHY; *Castledermot*.—The one fatal case of pulmonary tuberculosis returned from Scotland a few weeks before death in an advanced stage.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—Two cases of scarlatina. District healthy.

NAAS; *Ballymore Eustace*.—The general health of the district is good. No infectious disease. Only one death recorded during the quarter.

NAAS; *Naas and Carragh, W*.—Sanitary arrangements of district very good.

NAAS; *Newbridge*.—The district is very free from infectious disease.

NAAS; *Robertstown and Kilmeage*.—Health of district good.

Kilkenny County.

CALLAN; *Callan, W*.—No death has been registered from tubercular disease.

CALLAN; *Kilmaganny*.—One case of scarlet fever occurred in the district during the quarter.

CARRICK-ON-SUIR; *Pilltown*.—The district continues to be in a healthy condition. There were recently two cases of chicken-pox.

CASTLECOMER; *Ballyragget*.—Health of district very satisfactory.

CASTLECOMER; *Castlecomer, W*.—The death of a woman was registered at the remarkable age of ninety years, who lived all her lifetime in the town of Castlecomer.

KILKENNY; *Gowran*.—District is in a good sanitary condition.

KILKENNY; *Tiscoffin*.—District in very healthy condition.

KILKENNY; *Tullaroan*.—Health of district good.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Urlingford, W.*.—Health of district very good.

King's County.

BIRR; *Birr, W.*.—The whole town has been infected with measles of a mild type.

BIRR; *Frankford*.—Sanitary arrangements fairly good, and the health of the people generally of the district is very good at present.

BIRR; *Killyon*.—Very healthy district.

MOUNTMELICK; *Clonygowan, No. 2*.—District healthy.

ROSCREA; *Roscrea, No. 2*.—District very healthy.

TULLAMORE; *Clara*.—Sanitary condition of district good. No deaths from tubercular disease during quarter.

TULLAMORE; *Phillipstown*.—District healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Only seven deaths registered, and all aged over 66 years. Scarlet fever still prevalent.

BALLYMAHON; *Ballymahon, W.*.—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinallee*.—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*.—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby, No. 2*.—Health of the district good.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Colon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DUNDALK; *Dundalk, W.*.—Health of district good.

Meath County.

ARDEE; *Collon, No. 2*.—District in a very healthy state.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

EDENDERRY; *Ballyboggan*.—Health of district good.

KELLS; *Kilskeer*.—District healthy.

KELLS; *Moyalty*.—The district has been very healthy during the quarter. One death from tubercular disease registered at the age of 26 years. The patient was of a markedly strumous diathesis.

KELLS; *Nobber*.—There were two deaths from tuberculosis. They occurred in widely different parts of the district. Otherwise the district is in its normal state of health.

NAVAN; *Painestown*.—No epidemic disease.

OLDCASTLE; *Oldcastle, W.*.—The district continues in a satisfactory condition.

Queen's County.

ABBEYLEIX; *Durrow*.—District in a very healthy state. Sanitation good.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

CARLOW; *Ballickmoyler and Newtown*.—Number of deaths registered much below the average. The death of one woman was registered whose age was stated by the informant, her son, to be 105 years.

MOUNTMELICK; *Clonygowan, No. 1*.—District healthy.

MOUNTMELICK; *Mountmellick, W.*.—The sanitary arrangements are in good condition.

MOUNTMELICK; *Mountrath*.—District healthy.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

BALLYMAHON; *Ballymore*.—Health of district good.

DELVIN; *Clonmellon*.—District healthy.

GRANARD; *Finnea, No. 1*.—District very healthy.

MULLINGAR; *Ballynacarrigy*.—This quarter has been remarkable for its dryness at times, accompanied by great heat in the sun in July and end of June. On the whole, the wind was northerly, cold, and penetrating, with more or less frost at night. Whether from these allied causes or not, the period under review was not a healthy one, and there was an abnormal number ill throughout the entire quarter. I have seen some of the severest ulcerated throats and bad cases of conjunctivitis, simple and phlyctenular, also bronchial and neuralgic affections, whilst many cases of gastritis, accompanied by jaundice, occurred.

MULLINGAR; *Castletown Geoghegan*.—The sanitary state of the district is good. We are free from epidemic disease.

MULLINGAR; *Killucan*.—Carcinoma is particularly common in the district, three of the six deaths in the district being due to cancer. Several patients have been operated on for cancer.

MULLINGAR; *Mullingar, W.*.—Health of district good.

Wexford County.

ENNISCORTHY; *Ferns*.—I have to record the deaths of persons aged 93 and 88 years this quarter.

GOREY; *Camolin*.—District continues healthy. There was a few cases of pemphigus.

NEW ROSS; *Fethard, No. 1*.—The sanitary condition of the district continues satisfactory.

NEW ROSS; *Fethard, No. 2*.—District healthy.

NEW ROSS; *New Ross, W*.—District healthy.

NEW ROSS; *Templeudigan*.—District healthy.

WEXFORD; *Bannow*.—The district is at present in a very sanitary condition.

Wicklow County.

BALTINGLASS; *Dunlavin*.—A healthy quarter.

NAAS; *Blessington*.—The health of the district is good; no epidemic disease.

BALTINGLASS; *Kiltegan*.—Health of district good. Sanitary conditions satisfactory.

RATHDOWN; *Delgany*.—Health of district good.

RATHDRUM; *Aughrim*.—District is very healthy and in sanitary condition.

RATHDRUM; *Newcastle*.—General health of district good. Epidemic of German measles has prevailed during past two months; it is now on the decline. The type was mild, and no complications occurred.

II. PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN; *Ballyvaghan, W*.—Health of district good.

CORROFIN; *Corrofin, W*.—District very healthy.

ENNIS; *Crusheen*.—Health of district very good. No death registered during the quarter.

ENNIS; *Ennis No. 1, W*.—Health of district good.

ENNIS; *Killaniv*.—District in satisfactory condition.

ENNIS; *Newmarket*.—The health of district continues satisfactory.

ENNISTIMON; *Ennistimon, W*.—The state of the district is satisfactory.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—Health of district very good, mortality much below average.

KILRUSH; *Kilkee*.—The sanitary state of town fairly good. New sewerage scheme on eve of completion.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is good. There was very little sickness during the quarter.

SCARRIFF; *Mountshannon, W*.—District healthy in general.

SCARRIFF; *Quin*.—Two cases of typhoid in village at present notified, and probably due to the bad sanitary arrangements of the village. Health of rest of district good.

Cork County and County Borough.

BANDON; *Bandon, W*.—An epidemic of scarlet fever during the quarter.

BANDON; *Innishannon*.—District very healthy.

BANDON; *Kilbrittain*.—District very healthy.

BANTRY; *Bantry, W*.—Sanitary condition of district is good.

BANTRY; *Durrus and Kilcrohane*.—The general health is good.

BANTRY; *Glengarriff*.—District healthy. Of the two deaths registered caused by pulmonary tuberculosis, one contracted the disease in America, the family history being exceptionally good.

BANTRY; *Kealkill*.—District healthy.

CASTLETOWN; *Kilcatherine*.—District healthy, with exception of whooping cough.

CORK; *Blarney*.—With the exception of one case of phthisis pulmonalis and one of whooping cough (which was imported from a neighbouring district), there was no case of infectious disease in the district during the quarter.

CORK; *Carrigaline, No. 1*.—District healthy.

CORK; *Carrigaline, No. 2*.—The district is generally healthy.

CORK; *Dripsey*.—The sanitary condition of the district is good.

CORK; *Riverstown*.—An epidemic of whooping cough during the months of July, August, and September prevailed.

DUNMANWAY; *Coolmountain*.—The district is extremely healthy. Death rate very low.

DUNMANWAY; *Dunmanway, W*.—The sanitary condition of the district continues fairly satisfactory. Ten deaths were registered as being over 65 years. There was no death from "tubercle." Two deaths were registered as being due to "cancer," and one to malignant disease of oesophagus.

KANTURK; *Boherboy*.—Sporadic cases of scarlatina and one of diphtheria have been brought under my notice. Otherwise the district is healthy.

KANTURK; *Milford*.—The district is healthy.

KILMALLOCK; *Charleville*.—The district is healthy.

KINSALE; *Ballyfeard*.—General health good; one death occurred, result of an accident.

KINSALE; *Kinsale, W*.—An outbreak of enteric fever, about forty cases, two deaths registered; supposed to be caused by polluted water; a few cases of scarlatina.

MACROOM; *Slieveveagh*.—The sanitary arrangements are satisfactory.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—District healthy and in a satisfactory sanitary state.

MALLOW; *Rahan*.—District healthy during past quarter; no infectious disease.

MIDDLETON; *Cloyne*.—District healthy.

MIDDLETON; *Walshtownmore East*.—District very healthy.

MILLSTREET; *Millstreet, W.*—A slight outbreak of scarlet fever prevailed.

SKIBBEREEN; *Dromdaleague*.—District healthy.

Kerry County.

CAHERSIVEEN; *Caher, W.*—Sanitary condition of the district good.

CAHERSIVEEN; *Darrynane*.—There has been nothing done to remedy the defective sewerage system in the village of Waterville, which continues to be a standing menace to the public health.

CAHERSIVEEN; *Emlagh*.—District in a healthy condition.

CAHERSIVEEN; *Glanbehy*.—Sanitary state of district good.

CAHERSIVEEN; *Valencia*.—The sanitary state of the district good, and the district clear of all the diseases named in the abstracts.

DINGLE; *Castlegregory*.—There is an epidemic of whooping-cough in the district.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Kilgarvan*.—District healthy.

KENMARE; *Tuosist*.—District healthy.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killorglin*.—District healthy.

KILLARNEY; *Milltown*.—Measles in the district.

KILLARNEY; *Molahiffe*.—There has been no outbreak of infectious disease in the district during the quarter.

LISTOWEL; *Ballyhorgan*.—District in a healthy condition.

LISTOWEL; *Ballylongford*.—No case of infectious disease recorded in district during past quarter. Number of births, 32; number of deaths, 5, three of which were of females aged 67, 82, and 90 years; in all three cases deaths uncertified.

LISTOWEL; *Listowel, W.*—District healthy during past quarter.

LISTOWEL; *Tarbert*.—Only one death from tuberculosis during quarter.

TRALEE; *Castlemaine*.—District very healthy.

Limerick County and County Borough.

KILMALLOCK; *Bruff*.—There were 6 or 7 reported cases of diphtheria in Bruff during the last month of quarter. Out of this number there was one death, which took place on the way to hospital in the Kilmallock dispensary district. I believe the disease to be due to bad smells emanating from a dung heap in Dunne's Lane, where offal of cattle and sheep is thrown and left uncovered.

KILMALLOCK; *Bruree*.—One case of scarlatina. Otherwise district healthy.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

LIMERICK; *Anacotty*.—Sanitary arrangements good. There have been two cases of scarlatina in one electoral division, and five in another during the quarter.

LIMERICK; *Caherconlish*.—No deaths registered from cancer or tuberculosis. Of the eight deaths registered this quarter, five were over 80. There is one young fellow here suffering from tuberculosis. I am in communication with the medical officer of the county for the purpose of sending him to a sanatorium. There is also a girl who came from America affected. She was sent to Dublin some time ago from the Limerick Union, but was sent back again. It may be an incurable case.

LIMERICK; *Clarina*.—Two deaths registered from pulmonary tuberculosis. There has been no epidemic or infectious disease. Sanitary arrangements satisfactory.

LIMERICK; *Moroe*.—Sanitary arrangements good. District healthy. No death from tuberculosis; one from cancer.

LISTOWEL; *Glin*.—Influenza, with its usual complications, pneumonia and bronchitis, prevailed much in the district during the quarter just closed. I also had two cases of diphtheria during the three months, in which I used the anti-diphtheria serum, with happy results.

MITCHELSTOWN; *Galbally*.—Sanitary condition of district good.

NEWCASTLE; *Ardagh*.—Eczematous rashes amongst the children, and infantile diarrhoea prevailed.

NEWCASTLE; *Feenagh*.—The general health of the people in this district is good. The sanitary arrangements are fairly satisfactory.

RATHKEALE; *Askeaton*.—There was one death caused by pulmonary tuberculosis, one by cancer of rectum, and one by purpura hæmorrhagica and pneumonia. The district during the quarter was entirely free from the principal epidemic diseases.

RATHKEALE; *Pallaskenry*.—Sewerage system in Pallaskenry village undergoing much-needed improvement. District generally healthy.

RATHKEALE; *Rathkeale, No. 1, W.*—The district is healthy. Three deaths from tuberculosis registered.

RATHKEALE; *Rathkeale, No. 2*.—My district was in very healthy condition during quarter ended September 30th, and free from all contagious diseases.

TIPPERARY; *Grean*.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—The number of deaths registered 5, the lowest number ever registered in any quarter in this district.

BORRISOKANE; *CloghJordan*.—District healthy.

BORRISOKANE; *Terryglass*.—District very healthy.

NENAGH; *Newport*.—District healthy.

NENAGH; *Silvermines*.—District healthy.

NENAGH; *Toomyvara*.—The health of the district has been very good this quarter.

THURLES; *Templemore*.—District healthy.

THURLES; *Thurles, W.*—Mortality for quarter the lowest for twenty years.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter has been very good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good. No infectious or contagious disease prevalent during quarter. One death from pulmonary tuberculosis; patient had been in a sanatorium for a time, and went very fast after coming out.

CASHEL; *Killenaule*.—Health of district during past quarter has been very good.

CASHEL; *Kilpatrick*.—District healthy.

CLOGHEEN; *Caher*.—The sanitary state of district has been good during past quarter. No case of infectious disease occurred during that period.

CLONMEL; *Kilsheelan, No. 1*.—Seven cases of scarlet fever.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—The district was healthy during past quarter. Sanitary arrangements good and well carried out.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—Sanitary condition of district satisfactory. District free from infectious disease.

CLONMEL; *Ballymacarbry*.—Sanitary condition quite fair. No zymotic diseases. Health of district very good.

CLONMEL; *Kilsheelan, No. 2*.—District healthy.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

KILMACTHOMAS; *Bunmahon*.—District generally healthy.

LISMORE; *Cappoquin*.—Two cases of scarlet fever, one of enteric, and one of measles during the quarter.

WATERFORD; *Kilmeadan*.—During the past quarter the health of the district has been very good; no infectious diseases. Sanitary condition of district is good generally.

WATERFORD; *Waterford Rural No. 1*.—District healthy.

WATERFORD; *Waterford Urban No. 1, W.*—There has been some zymotic diarrhoea amongst children—fatal, however, only in a few cases of young infants. Some cases of scarlatina of a mild type have appeared during last month of quarter. District otherwise healthy.

WATERFORD; *Woodstown*.—The health of the district is very good.

YOUGHAL; *Ardmore*.—Healthy district.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—District fairly healthy.

ANTRIM; *Doagh*.—With the exception of a few cases of mild scarlatina, the district was free of infectious disease during the quarter.

ANTRIM; *Randalstown*.—No infectious disease reported in the district during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. There were several cases of scarlet fever in one part of the district early in the quarter, but no fresh case has occurred since 11th August.

BALLYCASTLE; *Ballycastle, W.*—District in a very healthy condition.

BALLYCASTLE; *Cushendall*.—District in excellent condition.

BALLYMENA; *Ahoghill*.—Health of district good.

BALLYMENA; *Ballymena, W.*—Typhoid fever epidemic in urban district since beginning of August.

BALLYMENA; *Broughshane*.—The health of the district is good.

BALLYMENA; *Clogh*.—District very healthy.

BALLYMENA; *Galgorm*.—Sanitary condition of district is good.

BALLYMENA; *Glenwhirry*.—Public health good. No infectious disease originated in district. One case of typhoid fever occurred, but infection was contracted in Ballymena urban district.

BALLYMENA; *Portglenone*.—The health of this district is good.

BALLYMENA; *Toome*.—District is in a good sanitary condition.

BALLYMONEY; *Bushmills*.—Two of the uncertified deaths were cases of premature birth.

BALLYMONEY; *Dervock*.—Two cases of enteric fever occurred in the last month of the quarter, the infection in one case being due, without doubt, to a "typhoid carrier."

BALLYMONEY; *Dirraw*.—A few cases of diphtheria in past quarter; no fresh cases.

BELFAST; *Belfast Rural, No. 4*.—The sanitary arrangements are good for a rural district, and housing conditions in particular are very much improved.

LARNE; *Waterfoot*.—The district is very healthy.

LISBURN; *Dunmurry*.—The health of the district has been, on the whole, good. There has been a fair number of cases of scarlatina of a mild type during the past quarter, none of which were fatal.

LISBURN; *Glenavy*.—During the quarter there were seven cases of diphtheria in three families, with one death; two cases of scarlatina. With these exceptions, the health of the district has been good. Only seven deaths were registered, five of these being of persons aged 65 years and upwards.

LISBURN; *Lisburn, W.*—Epidemic infantile diarrhoea very prevalent in urban district during September.

Armagh County.

ARMAGH; *Armagh, W.*—The death rate from cancer is very high; some of these cases came into workhouse and infirmary from places outside my district.

ARMAGH; *Blackwatertown.*—The district is seldom free of either pulmonary tuberculosis or cancer.

ARMAGH; *Markethill.*—Scarlet fever is still prevalent in the district. There were three cases of polio-myelitis at Glennane.

ARMAGH; *Rich Hill.*—District has been very healthy during last quarter. Practically no summer diarrhæa amongst the children this year.

ARMAGH; *Tynan.*—The health of the district is all that could be desired.

LURGAN; *Lurgan, No. 2.*—This district is in a good healthy condition and free from any infectious disease.

NEWRY; *Meigh.*—District healthy.

NEWRY; *Mullaghglass.*—District healthy.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 3.*—Epidemic diarrhœa was very prevalent among infants, who were mostly fed on cows' milk.

BELFAST; *Belfast Urban, No. 11.*—The health of the district is good. There was a considerable number of cases of diarrhœa in young children during the quarter, and a few cases of scarlatina.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—Mild epidemic of scarlatina, which has now practically disappeared. Otherwise district healthy.

CAVAN; *Bellananagh.*—District fairly healthy during current quarter, with the exception of a slight epidemic of enteric fever of a very mild type.

CAVAN; *Belturbet.*—The health of district good.

CAVAN; *Killeshandra.*—No death registered during the quarter of tuberculous disease or cancer. District healthy.

COOTEHILL; *Drum, No. 2.*—In general, the sanitary condition of the district is good.

COOTEHILL; *Tullyvin.*—Three-fourths of the deaths registered during quarter were of persons aged 65 years and upwards.

ENNISKILLEN; *Dowra.*—Sanitary condition of district fairly good.

ENNISKILLEN; *Holywell, No. 2.*—The public health of the district is good, only three deaths registered.

GRANARD; *Finnea, No. 2.*—District very healthy.

GRANARD; *Scrabby, No. 1.*—Health of district fairly good. One death from pulmonary tuberculosis recorded.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra.*—The sanitary conditions of district good.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely.*—Health of district good.

DONEGAL; *Laghey.*—District healthy.

DONEGAL; *Mountcharles.*—District healthy.

DONEGAL; *Pettigo.*—The district has been healthy during the quarter.

DUNFANAGHY; *Crossroads.*—District free from any form of infectious disease during the quarter.

DUGFANAGHY; *Dunfanaghy, W.*—District healthy.

GLENTIES; *Ardara.*—Whooping-cough was rife during this quarter. There were a few cases of scarlatina of a mild type.

INISHOWEN; *Clonmany.*—District healthy.

INISHOWEN; *Malin.*—There were a few cases of measles and a number of cases of scarlatina in district during quarter. The scarlatina was complicated with very severe sore throats, which generally festered, and had to be lanced. There were two deaths from this disease.

LETTERKENNY; *Church Hill.*—District healthy. No epidemic.

LETTERKENNY; *Manorcunningham.*—The district is quite healthy at present.

LONDONDERRY; *Killea.*—There was a mild epidemic of scarlet fever, probably introduced from a neighbouring district, which has now been stamped out.

MILLFORD; *Fanad.*—Health of district good; no cases of infectious disease. Death from measles registered occurred in previous quarter.

MILLFORD; *Rathmullan.*—The district has been healthy during quarter.

MILLFORD; *Rosguill.*—Of the eleven deaths registered during the quarter, seven were 60 and upwards. During the last six months I have attended three cases of typical lobar pneumonia in the same household at intervals of two and three months, illustrating the infective process. Whooping cough prevalent in part of district.

STRABANE; *Raphoe.*—Tuberculosis rather prevalent. Sanitation good.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. District healthy. One of the deaths registered reached the advanced age of 98 years.

STRANORLAR; *Killygordon.*—Fewer deaths registered in this quarter than in any previous quarter in my time here. Sanitation good and no epidemics.

Down County.

BANBRIDGE; *Ballyward.*—The district is particularly free from disease.

BANBRIDGE; *Dromore.*—The health of the district is good.

BANBRIDGE; *Loughbrickland.*—There was an epidemic of diphtheria. The source of infection was in a district in Co. Antrim, to the best of my knowledge.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of chicken-pox in the district during the quarter; also three cases of scarlet fever and one of diphtheria.

DOWNPATRICK; *Killyleagh*.—The health of the district is excellent. There is no epidemic, and the death-rate is very low.

DOWNPATRICK; *Portaferry*.—Health of district very good. One case of scarlet fever occurred during quarter and died.

KILKEEL; *Rosstrevor*.—The health of the district has been remarkably good. No epidemics; no infectious disease at all, in fact. Sanitary arrangements quite satisfactory.

LISBURN; *Annahilt*.—The sanitary condition of the district is good. There are no cases of infectious disease.

LISBURN; *Drumbeg*.—Births about the average. Deaths under the average.

LISBURN; *Hillsborough*.—District particularly healthy.

LISBURN; *Saintfield*.—During the past quarter the health of the district has been very good. No infectious disease. Sanitary arrangements good.

LURGAN; *Moir*.—An extensive epidemic of measles has been in the northern end of the district during the past quarter. I recommended the closing of the national school, which was done for a week with doubtful effect.

LURGAN; *Waringstown*.—During the quarter eight cases of scarlet fever were reported to me, not in one part of the district, but more of them on the south towards Banbridge district. As far as I know there has been no death.

NEWRY; *Donaghmore*.—Health of district good.

NEWRY; *Rathfriland*.—The sanitary condition of the district is good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Public health good.

NEWTOWNARDS; *Comber*.—Scarlatina has been very prevalent of a mild type, and almost all removed to hospital.

NEWTOWNARDS; *Donaghadee*.—District health good.

NEWTOWNARDS; *Kilmood*.—District free from infectious disease at present.

NEWTOWNARDS; *Newtownards, W.*—The general health of the district has been good. Ten urban and one rural case of scarlatina were notified. Nine of the eleven went to hospital. The other two were well isolated. There have been a number of cases of zymotic enteritis during September, not so many, however, as used to be at this time of year.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—Sanitary condition fairly good.

ENNISKILLEN; *Florencecourt*.—No epidemics during the quarter. Sanitary condition of district fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1*.—The public health of district is good.

IRVINESTOWN; *Clonelly*.—The district has been healthy during the quarter.

IRVINESTOWN; *Ederney*.—District healthy.

IRVINESTOWN; *Irvinestown, W.*—District healthy. One case of scarlatina admitted to fever hospital from Trillick dispensary district.

LISNASKEA; *Lisnaskea, W.*—Death rate very low during quarter; no infectious disease prevalent; all deaths, except four, were of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy.

COLERAINE; *Garvagh*.—A number of cases of mumps have appeared during last half of the quarter; otherwise the health of the district is good. The percentage of female births is rather remarkable, eighteen, to four males. During the last six months four sets of twins have been born in the district.

COLERAINE; *Kilrea*.—District at present healthy. One case of scarlatina and one of diphtheria broke out in this district during the quarter—each ending in complete recovery. Owing to strict sanitary precautions, these diseases did not spread further, either in their respective households, or amongst others in the neighbourhood.

COLERAINE; *Portstewart*.—Health of the district good. Most deaths registered were those of persons aged 65 years and upwards. Three cases of scarlet fever and two cases of measles occurred, but did not spread so as to constitute an epidemic.

LIMAVADY; *Ballykelly*.—One case of scarlatina in district during the quarter.

LIMAVADY; *Beilarena*.—One case of faucial diphtheria in the Aghanloo division. No spread of the disease yet.

LIMAVADY; *Dungiven*.—Four cases of diphtheria reported; all cases were sent to hospital.

LIMAVADY; *Limavady, W.*—There has been an outbreak of scarlatina in rural part of district.

LONDONDERRY; *Eglinton*.—No case of tuberculosis, or malignant tumours; one case of drowning in river Foyle.

MAGHERAFELT; *Moneymore*.—During quarter there were a good many cases of mumps, with no fatality; otherwise district has been healthy, with the exception that there have been six cases of typhoid fever, having no connection with one another. This was to be expected after the epidemic we had a year ago. They were all removed to hospital, with no further spread of disease.

Monaghan County.

CARRICKMACROSS; *Donaghmoyne*.—District in a health condition, and nothing calling for special notice.

CASTLEBLAYNEY; *Ballybay*.—Continued negligence in sanitary matters prevails. Enteritis and diarrhoea in children and sporadic diphtheria have not been infrequent.

COOTEHILL; *Dawsongrove*.—Two cases of diphtheria occurred during the quarter. The sewerage in one village is defective, otherwise district in fair sanitary condition.

COOTEHILL; *Drum No. 1*.—The sanitary condition of this district is fair. No births were registered during the quarter.

MONAGHAN; *Castleshane*.—District sanitary. No epidemic of any kind.

MONAGHAN; *Emyvale*.—Health of district very good this quarter.

MONAGHAN; *Kilmore*.—A large number of cases of diarrhoea among adults. Some cases of mumps. One case of scarlatina, source unknown.

MONAGHAN; *Monaghan, W.*—Judging from the number of deaths, the general condition of this district is satisfactory.

Tyrone County.

CASTLEBERG; *Castleberg, W.*—District in a healthy condition.

CASTLEBERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, there being no infectious disease of any sort during the quarter.

CASTLEBERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Fivemiletown*.—The health of the district has been good during the quarter. Both birth and death rates were below average.

COOKSTOWN; *Coagh*.—District very healthy and free from any zymotic disease. Poliomyelitis, which was prevalent during this period last year, has entirely disappeared.

COOKSTOWN; *Stewartstown*.—District very healthy.

DUNGANNON; *Benburb*.—Sanitary condition of district very good.

DUNGANNON; *Caledon and Ballymagran*.—Health of community very good. One case of scarlatina (mixed infection). No other zymotic disease in district.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements in the district very good. No infectious disease.

DUNGANNON; *Coal Island*.—The health of the district as a whole is good.

OMAGH; *Drumquin*.—Occasional cases of scarlet fever and diphtheria occurred during the quarter. Health of district otherwise is generally good. Sanitary condition fair.

OMAGH; *Fintona*.—The health of the district has been very good during the past quarter, and (with the exception of three reported cases of mild scarlatina) free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. Sanitary conditions—urban fairly satisfactory, rural unsatisfactory (manure heaps and cess pools contiguous to dwellings). Uncertified deaths; ages—6 ranged from 73 to 97 years.

OMAGH; *Omagh, No. 2*.—The district is in good sanitary condition. No epidemic of any kind.

OMAGH; *Sixmilecross*.—District in good sanitary order. One case of typhoid fever.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Laurencetown*.—The general health of the district is good.

CLIFDEN; *Inishbofin*.—The district is at present in a healthy condition.

CLIFDEN; *Roundstone, No. 1*.—District fairly healthy.

CLIFDEN; *Roundstone, No. 2*.—Health of district satisfactory.

GALWAY; *Galway, No. 3 (Arran)*.—District very healthy.

GALWAY; *Moycullen*.—District continues healthy.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—District healthy. One death registered at 96 years.

GALWAY; *Turloughmore*.—District healthy.

GORT; *Kinvarra*.—The health of the district is good.

LOUGHREA; *Bullaun*.—Three of the ten deaths registered were of persons aged 77, 83, and 91 years.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district good; no epidemic disease present.

OUGHTERARD; *Lettermore*.—The district is in a fairly healthy state at present.

OUGHTERARD; *Oughterard, W.*—During the quarter there has been an outbreak of measles at far end of district. Some cases of chicken-pox in village of Oughterard, one case of scarlatina; otherwise the district is healthy.

PORTUMNA; *Portumna, No. 1, W.*—Sanitary condition of district fairly good.

TUAM; *Tuam No. 1, W.*—Health of district was good during the quarter. There were two cases of diphtheria, one of which died.

TUAM; *Tuam, No. 2*.—There were 14 deaths registered this quarter; one was aged 36 years, a woman who died of childbirth, and one man was 69 years. The other twelve were well over 70 years, and three of these were well over ninety. District healthy; a few cases of pertussis in outlying farmhouses.

Leitrim County.

CARRICK-ON-SHANNON; *Drumshanbo*.—District healthy, and in good sanitary condition.

CARRICK-ON-SHANNON; *Jamestown, W.*—There has been an epidemic of measles in the district during quarter.

MANORHAMILTON; *Manorhamilton, W.*—A few cases of scarlatina have occurred.

MOHILL; *Carrigallen*.—The district has been healthy during the quarter. Sanitation fair. But few deaths occurred, only three of which were registered.

MOHILL; *Mohill, W.*—No complaints as regards sanitary arrangements. District healthy.

MOHILL; *Rinn*.—The district is healthy and free from epidemics.

MOHILL; *Rowan*.—District healthy. No epidemic disease.

Mayo County.

BALLINA; Ballina, W.—Measles and whooping cough have been prevalent amongst children during the quarter. Eleven deaths from the former, and three from the latter registered. Ten deaths from various forms of tuberculosis and five from cancer recorded.

BALLINA; Crossmolina.—District continues free from infectious diseases.

BALLINROBE; Ballinrobe, W.—The sanitary condition of the district is good. The district is free from any outbreak of infectious diseases.

BALLINROBE; Cappaghduff.—Sanitary arrangements fair. No infectious diseases.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Births and deaths under the average. The general health of the people was good for the quarter.

BELMULLET; Binghamstown, W.—District in a satisfactory state.

BELMULLET; Knocknallower.—The district was free from any infectious disease till quite recently one case of typhoid fever occurred. The patient's house has been disinfected, and no further cases have been under observation. Skin disease among children very prevalent; otherwise the district is in a fairly sanitary condition.

CASTLEBAR; Balla.—District healthy.

CASTLEBAR; Castlebar, No. 1, W.—Epidemic of whooping-cough was prevalent in early part of quarter. District is practically free from same now.

CASTLEBAR; Castlebar, No. 2.—The sanitary arrangements are fairly satisfactory.

CLAREMORRIS; Ballindine.—District healthy.

CLAREMORRIS; Ballyhaunis.—Health of district good, save for a severe epidemic of pertussis. Sanitation progressive. Three cases of cancer of stomach.

KILLALA; Killala, W.—The health of the district during the quarter has been satisfactory. With the exception of a few cases of measles there was no infectious disease prevalent in the district.

SWINEFORD; Swineford, W.—There has been a mild outbreak of whooping cough during past quarter. The general health of the district is otherwise good.

WESTPORT; Ballycroy.—An epidemic of catarrhal jaundice (during quarter) amongst children and young adults.

WESTPORT; Islandeady.—The sanitary arrangements are good.

WESTPORT; Newport.—Six cases of scarlatina occurred during quarter in district, and one case of enteric. Sanitation in town not at all satisfactory.

WESTPORT; Westport, W.—No deaths from tuberculosis during the quarter; weather was exceptionally good, temperate, dry, and free from sudden changes.

Roscommon County.

ATHLONE; Brideswell.—Sanitary condition, in my opinion, favourable. Health of district normal.

ATHLONE; Kiltoom.—Health of district good. Sanitary condition satisfactory.

BOYLE; Boyle, No. 1, W.—Measles has been prevalent.

BOYLE; Keadew.—Whooping-cough very prevalent during the quarter.

CARRICK-ON-SHANNON; Aughrim.—The sanitary condition of the district is good. With the exception of a few cases of measles, the district is free from infectious disease.

CASTLEBEECH; Loughglinn.—The past quarter has been the healthiest on record since the formation of this district. There has been no death from any form of tubercular disease or cancer. This district has been ravaged by epidemics of measles and whooping-cough and a few sporadic cases of scarlatina. The people are waking up to the fact that light and air in their homes means good health.

STROKESTOWN; Roosky.—District healthy. One death each from cancer of hip, and tuberculosis of lungs.

STROKESTOWN; Strokestown, W.—There was one death from typhus fever. The sanitary condition of district is good.

Sligo County.

BOYLE; Gurteen.—District healthy.

DROMORE WEST; Castleconer.—The number of deaths appear to be abnormally below the average.

DROMORE WEST; Easky, W.—Health of district very good. Only one case of diphtheria reported during quarter. The number of deaths registered is the smallest since I took charge of district 11 years ago.

SLIGO; Collooney.—A good many cases of measles during quarter. No deaths.

SLIGO; Riverstown.—There was a rather extensive outbreak of measles during the quarter, with two deaths. A family of seven contracted typhoid.

TOBERCERRY; Aclare.—Sanitation improving.

TOBERCERRY; Coolaney.—District healthy; sanitation satisfactory.

TOBERCERRY; Tobercurry, W.—The health of the district generally is very good. A few cases of enteric occurred in the town, due to the defective sanitation.

1914.]
4th Quarter.

No. 204.

QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—JULY, AUGUST, SEPTEMBER, 1914.

Births and Deaths:—OCTOBER, NOVEMBER, DECEMBER, 1914.

During the quarter ended 31st December last, there were registered in the 831 Registrars' Districts in Ireland 23,570 births—a number equal to an annual birth-rate of 21·5 in every 1,000 of the estimated population*—and 17,504 deaths, representing an annual rate of 16·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,257 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 22·2 in every 1,000 of the estimated population, and the death-rate 13·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 below the average rate for the corresponding quarter of the ten years, 1904–1913, but 0·2 above the rate for the fourth quarter of 1913. The deaths are 996 above those registered in the corresponding quarter of 1913; the death-rate is 0·9 above the rate for that quarter, and equal to the average for the fourth quarter of the ten years, 1904–1913.

In comparison with those for the corresponding quarter of 1913, the returns of pauperism furnished by the Local Government Board show a decrease of 1,837 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 84 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years, 1904–1913, the number of Workhouse inmates shows a decrease of 7,679, and the number of persons on out-door relief shows a decrease of 13,002, the total under both heads being 22·4 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·2 per cent.

* See page 288.

The annual rate (5·1 per 1,000 of the population) represented by the marriages registered during the third quarter of 1914, is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th September, 1914, and by the BIRTHS and DEATHS registered in the Quarter ended 31st December, 1914.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

MARRIAGES.

The Marriages (5,617) registered in Ireland during the third quarter of 1914 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1913, and 0·2 above the average rate for the third quarter of the ten years 1904–1913. Of the total number of marriages, 3,772 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,845 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·5 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·3 above, and that under the latter heading 0·1 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1904–1913, and the average number for that period, also the number registered in the first, second, and third quarters of 1914.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 23,570—12,034 boys and 11,536 girls—being equal to an annual ratio of 1 in every 46.5, or 21.5 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1904–13, was 24,066, equivalent to an annual rate of 21.9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22.2 per 1,000 of the population according to the Census of 1911; Munster, 20.1; Ulster, 22.1; and Connaught, 20.7.

The highest county or county borough birth-rate* is 30.7 for Dublin county borough, and the lowest 15.9 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 26.5; Limerick county and county borough, and Mayo, 23.2; Donegal, 22.1; and Londonderry county and county borough, 22.0. The lowest five are—Clare, 17.7; Wexford and Roscommon, 17.9; Westmeath 18.3; and Leitrim, 18.7.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 17,504—8,813 males and 8,691 females—affording an annual ratio of 1 in every 62.6, or 16.0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1904–13, was 16.0 per 1,000.

The death-rate in Leinster was 17.6 per 1,000 of the population according to the Census of 1911; in Munster, 15.1; in Ulster, 16.4; and in Connaught, 13.0.

The county or county borough death-rates* range from 11.4 in Roscommon to 24.3 in Dublin county borough. Between these rates the lowest five are—Clare, 11.6; Leitrim, 11.7; Kerry, 12.1; Mayo, 12.3; and Louth, 13.3; and the highest six are—Belfast county borough, 18.3; Limerick county and county borough, 17.8; Waterford county and county borough, 17.6; and Wexford, Tipperary, S.R., and Armagh, 16.8 each.

* See note (*) on page 224.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1904–1913, and the average number for that period; also the number registered during each quarter of the year 1914 :—

AGES.—Of the 17,504 deaths registered last quarter, 2,066, or 11·8 per cent., were of infants under one year of age; and 7,248, or 41·4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 87·7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 12·9 per cent. of the total deaths registered therein; in Munster, 11·9 per cent.; in Ulster, 12·0 per cent.; and in Connaught, 8·3 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 36·7 per cent.; in Munster, to 42·9 per cent.; in Ulster, to 40·7 per cent.; and in Connaught, to 53·0 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,067, and is equivalent to an annual rate of 0·97 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the December quarter of 1914, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1909–1913.

Name of Disease.	Number of Deaths in December quarter, 1914.	Average number of Deaths in December quarter of the 5 years, 1909–1913.
Enteric Fever,	80	77
Typhus,	12	11
Small-pox,	—	—
Measles,	159	157
Scarlet Fever,	166	84
Whooping-cough,	139	166
Diphtheria,	100	88

* See note (†) on page 231.

ENTERIC FEVER.—There were 80 deaths from enteric fever registered during the December quarter of 1914 in the whole of Ireland; these represent an annual rate of 0·07 per 1,000 of the population estimated to the middle of the year. In each of the three preceding quarters deaths from enteric fever were 59, 57, and 75 respectively and the average for the corresponding quarter of the 5 years, 1909–1913, was 77. Of the total deaths (80), there were 22 registered for Dublin county borough.

TYPHUS.—The number of deaths from typhus was 12, as compared with the average 11, and 5 deaths registered during the September quarter of the year. The deaths were registered in the following Unions:—In Ballina, 5; in Cahirsiveen, 2; in Cork, one; in North Dublin, 2; in Galway, one, and in Portumna, one death.

SMALL-POX.—No report of the occurrence of small-pox in Ireland was received during the period under notice.

MEASLES.—Deaths from measles, which in the three preceding quarters were 223, 452, and 167 respectively, declined to 159 in the December quarter of the year, the average being 157. The deaths correspond to an annual rate of 0·15 per 1,000. In 26 of the 159 unions of Ireland one or more deaths from measles were registered; among these, 8 deaths were registered in Ballina, 108 in Belfast, and 5 in Larne.

SCARLET FEVER.—There was an increase in the mortality from scarlet fever, as compared with the average 84 and the deaths in the three quarters preceding 138, 93, and 75, the deaths in the period under notice rising to 166; this latter figure is equal to an annual rate of 0·15 per 1,000. Of the deaths 24 were registered in Belfast, 12 for Dublin county borough, 23 in Lisburn union (18 of which belonged to Belfast county borough), and 33 in Waterford union.

WHOOPING-COUGH.—The deaths from whooping-cough numbered 139 and represent a rate of 0·13 per 1,000; in the corresponding quarter of the past 10 years these deaths averaged 166, and in the September quarter of 1914 there were 163 deaths from this disease registered. Of the deaths, 8 were for Dublin county borough, 29 were for Cork county and county borough, 42 were in Belfast county borough, there were 11 in county Galway and 15 in county Mayo.

DIPHTHERIA.—The deaths from diphtheria increased from 60 in the quarter preceding to 100 in the period under notice; the latter figure is equal to an annual rate of 0·09 per 1,000, and is 12 over the average for the corresponding period in the 5 years preceding. Of the deaths 13 were for Dublin county borough, 7 in the union of Kilkenny, and 6 in the union of Larne.

DIARRHŒAL DISEASES.—There were altogether 411 deaths from diarrhœal diseases; of this figure, 342 deaths were assigned to diarrhœa and enteritis of children under 2 years of age. This latter figure represents an annual death rate of 0·31 per 1,000 of the population.

TUBERCULOUS DISEASE.—The Registrars' returns give the number of deaths from tuberculous disease as 2,005, a number equal to an annual rate of 1·83 per 1,000 of the population; in the corresponding quarter of the year 1913 the number of deaths as returned by the Registrars was 1,921.

CANCER.—The mortality from cancer (892 deaths) represents a rate of 0·81 per 1,000; in each of the three quarters preceding the figures returned represent the rates of 0·80, 0·79, and 0·80 per 1,000.

VIOLENCE.—Among the deaths returned, there are included those occurring from accident and negligence, from homicide and from suicide; these in the aggregate numbered 230.

The Registrars, in their Notes, report the presence of the following diseases:—Enteric fever in 15 districts, typhus in 2, measles in 31, scarlet fever in 61, whooping-cough in 26, diphtheria in 24, mumps in 7, German measles in one, influenza in 14, pyrexia in one, varicella in one, and polio-myelitis in one. [See Appendix to this Report commencing on page 289.]

INQUESTS.—There were 387 inquests reported to the Registrars during the quarter; this number being equal to one in every 45 of the total deaths registered.

In Leinster there was one inquest to every 48 deaths registered, in Munster one to 51, in Ulster one to 36, and in Connaught one to 86.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 17,504 deaths registered, 3,701, or 21·1 per cent., occurred in public institutions. In Leinster the percentage was 29·9, in Munster 23·8, in Ulster 15·2, and in Connaught 12·6.

UNCERTIFIED DEATHS.—According to the returns, 3,870 of the 17,504 deaths which were registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 26, in Ulster 18, and in Connaught the uncertified deaths were 46 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1914, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Total	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrheal Diseases.

TABLE V.—URBAN DISTRICTS.

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 19.7, and the birth-rate 26.1 per 1,000 of the population; in the remainder of the country the death-rate was 14.1 and the birth-rate 19.3 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 2.1 per 1,000 of the population; in the remainder of the country the rate was 0.4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1914, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the fourteen weeks ending Saturday, 2nd January, 1915.

^a Including the deaths of 7 persons from enteric fever, 18 from scarlet fever, 4 from diphtheria, and one from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at

† Enteric fever, typhus, small-pox measles, scarlet fever, whooping-cough, diphtheria, dysentery, and diarrhoeal diseases.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, dysentery, and quarantined diseases.
+ The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1914.
+ The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1914.

++

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1914, there were 17,733 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 3,257 (1,964 males and 1,293 females), being 1,304 less than in the corresponding quarter of the year 1913, and 1,843 below the average number for the fourth quarter of the ten years 1904–1913.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1913 and 1914 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.	1913.	1914.	In-crease.	De-crease.
October,	1,262	1,399	137	—	1,717	932	—	785	2,979	2,331	—	648
November,	598	408	—	190	553	262	—	291	1,151	670	—	481
December,	263	157	—	106	168	99	—	69	431	256	—	175
TOTAL,	2,123	1,964	—	159	2,438	1,293	—	1,145	4,561	3,257*	—	1,304

* Including 2,663 emigrants to the United States of America, viz. :—2,105 in the month of October, 457 in November, and 101 in December. Of 2,392 steerage passengers, 397 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1913 the average price was $6d.$, and in the corresponding quarter of 1904 it was also $6d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 16s. per cwt. For the corresponding quarter of the year 1913 the average price was 16s., and for the fourth quarter of 1904 the average price was 14s. $6d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. $11d.$ to 3s. $9d.$ In the fourth quarter of 1913 the average prices were 2s. $11d.$ to 3s. $3d.$, and the prices for the corresponding quarter of 1904 were 2s. $6d.$ to 3s. $0d.$

The average price per cwt. of beef at the Dublin Cattle Market was 48s. $6d.$ to 67s. $6d.$, as against 48s. to 64s. for the fourth quarter of 1913, the price for the fourth quarter of 1904 ranging from 45s. $6d.$ to 53s.

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 23s. to 26s. per ton nett.

Owing to the financial situation created by the European war, the Dublin Stock Exchange has been closed during the quarter and there is no official record of any dealings. The minimum price for Consols fixed by the London Stock Exchange (in conjunction with the Treasury) was £68½. No official record of prices has been made since that date.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was 4 per cent. on 1st July, was raised to 4½ per cent. on 30th July, and to 10 per cent. on 1st August, falling to 6 per cent. on 6th August, and to 5 per cent. on 8th August. There has been no alteration in the rate during the last quarter of 1914.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1914 was 34,060 or 1,837 below the average for the corresponding period in 1913.

The average weekly number of persons receiving out-door relief during the quarter was 37,440, being 84 below the average for the fourth quarter of 1913.

Of the persons receiving in-door relief during the fourth quarter of 1914, an average number of 1,666 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1913 the average weekly number was 1,662.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1914, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.	
									No. OF PERSONS RELIEVED.	
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			In-door.	Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1909 to 1914, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 239).

The mean height of the barometer during the fourth quarter of 1914 was 29·881 inches, being 0·189 above the average for the corresponding quarter of the five years 1909–1913; the highest reading (30·616 inches) was on the 18th November at 9 P.M., and the lowest (28·749 inches) on the 13th December at 9 P.M.

The mean temperature of the air during the quarter was 44·0°, being 0·7° below the average for the fourth quarter of the 5 years, 1909–1913.

The maximum temperature of the air during the quarter was 66·0° and the minimum 16·7°. The maximum heat in sun was 111·3°.

Rain fell on 59 days during the quarter. The rain-fall measured 12·020 inches being 3·535 inches above the average for the fourth quarter of the five years, 1909–1913. The greatest monthly rainfall was in December, when 6·520 inches were registered.

October.—The mean height of the barometer during this month was 30·034 inches; the highest reading (30·499 inches) was on the 4th, at 9 P.M.; and the lowest (29·294 inches) on the 31st, at 9 P.M. The mean temperature of the air was 49·5°, the maximum registered was 66·0°, and the minimum 29·7°. The 26th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 50·3° and of the wet bulb, 49·3°. The maximum heat in the sun was 111·3°, and the minimum on the grass 26·0°. The total amount of sunshine recorded was 74·5 hours, the greatest daily amount being 7·6 hours on the 26th. The minimum on the grass was below 30° on 2 nights. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 13 days. The rain-fall measured 1·675 inches; the greatest amount in 24 hours was 0·500 inch on the 31st.

November.—The mean height of the barometer during this month was 30·152 inches; the highest reading (30·616 inches) was on the 18th, at 9 P.M., and the lowest, (29·006 inches) on the 15th, at 9 A.M. The mean temperature of the air was 43·5°, the maximum registered was 56·8°, and the minimum 20·9°. The 16th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 43·1°, and of the wet bulb 41·8°. The maximum heat in sun was 90·8°, and the minimum on the grass 18·9°. The total amount of sunshine recorded was 72·3 hours, the greatest daily amount being 7·0 hours on the 16th. The minimum on the grass was below 30° on 8 nights. The maximum ozone was 0·10, the minimum 0·0, and the mean 0·6. Rain or snow fell on 23 days. The rain-fall measured 3·825 inches; the greatest amount in 24 hours was 0·395 inch on the 27th.

December.—The mean height of the barometer during this month was 29·457 inches the highest reading (30·207 inches) was on the 24th at 9 A.M., and the lowest (28·749 inches) on the 13th, at 9 P.M. The mean temperature of the air was 39·0°, the maximum registered was 53·9°, and the minimum 16·7°. The 1st was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 38·6°, and of the wet bulb 37·0°. The maximum heat in sun was 60·5°, and the minimum on the grass 16·5°. The total amount of sunshine recorded was 59·0 hours, the greatest daily amount being 6·3 hours on the 31st. The minimum on the grass was below 30° on 13 nights. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 23 days. The rain-fall measured 6·520 inches; the greatest amount in 24 hours was 1·170 inches.

THE YEAR 1914.

The total number of births registered in Ireland during the year 1914 (as returned by the Registrars) was 99,082, or 22·6 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 71,664, or 16·4 per 1,000. Of the 71,664 deaths, 4,355, equal to 1·0 per 1,000 living, were caused by one or other of the principal epidemic diseases.† In the Urban Districts, which contain nearly one-third of the total population, the birth-rate was 26·7 per 1,000 of the population; the death-rate (all causes), 19·2, and the epidemic death-rate, 2·1 per 1,000. The corresponding rates for the remainder of the country are—births, 20·5; deaths from all causes, 15·0; and deaths from the principal epidemic diseases, 0·5. According to the returns of Vaccination furnished by the Registrars there were 67,348 successful primary vaccinations performed during the year.

URBAN DISTRICTS.

TABLE VIII.—BIRTHS and DEATHS registered during the YEAR 1914, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area.” consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-three weeks ending Saturday, 2nd January, 1915.

METEOROLOGY.

[Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D.,
Sc.D., F.R.S.]

The mean temperature for the quarter as a whole differed very little from the normal, but was generally above it during the earlier weeks and below it subsequently. In the north the mean was just a degree lower than that in the south. After the dry weather of October rain fell very frequently; but the total fall was very little above the average in the northern division of the country. In the south, however, the aggregate fall, 14.9 in., exceeded the average by 2.5 in. In both districts the number of days with rain was rather less than the average. The duration of bright sunshine was at no time abnormally prevalent, and was seldom very deficient. The total for the period differed very little from the average, and the south had a mean per day 0.6 hour higher than the north.

OCTOBER.—The weather was very quiet and dry for the time of year. There was an almost complete absence of the stormy winds from the Atlantic which usually render October a rough and rainy period, and the wind was mostly light and frequently variable in direction.

Rainfall—Until the last week there was very little rain over the country generally, many places experiencing partial drought through a considerable period. At Waterford there was no rain until the 20th, except 0.02 in. on the 6th and 0.03 on the 12th, and at Newcastle, Co. Wicklow, no rain until the 12th. An exception occurred locally on the 11th, when the large amount of 2.5 in. fell at Valencia. During the last week rain fell almost daily, and was heavy on the 25th; at Lisburn there was as much as 1.2 in. In the north of Ireland the total rainfall for the month was 1.8 in., a deficit of 2.1 in., and in the south 2.4 in., a deficit of 1.5 in. In both divisions rain fell on 13 days.

Temperature exceeded the normal for the month as a whole, but was a little below it during the last week. The warmest day over the country generally was the 3rd, while the coldest nights were the 15th, 29th, and 30th. The mean temperature for the period over the northern half of the country was 50.5°, and in the south 51.4°, the former being 2.4° above the normal, and the latter 1.9° above.

Sunshine—Although the weather was generally dry it was by no means bright, and the total number of hours of sunshine was less than usual. In Ireland North there was a daily mean of 2.4 hour, equal to a deficit of 0.5 hour per day. In Ireland South, where the daily mean was 3.2 hour, the deficit was only 0.07 hour per day. The brightest week was the last, after the general character of the weather had become rainy and unsettled.

NOVEMBER.—The weather generally was rather rough and often rainy, the wind frequently becoming strong or rising to a gale from some point between South and West. There was, however, a period beginning on the 16th and continuing till the 23rd, when the conditions were both quiet and dry.

Rainfall.—Rain fell on 21 days over the country generally, but heavy falls were rare in the south and not frequent in the north. In the northern division the total was 4.3 in., an excess on the average of 0.3 in., but in the south it was only 3.9 in., or 0.3 in. less than the average. At Roche's Point the total fall, 3.11 in., was only 66 per cent. of the normal, at Killarney the percentage was 90, and at Dunfanaghy, 74. In Ireland generally the total rainfall, expressed as a percentage of the average, was 124. Local thunderstorms were experienced from time to time, namely, at Valencia on the 1st, Dublin on the 2nd, Markree Castle on the 11th and 12th, again at Markree Castle on the 26th, and also at Dunfanaghy; and on the 30th at Markree Castle and Carrick-on-Suir.

Temperature underwent many fluctuations, but was generally high for the time of year until the 14th, then low until the 24th, and finally high again. The warmest days occurred in most places on the 8th or 9th, when the thermometer rose above 55° very generally and touched 63° at Killarney. During the colder spell the maximum readings inland were sometimes below 40° , while the minima of the night were many degrees below freezing point, except on some exposed points of the coast. The sharpest frost occurred about the 15th, when the thermometer recorded a reading of 21° at Clongowes Wood and Phoenix Park, 23° at Birr, Newtownforbes, and Armagh, and 17° at Markree Castle. For the month as a whole the mean temperature was 44.5° in the north, and 45.4° in the south, the former value being 0.4° above the normal and the latter 0.2° below it.

Sunshine exceeded the normal by a few minutes per day. In the north the daily mean amount was 2 hours, and in the south 2.3 hours.

DECEMBER.—The month was characterized by wet and stormy weather. Few days passed without more or less rain over the whole country, and gales or strong winds from between south and south-west were of frequent occurrence. The force of the wind was sometimes very great, especially along the western and southern coasts. The highest velocity occurred at Quilty on the 4th, when one of the gusts attained the rate of 41 m/s. (92 miles per hour).

Rainfall—Heavy downpours of rain exceeding an inch were experienced from time to time in various districts. On the first day of the month as much as 2 in. fell at Killarney, on the 2nd 1.4 in. at Seskin, Carrick-on-Suir, and on the 3rd a further 1.4 in. at Seskin and 1.5 in. at Waterford. On the 11th 1.6 in. fell at Rathmines and 1.2 in. at Dublin and Lisburn; on the 20th 1.1 in. at Belfast, on the 25th 1.4 in. at Roche's Point, 1.5 in. at Waterford, and 1.6 in. at Seskin, and on the 30th, 1 in. at Donaghadee. Snow was experienced occasionally after the middle of the month; at Armagh on the 21st its depth on the ground was 8 inches. In the northern division rain fell on 24 days and measured a total of 5.8 in., or 2.03 in. above the normal. In the south, where there was rain on 26 days, the quantity was much larger, the figure being 8.7 in., and the difference from the average 4.1 in.

Temperature for the month generally was below the average, the difference ranging from a little less than 2° in the north to a little above it in the south. After being high early in the period many changes occurred, but as a rule it was below the average and several sharp frosts occurred away from the coast. Between the 22nd and 24th minimum readings ranging from 14° to 20° were recorded in several places.

Sunshine varied from a daily mean of 1.8 hour per day in the south to 1.2 hour per day in the north. In the former district the daily mean was 0.3 hour above the average, and in the latter a trifle below it.

MARRIAGES Registered during the Quarter ending 30th September, 1914, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1914; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS, INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 31st December, 1914, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include										Inquest Cases.	Deaths in Public In- stitutions.	Number of Un- certified Deaths.	Number of successful Vaccinations in the Quarter ending 31st Dec., 1914.									
			Averages in the Quarters ending 30th Sept., 1913. the 10 years, 1904-1913.	Registered in the Quarter ending 30th Sept., 1914.	Averages in the Quarters ending 31st Dec., in the 10 years, 1904-1913.	Registered in the Quarter ending 31st Dec., 1914.	Deaths of		Deaths from																						
							Infants under 1 year of age	Persons aged 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.					Diarrhoea and Enteri- tis of Children under 2 years of age.	Diarrhoea 2 years of age and upwards.	Violence.*

* The Registrars' Districts (83 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names.

formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 253 and 254 are extracted from the Weekly Returns made by the Registrars, and relate to the 14 weeks extending from 27th September, 1914, to 2nd January, 1915. With the exception of 138 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these weeks extending from 27th September, 1914, to 2nd January, 1915, from which the deceased were admitted, in the "Dublin Registration Area."

* Exclusive of 15 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

[illegible]

† See note (†) on page 253.

NOTE.—This table has been constructed for the years 1840 and 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—The district is very free from all kinds of infectious disease.

CARLOW; *Bagenalstown*.—The district is healthy and free from any infectious disease; one death occurred, the result of an accident.

CARLOW; *Borris*.—Healthy conditions prevail in this district.

CARLOW; *Fennagh and Myshall*.—There was an outbreak of diphtheria and scarlet fever in the district during the quarter.

CARLOW; *Leighlinbridge*.—Health of district good.

NEW ROSS; *St. Mullins*.—Sanitation of many parts of the district has been much improved by the heavy rains in December. A mild form of scarlatina was here rather prevalent, but the patients, owing to the mildness of the disease, not having medical advice made it difficult to eradicate.

Dublin County.

BALROTHERY; *Lusk*.—Rather striking preponderance of male over female births for quarter.

CELBRIDGE; *Rathcoole*.—District healthy.

DUBLIN, NORTH; *Clontarf and Howth No. 1 (part of) Rural*.—With the exception of pulmonary tuberculosis, of which there are many cases, this district is in a healthy condition.

DUBLIN, SOUTH; *Crumlin*.—The district enjoys a normal measure of health.

DUBLIN, SOUTH; *Tallaght*.—The health of the district is very satisfactory.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—District healthy during quarter. No case of infectious disease.

Dublin County Borough.

DUBLIN, NORTH; *Clontarf and Howth No. 1 (part of) Urban*.—District very healthy.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements of the district are good, and there was no outbreak of any fever.

Kildare County.

ATHY; *Castledermot*.—Some diphtheria cases in December.

ATHY; *Monasterevin*.—Sanitation good; coughs and colds very prevalent.

CELBRIDGE; *Maynooth*.—District very healthy.

NAAS; *Ballymore Eustace*.—The general health of the district is good.

NAAS; *Naas and Carragh, W*.—No prevailing disease in this district during the past quarter.

NAAS; *Robertstown and Kilmeage*.—Health and sanitary condition of district good.

Kilkenny County.

CALLAN; *Callan, W*.—No death from tuberculosis has been registered during the quarter.

CALLAN; *Kilmaganny*.—Five cases of scarlet fever occurred in the district during the quarter. District otherwise healthy.

CARRICK-ON-SUIR; *Pilltown*.—District in a most healthy condition. I know of no serious case of illness.

CASTLECOMER; *Castlecomer, W*.—The death of a man aged 94 years was registered this quarter, who spent his whole lifetime in the district.

KILKENNY; *Gowran*.—The sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—Prevalence of mumps.

KILKENNY; *Tullaroan*.—During quarter just ended there has been an epidemic of diphtheria in the district. Prompt steps were taken to check the disease.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Imistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—During the quarter just ended I had three cases of typhoid fever, one of them proving fatal; one case of diphtheria, which was also fatal. The district just now is in a very healthy condition. The cases of typhoid were brought about by using bad water.

URLINGFORD; *Urlingford, W.*—Health of district good. No epidemics.

WATERFORD; *Ullid*.—Four deaths from tuberculosis out of a total of fourteen.

King's County.

BIRR; *Banagher*.—Three cases of scarlatina occurred in December; otherwise health of district is good.

BIRR; *Birr, W.*—The sanitary authority is endeavouring with success to have good w.e.'s put up in connection with all houses in the urban area.

BIRR; *Ferbane*.—Epidemic of scarlet fever during quarter. No deaths.

BIRR; *Frankford*.—The district has had very little sickness in it during the last quarter.

BIRR; *Kinnity*.—District healthy. Very heavy rainfall during the whole of the month of December. It may be noted that of the seven deaths registered in the quarter, five attained the aggregate age of 408 years, or an average of over 81 years.

MOUNTMELICK; *Clonygowan No. 2*.—The district is very healthy.

ROSCREA; *Roscrea No. 2*.—District healthy.

TULLAMORE; *Clara*.—Sanitary arrangements good.

TULLAMORE; *Killoughy*.—Sanitary conditions of district are fair.

TULLAMORE; *Phillipstown*.—District healthy. Sanitary arrangements fairly good.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Sanitary arrangements fair.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinallee*.—The district is healthy and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby No. 2*.—Some cases of scarlatina occurred during the quarter.

LONGFORD; *Killashee*.—Health of the district very good. The district is singularly free from all forms of tuberculous disease.

Louth County.

ARDEE; *Castlebellingham*.—District healthy.

ARDEE; *Collon No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DUNDALK; *Barronstown*.—District in healthy state.

DUNDALK; *Dundalk, W.*—A very healthy quarter, no epidemic.

Meath County.

ARDEE; *Collon No. 2*.—District very healthy.

ARDEE; *Drumcondra*.—District very healthy.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

EDENDERRY; *Ballyboggan*.—Health of district good.

KELLS; *Kells, W.*—The district is free from zymotic disease.

KELLS; *Moynalty*.—District in general healthy, and sanitation good.

KELLS; *Nobber*.—Two rather early deaths have occurred from mumps and tubercular meningitis. The latter disease existed in only part of the district. Otherwise the deaths were of the ordinary kind. Nine of the deaths registered ranged from 70 to 88 years of age, averaging 76.2 years.

NAVAN; *Castletown*.—The health of my district is good; sanitary arrangements satisfactory.

NAVAN; *Painestown*.—District in healthy state. No epidemic disease in district during quarter.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Athboy*.—Sanitary condition of district is very satisfactory.

TRIM; *Summerhill*.—Health of district very good.

TRIM; *Trim, W.*—District is free from infectious disease.

Queen's County.

CARLOW; *Carlow No. 2*.—District healthy.

MOUNTMELICK; *Clonaslee*.—District healthy.

MOUNTMELICK; *Clonygowan No. 1*.—District healthy.

MOUNTMELICK; *Maryborough*.—District healthy.

MOUNTMELICK; *Mountrath*.—Sanitary arrangements good.

ROSCREA; *Borris-in-Ossory*.—The health of the district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—The health and sanitation of the district continue satisfactory.

BALLYMAHON; *Ballymore*.—Health of district good.

DELVIN; *Clonmellon*.—Health of district satisfactory.

GRANARD; *Finnea No. 1*.—District very healthy.

MULLINGAR; *Ballynacarrigy*.—Number of deaths registered during this quarter as due to carcinoma is abnormally great.

MULLINGAR; *Killucan*.—District healthy.

MULLINGAR; *Milltown*.—With respect to the sanitary arrangements, there is nothing special to report. Chest complaints and attacks of tonsillitis were very prevalent throughout the quarter owing to the severity of the weather, and two cases of acute bronchitis proved fatal. No deaths from tuberculosis or cancer. Emigration nil, but in this respect there is no difference from the other December quarters for the past fourteen years.

MULLINGAR; *Mullingar, W.*—Health of the district good.

MULLINGAR; *Multyfarnham*.—Sanitary condition of district is good. There has been a mild epidemic of mumps in district during the quarter.

TULLAMORE; *Kilbeggan*.—Health of district on the whole very good. Tuberculosis is still happily of rare occurrence. The wet chilly weather was responsible for numerous cases of diarrhoea in old and young, none of which were fatal. Zymotic diseases nil during quarter. Sanitation satisfactory.

Wexford County.

ENNISCORTHY; *Killann*.—Four cases of scarlet fever.

GOREY; *Camolin*.—District continues healthy.

GOREY; *Gorey, W.*—There have been two cases of diphtheria during quarter, with no deaths, and several cases of measles.

NEW ROSS; *Fethard No. 1.*—The sanitary condition of the district during the quarter continues satisfactory.

NEW ROSS; *Fethard No. 2.*—During the quarter there was an epidemic of scarlatina and diphtheria in the district.

NEW ROSS; *New Ross, W.*—District in good sanitary condition.

NEW ROSS; *Templeludigan*.—District healthy.

WEXFORD; *Bannow*.—The sanitary condition of the district is good. There was a mild outbreak of scarlatina. The cases which came to my notice were isolated, and disinfection carried out and the disease abated.

WEXFORD; *Bridgetown*.—No case of infectious disease in past quarter.

Wicklow County.

BALTINGLASS; *Dunlavin*.—A healthy quarter.

NAAS; *Blessington*.—There were four cases of diphtheria, one of which died; the other cases were sent to Naas hospital for treatment, otherwise the district is very healthy.

RATHDOWN; *Bray No 1.*—Births and deaths about the average.

RATHDOWN; *Delgany*.—Health of district good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Aughrim*.—State of district very healthy, as evidenced by high birth rate and low death rate.

RATHDRUM; *Newcastle*.—Health of district good. Epidemic of measles and German measles prevailed.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Bronchial trouble prevalent during last quarter owing to inclement weather. Malignant disease also prevalent in the aged.

CORROFIN; *Corrofin, W.*—District very healthy.

ENNIS; *Crusheen*.—Health of the district good.

ENNIS; *Ennis No. 1., W.*—Health of district has been good.

ENNIS; *Killaniv*.—Everything seems satisfactory.

ENNIS; *Newmarket*.—Health of district satisfactory.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Influenza prevalent.

ENNISTIMON; *Roadford*.—Sanitary arrangements good.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—Health of district very good.

KILRUSH; *Kilkee*.—The sanitary condition of the district is good.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—There was no case of cancer during the quarter. The sanitary condition of the district is satisfactory. There were four cases of scarlatina, which were promptly isolated by removal to Fever Hospital.

SCARRIFF; *Mountshannon, W.*—District continues in a healthy state.

SCARRIFF; *Quin*.—Three cases of typhoid fever in Quin village during October. Health of rest of district good.

Cork County and County Borough.

BANDON; *Innishannon*.—There were some cases of pertussis and one case of scarlatina in my district during the quarter; otherwise my district has been free from infectious disease.

BANDON; *Kilbrittain*.—District very healthy.

BANDON; *Templemartin*.—Whooping-cough prevalent, one death. A number of cases of scarlet fever, no deaths. Sanitary condition of the district good. Schools seem to be the origin of the spread of scarlet fever, and especially pertussis. Children of a nervous temperament got severer attacks of pertussis than others. Pertussis was at its worst in November.

BANTRY; *Bantry, W.*—The sanitary condition of district is good.

BANTRY; *Durrus and Kilcrohane*.—The district is in an exceptionally good healthy and sanitary condition. There was a slight epidemic of mumps and two cases of erysipelas.

BANTRY; *Glengarriff*.—Of the 4 deaths registered three were of old age pensioners. One case of measles came under my notice during the last week of the quarter. The child had been on a visit to her aunt in Queenstown, and very probably contracted the infection there. It is the only source I could ascertain, the district being entirely free from infectious and contagious diseases.

BANTRY; *Kealkill*.—District healthy. Sanitary condition fairly good.

CASTLETOWN; *Kilcatherine*.—One case of scarlatina; district otherwise healthy. One death from cancer.

CORK; *Ballincollig*.—District healthy.

CORK; *Blarney*.—There was one case of scarlatina and one of typhoid fever during the quarter. District otherwise healthy.

CORK; *Carrigaline No. 1*.—District very healthy in spite of the trying weather.

CORK; *Carrigaline No. 2*.—With the exception of six cases of scarlet fever and one of enteric fever since last report, the district is healthy.

CORK; *Carrignavar*.—District healthy.

CORK; *Dripsey*.—Sanitary condition good.

DUNMANWAY; *Coolmountain*.—There was a severe epidemic of whooping-cough throughout the district during the quarter. Four deaths were registered, occurring from whooping-cough with complications. There were numerous cases of simple cold, otherwise district healthy.

DUNMANWAY; *Dunmanway, W*.—The general health of the district is good. There were three deaths registered as being due to tubercule—one, a case of caries of the spine, having developed outside this locality. Three deaths were also due to cancer.

FERMOY; *Ballynoe*.—Some cases of scarlet fever and measles during quarter.

KANTURK; *Boherboy*.—District healthy.

KANTURK; *Milford*.—The district is healthy.

KILMALLOCK; *Charleville*.—The district is healthy.

KINSALE; *Ballyfeard*.—General health of district satisfactory. A number of ulcers on hands treated. One death occurred from convulsions in a child five months old.

KINSALE; *Courceys*.—District healthy.

KINSALE; *Kinsale, W*.—No case of enteric fever during the quarter, the cases of the deaths from this disease registered occurred during the quarter ending 30th September. A few cases of scarlatina and several of whooping-cough.

MACROOM; *Slieveveagh*.—There was a slight epidemic of scarlatina during the quarter. Whooping-cough was also prevalent and has not yet been completely got rid of. Sanitary conditions are improving slowly.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Health of district good and free from infectious disease.

MALLOW; *Rahan*.—District healthy during past quarter. There are many cases of whooping-cough.

MIDDLETON; *Cloyne*.—There is no system of sewerage or outlet for the liquid filth accumulated in wet weather, especially after heavy rainfalls in the back yards of several of the small tenements in the town of Cloyne; the emanations from this pent-up liquid manure become a nuisance and the cause of low forms of sore throat, and may lead to other forms of zymotic disease. Mumps was epidemic in the district during the quarter.

MILLSTREET; *Cullen*.—Scarlet fever has been prevalent in the district during the past quarter; three deaths have occurred; two have not yet been registered.

SKULL; *Goleen*.—District very healthy.

Kerry County.

CAHERSIVEEN; *Caher, W*.—Sanitary condition of the district good.

CAHERSIVEEN; *Darrynane*.—An outbreak of typhus occurred in the early part of quarter just ended, comprising altogether over 30 cases. It was strictly confined to one townland in the district. The disease on the whole was of a mild type and of short duration, although I regret to report that two adults succumbed, one death having occurred in Cahersiveen Union Hospital. In my opinion the disease was imported in the first instance.

CAHERSIVEEN; *Emlagh*.—District healthy.

CAHERSIVEEN; *Glanbehy*.—District healthy.

CAHERSIVEEN; *Valencia*.—Sanitary arrangements in the district are good, and the district is free from the diseases mentioned in the abstracts.

DINGLE; *Anascaul*.—District healthy during the quarter.

DINGLE; *Castlegregory*.—There was an epidemic of influenza, frequently complicated by pneumonia, in the district during the quarter.

DINGLE; *Dingle, W*.—The sanitary condition of the district for the past quarter has been fairly normal. There has been one case of typhoid fever.

KENMARE; *Kenmare, W*.—District healthy.

KENMARE; *Kilgarvan*.—District healthy.

KILLARNEY; *Coom*.—District healthy during past quarter.

KILLARNEY; *Killorglin*.—There has been an epidemic of measles in the district.

KILLARNEY; *Malahiffe*.—There has been no outbreak of infectious disease of any kind during the quarter.

LISTOWEL; *Ballyhorgan*.—District in a healthy condition.

LISTOWEL; *Ballylongford*.—Health of district satisfactory during past quarter.

LISTOWEL; *Listowel, W*.—Health of district very satisfactory. No epidemic disease during quarter.

LISTOWEL; *Tarbert*.—Four cases of tuberculous disease.

TRALEE; *Castlemaine*.—District healthy.

Limerick County and County Borough.

KILMALLOCK; *Bruff*.—District healthy. The sanitary condition of some of the lanes in Bruff is not satisfactory.

KILMALLOCK; *Bruree*.—Some cases of influenza and pneumonia during quarter.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W*.—Influenza and bronchial diseases prevalent during past month.

LIMERICK; *Annacotty*.—Sanitary arrangements good; district healthy.

LIMERICK; *Caherconlish*.—District healthy; only one case of phthisis registered this quarter. I sent one tuberculous case to Union Hospital, who returned from sanatorium; the disease was too far advanced before sending him away. He contracted it in Dublin at the grocery business.

LIMERICK; *Clarina*.—The district has been healthy during the quarter.

LIMERICK; *Limerick, No. 3*.—District fairly healthy during quarter; no death from fever. The sanitary arrangements are fairly good.

LIMERICK; *Moree*.—Sanitary condition of district good and, for the season, district healthy. Two cases of pulmonary tuberculosis and one of cancer of stomach registered.

LISTOWEL; *Glin*.—The public health in my district during the past quarter has been satisfactory.

MITCHELSTOWN; *Galbally*.—District exceptionally health.

NEWCASTLE; *Ardagh*.—For a healthy district like Ardagh the occurrence of cancer—three cases during the quarter—seems to be of some note.

NEWCASTLE; *Feenagh*.—The sanitary arrangements in the district are fairly good. There is no marked prevalence of any special disease.

RATHKEALE; *Askeaton*.—There were two cases of diphtheria during the quarter; the death registered is uncertified. The second case is a sister of the child that died, and in the same house. I injected her with anti-diphtheritic serum; she is now convalescent, but very weak. There was one case registered from phthisis pulmonalis.

RATHKEALE; *Pallaskenry*.—Three deaths from pulmonary tuberculosis. The inclement weather in past quarter was very fatal to patients suffering from this disease. Otherwise it was a healthy quarter.

RATHKEALE; *Rathkeale No. 1, W*.—The health of the district is very good. There was an epidemic of influenza, with usual complications. No death registered from tuberculosis; two deaths from cancer.

RATHKEALE; *Rathkeale No. 2*.—My district was in a healthy condition and free from all contagious diseases during quarter.

TIPPERARY; *Grean*.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W*.—An alarming epidemic of measles and scarlatina occurred during the quarter. No deaths; epidemic now almost abated.

BORRISOKANE; *CloghJordan*.—Three cases of scarlatina and one of typhoid fever, which were removed to hospital, occurred during the quarter.

BORRISOKANE; *Terryglass*.—Measles very prevalent in district.

NENAGH; *Nenagh, W*.—District healthy. Two cases of scarlatina during quarter, both well.

NENAGH; *Newport*.—District healthy.

NENAGH; *Portroe*.—The sanitary condition of the district is good; no infectious disease.

NENAGH; *Silvermines*.—The sanitary arrangements of the district are good. It is, as may be seen, free from any of the diseases mentioned in the abstracts, except cancer, and diarrhoea in children.

THURLES; *Thurles, W*.—District healthy.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—Influenza, of a severe type, was prevalent during the quarter.

CALLAN; *Mullinahone*.—The sanitary state of district is fairly good; no infectious or contagious disease prevalent. One case of pulmonary tuber-

culosis registered; no case of cancer. Three of the five uncertified deaths were sudden deaths, on which an inquest was not thought necessary.

CASHEL; *Kilpatrick*.—The district is free from zymotic disease. The death of one woman was registered at the age of 99 years.

CLOGHEEN; *Caher*.—No cases of an epidemic character occurred during past quarter. The sanitary state of the district is very satisfactory.

CLONMEL; *Kilsheelan, No. 1*.—A few cases of scarlet fever.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emlagh*.—District healthy; slight outbreak of mumps.

URLINGFORD; *Kilcooly*.—The district has been very healthy during past quarter. Sanitary arrangements well carried out.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—One case of scarlatina removed to hospital. Otherwise condition of district satisfactory.

CLONMEL; *Ballymacarbry*.—Health of district good. Three cases of scarlatina and two of enteric fever during quarter. Sanitary condition very fair.

CLONMEL; *Kilsheelan, No. 2*.—One case of scarlet fever.

DUNGARVAN; *Dungarvan, W*.—Some cases of influenza in district during past quarter.

DUNGARVAN; *Whitechurch*.—There has been an outbreak of measles, without any deaths, during the last month of the quarter.

LISMORE; *Ballyduff*.—General health of district very satisfactory.

LISMORE; *Tallow*.—Scarlet fever, of a mild type, was prevalent in the town part of the district during the past quarter. The epidemic is now abating.

WATERFORD; *Kilmeadan*.—During the past quarter health of district was good, except for the last month, when there were numerous cases of tonsillitis. Sanitary condition of district good.

WATERFORD; *Woodstown*.—The health of the district is good.

YOUGHAL; *Ardmore*.—District healthy.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W*.—Health of district excellent.

ANTRIM; *Crunlin*.—Birth-rate the lowest I remember in this district. There has been a number of cases of diphtheria in the district, but only one death. There is also an epidemic of measles and whooping-cough in other parts of the district.

ANTRIM; *Doagh*.—There have been a good many cases of scarlatina, generally of a mild type, throughout the district during the quarter.

ANTRIM; *Randalstown*.—No cases of infectious disease reported during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Measles prevalent during the quarter.

BALLYCASTLE; *Ballycastle, W.*—There was an epidemic of measles during the quarter. District otherwise healthy.

BALLYCASTLE; *Cushendall.*—Sanitary arrangements very good.

BALLYMENA; *Ahoghill.*—District free from epidemic disease.

BALLYMENA; *Ballymena, W.*—Typhoid fever, which was epidemic for a time, has practically disappeared; public health generally satisfactory.

BALLYMENA; *Broughshane.*—Health of district good; no zymotic disease.

BALLYMENA; *Clogh.*—The district has been very healthy up to the last fortnight. During that time there have been several cases of diphtheria, but none fatal. There have also been a few cases of scarlatina and one case of measles.

BALLYMENA; *Galgorm.*—Sanitary condition of district good.

BALLYMENA; *Glenwhirry.*—Public health good; no infectious disease during quarter. Death-rate very low. Birth-rate much below average.

BALLYMENA; *Toome.*—There have been two cases of diphtheria; one death resulted. The district is in a good sanitary condition.

BALLYMENA; *Portglenone.*—Health of the district is good.

BALLYMONEY; *Dervock.*—Measles has been prevalent in district during last two months of the quarter.

BALLYMONEY; *Dirraw.*—One death registered 103, another 104 years, past quarter. One death from diphtheria; did not see patient until he was eight days suffering from the disease.

BELFAST; *Belfast Rural, No. 4.*—The sanitary arrangements of the district are comparatively good.

LARNE; *Ballycarry.*—There have been some scattered cases of scarlet fever in district during quarter. Whooping-cough has been prevalent, causing so small an attendance that some of the schools have been closed. No deaths from either disease.

LARNE; *Waterfoot.*—Sanitary arrangements excellent.

LISBURN; *Dunmurry.*—There has been a very general epidemic of scarlatina in this district during the past quarter, which, however, has been of a mild type, and is subsiding.

LISBURN; *Glenavy.*—Health of district generally has been good; one case of scarlatina.

LISBURN; *Lisburn, W.*—Scarlet fever has been prevalent during the quarter, but has been decreasing during the past two weeks.

LURGAN; *Aghalee.*—Measles has been very prevalent, also occasional cases of scarlatina.

Armagh County.

ARMAGH; *Blackwatertown.*—The district is free from epidemic disease. There are a few cases of influenza.

ARMAGH; *Keady.*—Several cases of scarlatina have occurred recently, but there has only been one fatality from the disease in this district during the last twenty years.

ARMAGH; *Markethill.*—Scarlet fever, whooping-cough, and measles have been prevalent in the district. Gastro-enteritis was epidemic in some districts during December.

ARMAGH; *Tynan.*—The health of the district very satisfactory.

LURGAN; *Lurgan No. 1, W.*—District fairly healthy.

LURGAN; *Lurgan No. 2.*—District in good healthy condition and free from any infectious disease.

NEWRY; *Meigh.*—District very healthy.

NEWRY; *Mountnorris.*—There is a widespread epidemic of gastro-enteritis, which is obviously infective, and resembles typhoid fever in some cases, especially in the earlier stages.

NEWRY; *Mullaghglass.*—District healthy.

Belfast County Borough.

BELFAST; *Belfast Urban No. 3.*—Measles, whooping-cough, and scarlet fever were all prevalent; all cases of the latter were removed to hospitals outside this district, hence no deaths from it shown in my return.

BELFAST; *Belfast Urban No. 11.*—There has been an epidemic of measles in the district, but the mortality has been low.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District healthy during the quarter.

CAVAN; *Belturbet.*—Two cases of diphtheria during the quarter; district otherwise healthy.

CAVAN; *Cavan, W.*—Measles very prevalent in district for past two months; no deaths.

CAVAN; *Killashandra.*—No deaths from tuberculosis or cancer registered during past quarter; district healthy.

COOTEHILL; *Tullyvin.*—Sanitary condition of district very fair.

ENNISKILLEN; *Holywell No. 2.*—The district is free from epidemic diseases.

GRANARD; *Finnea No. 2.*—District very healthy.

GRANARD; *Scrabby No. 1.*—Health of district fairly good. One death from pulmonary tuberculosis is recorded.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra.*—Sanitary arrangements good.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely.*—District healthy, free from zymotic disease.

DONEGAL; *Laghy.*—District healthy.

DONEGAL; *Mountcharles.*—There has been no outbreak of any infectious disease in the district during the quarter; district healthy.

DONEGAL; *Pettigoe.*—Health of district good. No cases of infectious disease during the quarter.

DUNFANAGHY; *Crossroads.*—District free from any epidemic during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District healthy.

GLENTIES; *Ardara.*—District healthy.

GLENTIES; *Glenties, W.*—Sanitary condition of district leaves room for improvement.

INISHOWEN; *Malin.*—District healthy.

LETTERKENNY; *Church Hill.*—District healthy; no epidemics. A few cases of whooping-cough, but only one death resulted from that disease.

LETTERKENNY; *Letterkenny, W.*—Four cases of diphtheria occurred during quarter with one death (not yet registered).

LETTERKENNY; *Manorcunningham.*—The district at present is healthy. There were a few cases of scarlatina during the quarter; sanitary condition is good.

LONDONDERRY; *Killea.*—Some cases of influenza of a rather severe type.

MILLFORD; *Fanad.*—Health of district good. No case of epidemic disease occurred during the quarter.

MILLFORD; *Rathmullan.*—District has been healthy during the quarter.

MILLFORD; *Rosquill.*—Of the 26 deaths registered 7 occurred in the previous quarters. District free from any infectious disease.

STRABANE; *Raphoe.*—Scarlatina, ten cases; diphtheria, three cases. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. Of the deaths registered one had reached the advanced age of 95 years, and another 99 years.

STRANORLAR; *Killygordon.*—Health of the district has been good during quarter. Two cases of scarlatina in district, one of which died owing to a very severe attack after parturition.

Down County.

BANBRIDGE; *Dromore.*—During the quarter the health of the district has been good.

DOWNPATRICK; *Ballynahinch.*—There have been several cases of scarlet fever, with one or two of chicken-pox, in the district, during the quarter. There have been numerous cases of influenza of a mild type.

DOWNPATRICK; *Clough.*—No death from epidemic diseases.

DOWNPATRICK; *Killyleagh.*—The number of births and deaths registered during the quarter is exactly equal—31 births and 31 deaths. The public health is good. There has been an outbreak of scarlatina in a few families in the district, but the disease has not spread.

DOWNPATRICK; *Portaferry.*—One case of scarlet fever occurred and was sent to hospital. This patient came from Belfast three or four days ago.

KILKEEL; *Kilkeel No. 2, W.*—One case of death was registered as due to age at 101 years.

KILKEEL; *Rosstrevor.*—The sanitation of district very satisfactory. Slight epidemic of measles (mild type); no deaths. One case of enteric fever, case isolated; did not spread; patient recovered.

LISBURN; *Annahilt.*—The sanitary arrangements in district are good.

LISBURN; *Ballylesson.*—A slight outbreak of typhoid fever has occurred, the origin of which is at present being investigated.

LISBURN; *Drumbeg.*—Births under the average number of deaths about the average. Uncertified deaths were of old persons, one of which was registered at 98 years. Scarlatina was prevalent during the quarter, and one death was registered as having been caused by it.

LISBURN; *Hillsborough.*—There were several cases of scarlatina during the last month of the quarter, and at present measles is in the district.

LISBURN; *Saintfield.*—The sanitary conditions are fair. There have been some cases of scarlet fever of a mild sort, and one case of typhoid.

LURGAN; *Moir.*—One case of cancer (malignant gastric ulcer). There have been some cases of scarlatina on the confines of the district, but only a few cases in the district, which I promptly sent to hospital. There is still an extensive epidemic of measles in the district, and whooping-cough is following it, I am sorry to say. It is a bad time for the children to take it now. So far no deaths from either cause.

LURGAN; *Waringstown.*—District healthy during the quarter; five cases of erysipelas and two of diphtheria were reported to me, but none of scarlatina or enteric.

NEWRY; *Donaghmore.*—District has been very healthy for the past three months.

NEWRY; *Rathfriland.*—Sanitary condition of district is much improved.

NEWTOWNARDS; *Bangor.*—Sanitary arrangements good. Public health good, with exception of few cases of scarlatina.

NEWTOWNARDS; *Comber.*—Scarlatina epidemic has now fortunately died out, but we are in great risk of getting fresh cases from Belfast. One or two cases during the quarter were directly traceable to cases in Belfast Union.

NEWTOWNARDS; *Kilmood.*—Sanitary arrangements good. During the quarter there were 16 cases of scarlatina in the district, all of a mild type.

NEWTOWNARDS; *Newtownards, W.*—The general health of the district has been particularly good. There has been a number of cases of scarlet fever notified. Owing to the precautions taken I think the disease is checked. Twenty-eight urban cases were notified during the quarter; twenty-seven of these went to hospital, and careful disinfection was carried out. One urban case of diphtheria was notified. Five rural cases of scarlet fever and one case of diphtheria were notified. These all went to hospital. In one part of the rural district pertussis has shown itself. There have been two deaths from this disease.

Fermanagh County.

ENNISKILLEN; *Ely.*—The district at the present time is in a fairly good sanitary condition.

ENNISKILLEN; *Enniskillen, W.*—Sanitary condition fairly good.

ENNISKILLEN; *Florencecourt.*—The sanitary condition of the district is fairly satisfactory. There were two deaths from pulmonary tuberculosis and one from malignant disease of liver.

ENNISKILLEN; *Holywell No. 1.*—The district is free from epidemic disease.

ENNISKILLEN; *Lisbellaw.*—Sanitary state of district satisfactory.

ENNISKILLEN; *Tempo*.—The health of the district is very good. There has been no death from tuberculosis or cancer during the quarter. There were three cases of scarlatina in the district during the quarter, but these were removed to hospital, and the disease did not spread.

IRVINESTOWN; *Clonelly*.—The district has been healthy during the quarter.

IRVINESTOWN; *Ederney*.—District at present healthy.

IRVINESTOWN; *Irvinestown, W.*—District fairly healthy.

LISNASKEA; *Derrylin*.—There has been an influenza epidemic.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. No infectious disease prevalent. Majority of deaths were of persons aged sixty years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District very healthy.

COLERAINE; *Garvagh*.—Scarlatina appeared in one family, but did not spread; one child died. Two cases of diphtheria occurred at widely separated parts of the district, but did not assume epidemic form; no death; otherwise district healthy.

COLERAINE; *Kilrea*.—District healthy. During the quarter one case of diphtheria occurred, with a fatal result, and one of scarlet fever, ending in recovery. These were the only cases of infectious diseases in the district, and there were no others, owing to strict sanitary precautions having been observed.

COLERAINE; *Portstewart*.—There have been some cases of mumps and whooping-cough amongst children, but general good health has been the rule amongst young and old.

LIMAVADY; *Ballykelly*.—One case of mild scarlatina in district during quarter.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Dungiven*.—An outbreak of diphtheria in the district.

LIMAVADY; *Limavady, W.*—Scarlatina was prevalent in district, but is now getting less.

LONDONDERRY; *Londonderry Urban No. 1*.—Two deaths from influenza.

MAGHERAFELT; *Maghera*.—No death from contagious disease. Births and deaths unusually low.

MAGHERAFELT; *Moneymore*.—One case of typhoid fever occurred in a house where the disease had been over a year ago. It was removed to hospital. Otherwise district has been healthy during quarter, with the exception of a good many cases of mumps, with no fatality. There are some cases of whooping-cough at present.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—During the quarter some cases of scarlatina of a mild type were treated. The deaths from diphtheria were of persons from another district who were removed to hospital in a very advanced stage of the disease and in an untreated condition.

CARRICKMACROSS; *Raferagh*.—There have been a few cases of diphtheria in the district during the past quarter.

CASTLEBLAYNEY; *Ballybay*.—Diphtheria and scarlet fever, both mild, appeared in district.

CASTLEBLAYNEY; *Castleblayney, W.*—Amongst the births that occurred during the quarter was a case of triplets, of whom the first-born survives, the second was stillborn from unreplaceable funis which had prolapsed, and the third was immature and lived only eleven days. Pulmonary affections were numerous and difficult of treatment.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is good, with the exception of the village of Rockcorry.

MONAGHAN; *Castleshane*.—No epidemic; district sanitary.

MONAGHAN; *Emyvale*.—Sanitary arrangements very fair.

MONAGHAN; *Kilmore*.—Some cases of influenza, gastro-enteric form chiefly.

MONAGHAN; *Monaghan, W.*—The sanitary condition of this district is generally satisfactory; that of the town of Monaghan, however, remains in the same state as referred to in previous reports. The scheme adopted for improving the drainage does not seem to have been carried out, and notwithstanding, there has been no epidemic or prevalence of any of the diseases named in the abstracts.

MONAGHAN; *Scotstown*.—District free from contagious disease.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—District very healthy.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory, there being none of the infectious diseases named in the abstracts during the quarter.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Ballygawley*.—Epidemic of mumps during the past quarter.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter. There were two cases of diphtheria.

COOKSTOWN; *Pomeroy*.—One fatal case of enteric occurred during quarter. District otherwise healthy and free from infectious disease.

COOKSTOWN; *Stewartstown*.—District very healthy.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements of district good. No infectious diseases.

DUNGANNON; *Caledon and Ballymagran*.—An epidemic of scarlatina was threatened during later parts of November and early weeks of December (five cases); no further development up to the present. Health of community otherwise exceptionally good.

DUNGANNON; *Coalisland*.—Three cases of enteric fever removed to infirmary; no other infectious diseases; district fairly healthy.

IRVINESTOWN; *Trillick*.—No epidemics during the quarter.

OMAGH; *Dromore*.—The district is in fair sanitary condition, and has been free from infectious diseases.

OMAGH; *Drumquin*.—Sanitary condition of district fair. An epidemic of whooping-cough is at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh No. 1, W.*—Health of district good. Sanitary condition, urban district, fair; rural, unsatisfactory. Many houses in both districts unfit for habitation; cesspools and manure heaps contiguous to dwellings.

OMAGH; *Omagh No. 2.*—District healthy; no epidemic of any kind.

OMAGH; *Sixmilecross*.—The district is at present in very good sanitary condition; the houses might be kept much cleaner, especially the new cottages.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—The district is at present in a healthy condition.

GALWAY; *Galway No. 3 (Arran)*.—Health of district fairly good.

GALWAY; *Moycullen*.—The health of the district continues good.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—District healthy.

GALWAY; *Turloughmore*.—District healthy.

GORT; *Kinvarra*.—Of the seven deaths over 65 years of age, one was aged 95, one 85, and four 80. Two deaths from pulmonary tuberculosis were registered.

LOUGHREA; *Bullaun*.—Four of the ten deaths registered were of persons aged 75, 76, 78, and 81 years.

OUGHTERARD; *Cloonbur No. 1*.—Health of district good, except for influenza colds. Some cases of pertussis appearing.

OUGHTERARD; *Lettermore*.—Health of district satisfactory.

OUGHTERARD; *Oughterard, W.*—Sanitary arrangements primitive; no system of sewers. Measles prevalent in last quarter, almost gone by beginning of this. One death of a male aged 30 years registered as due to this cause. At present an epidemic of whooping-cough throughout the district; three deaths have been registered from this cause. It is now beginning to die out. Two deaths from pneumonia.

PORTUMNA; *Portumna No. 1, W.*—Sanitary condition of district fairly good.

TUAM; *Abbey*.—I consider the district is fairly good regarding sanitary arrangements.

TUAM; *Tuam No. 2*.—Some deaths registered from whooping-cough and one from measles. Epidemic is now practically over.

Leitrim County.

BALLYSHANNON; *Kinlough*.—One death from tuberculosis, no death from cancer, and six uncertified deaths for quarter.

BAWNBOY; *Ballinamore*.—There have been a few cases of acute anterior polio-myelitis. One uncertified case of whooping-cough. The district is in a fairly sanitary condition.

CARRICK-ON-SHANNON; *Drumshanbo*.—Whooping-cough very prevalent during the quarter.

CARRICK-ON-SHANNON; *Jamestown, W.*—Measles still prevalent in district.

MANORHAMILTON; *Drumkeeran*.—No infectious disease in district.

MANORHAMILTON; *Manorhamilton, W.*—District healthy.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district were fairly good during the quarter. There were 9 deaths of persons over 65 years from cerebral hæmorrhage, heart or chest affections. Cerebral hæmorrhage has become more prevalent of recent years.

MOHILL; *Mohill, W.*—District free from epidemics; no complaints about sanitary arrangements.

MOHILL; *Rinn*.—The district is healthy and free from epidemics.

MOHILL; *Rowan*.—No complaints regarding sanitary arrangements. District free from epidemics.

Mayo County.

BALLINA; *Ballina, W.*—An outbreak of typhus fever occurred during the quarter, five deaths recorded. Measles and whooping-cough continue to be prevalent in the district, eight deaths from the former and four from the latter registered. Parts of the rural district are not in a sanitary condition.

BALLINA; *Crossmolina*.—District continues—except one case typhoid—free from infectious disease.

BALLINROBE; *Ballinrobe, W.*—The health of the district is satisfactory. More than half of deaths registered are 65 years and upwards.

BALLINROBE; *Cappaghduff*.—Sanitary arrangements good; no infectious disease.

BALLINROBE; *Cong*.—Health of district good. Of the sixteen deaths registered, four were over 70, four over 80, and one over 90 years.

BALLINROBE; *Hollymount*.—Births and deaths rather under the average. Measles and bronchial affections prevalent during the quarter. Nine deaths were registered over 80 years—one at 90, one at 91, and one at 103 years.

BELMULLET; *Knocknalower*.—District in a healthy condition.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar No. 1, W.*—Sporadic cases of whooping-cough and measles continue to exist.

CASTLEBAR; *Castlebar No. 2*.—The sanitary arrangements are fairly good in most parts of the district. There are two villages that could be more satisfactory. The district is very healthy.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics, save two cases of scarlet fever and a widespread and rather severe epidemic of pertussis. One death from epithelioma of throat and tongue. Sanitation progressive.

CLAREMORRIS; *Claremorris, W.*—There have been a good many cases of scarlatina during the quarter; otherwise the district is healthy.

KILLALA; *Killala, W.*—The health of the district has been good during the quarter; no infectious

forms of disease prevalent. Sanitary conditions unsatisfactory; manure heaps and cesspools close to dwellings.

SWINEFORD; *Swineford, W.*—The district continues in a fairly healthy condition. There were two deaths registered from whooping-cough during quarter, and one of membranous tonsillitis.

WESTPORT; *Ballycroy.*—District generally very healthy notwithstanding severe weather, which, of course, caused a good deal of bronchial trouble.

WESTPORT; *Islandeady.*—The sanitary condition of the district is good. I had a few cases of diphtheria and measles, of which the district is now clear.

WESTPORT; *Louisburgh.*—One case scarlet fever (mild type).

WESTPORT; *Newport.*—Sanitation improving in district. Three deaths from tuberculosis and one from cancer registered.

Roscommon County.

BOYLE; *Boyle No. 1, W.*—Measles was prevalent in the district.

BOYLE; *Keadew.*—Whooping-cough and glandular fever very prevalent during the quarter.

ATHLONE; *Kiltoom.*—Sanitary condition of district average. Of deaths registered, age varied from 76 to 97 years, with the exception of two children.

CARRICK-ON-SHANNON; *Aughrim.*—There was no case of infectious disease during the quarter.

CASTLEREAGH; *Ballaghaderreen.*—Sanitary arrangements fair; general health of district good.

CASTLEREAGH; *Loughglinn.*—The past quarter has been very healthy; there has been one death from pulmonary tuberculosis. There has been no death from cancer.

ROSCOMMON; *Roscommon, W.*—District healthy.

STROKESTOWN; *Rooskey.*—The deaths for the past quarter were under the average. All the deaths registered, except one, were of persons aged 65 years and upwards. Two deaths from cancer; no death from tuberculosis this time; district healthy.

STROKESTOWN; *Strokestown, W.*—Uncertified deaths, ages ranged from 70 to 90 years. The district is free from any infectious disease.

Sligo County.

BOYLE; *Gurteen.*—District healthy.

DROMORE WEST; *Easky, W.*—Health of district very good. No case of infectious disease during quarter.

SLIGO; *Ballymote.*—There was a severe outbreak of measles in this district during the last six weeks of quarter. Five cases (some not yet registered) proved fatal. The extremely wet and stormy weather during December rendered the disease much more dangerous.

SLIGO; *Carney No. 1.*—Sanitary condition of district good.

SLIGO; *Riverstown.*—District healthy.

TOBERCERRY; *Aclare.*—The sanitary conditions are improving. There is an epidemic of measles raging at present in part of district from which two deaths have occurred.

TOBERCERRY; *Coolaney.*—Health of district good; sanitation satisfactory.
